(2) G. O. No. J. 698-708—Police 9-10 of the 1st September 1905, ordering that the members of the District Board are exempted from the operation of the Mysore Arms Regulation.

(3) G. O. No. Fl 2189-92—Munl. (610-04) of the 21st September 1905, sanctioning the opening of a dispensary in the Weavers' Lines in the Mysore City.

(4) G. O. No. 3550-5—Munl. (13-04)-5 of the 30th September 1905, observing that flying visits to villages by Hospital Assistants are not of much good.

(5) G. O. No. 2746-54—L. B. (306-04)-5 of the 13th September 1905, sanctioning the levy of fees on carts coming to the weekly market at Sakrepatna in the Kadur District.

(6) G. O. No. 4407-8—L. B. (322-04)-12 of the 31st October 1905, sanctioning a sum of Rs. 60 per annum for supplying drinking water on shandy days at Santemarahalli in the Chamrajnagar Taluk.

(7) Chief Engineer's letter No. 965—6100 of the 15th September 1905, stating that the suggestion of handing over to the Revenue Department for maintenance the gravelled portions of District Fund roads will be considered two years hence.

II. Read docket No. 1803—L. B. (33-05)-3 of the 21st August 1905, from the Secretary to the Government of Mysore in the Revenue and General Department, requesting to be informed whether the opening of a dispensary at Arakere in the Seringapatam Taluk is necessary.

*Resolution.*—The Board considers that a dispensary at the place is unnecessary, as it is only eight miles from Seringapatam and six miles from Mandya, in each of which places there is a medical institution.

III. Read G. O. No. 1426-33—L. B. (2-05)-46 of the 14th September 1905, passing orders *in re* the award of prizes to the exhibitors of the best cattle at the annual jatra of Chunchenkatte in the Yedatore Taluk.

*Resolution.*—The Board is of opinion that a beginning may be made by awarding a sum of Rs. 100 in prizes, provided the Government be pleased to sanction the amount out of the fees collected on the cattle shown at the place of assemblage.

IV. Read docket No. 2927—San. (86-05)-2 of the 15th September 1905, from the Secretary to the Government of Mysore in the General and Revenue Departments, requesting to be informed whether the District Board is willing to bear the cost of feeding and clothing of the poor and destitute patients in the Isolation Hospital at Mysore.

V. Read Government Order No. 2930-1—Ml. (32-05)-4 of the 15th September 1905, requesting to be informed whether the District Board is willing to bear the cost to be involved by allowing the Hospital Assistant at Saligram to visit Hadya in the Yedatore Taluk, once in a week.

*Resolution.*—The Board is not willing to bear the cost, as much benefit cannot be derived by the people from these hurried visits, as observed by Government in their Order of the 30th September 1905.

VI. Read Government Order No. 3224-12—L. B. (4-04)-16 of the 25th September 1905, sanctioning a permanent advance to the Taluk Boards and Unions and calling for a distribution list.

VII. Read docket No. 2334—L. B. (108-05)-4 of the 4th September 1905, requesting that the estimate for Rs. 824 for improving the Varuna-Hoskote cart-track in the Mysore and Nanjangud Taluks may be placed before the District Board.

*Resolution.*—The Board approves of the estimate, acknowledging with thanks, the sum of Rs. 204 promised by Lieut.-Col. J. Desaraj Urs, the Inamdar of Hoskote, to be contributed for the improvement of the cart-track.

VIII. Government docket No. (9 R.) of the 7th September 1905, regarding the supply of drinking water to Halakere and Hosakere of Talakad in the T.-Narsipur Taluk.

*Resolution.*—The Board, observing that the Chief Engineer has already disposed of the question by stating that hotweather supply in the channel cannot be given, is of opinion that the question may be referred to the Municipal Board of Talakad for constructing wells out of Municipal Funds.

IX. Docket No. 4423—L.B. (193-05)-2, of the 31st October 1905, requesting that the views of the District Board for remitting a sum of Rs. 3-4-6 in the Saragur Union may be reported.

*Resolution.*—The Board accepts the reasons for remissions to be reasonable.

X. Government docket No. 4555—L. B. (198-05)-2 of the 2nd November 1905, enquiring whether the District Board is willing to employ a sweeper on Rs. 5 per mensem in the newly constructed musafirkhana at Bannur in the T.-Narsipur Taluk.

*Resolution.*—The Board considers the employment of a watchman to be necessary and is willing to bear the cost.

XI. Government docket No. 4590—L. B. (201-05)-2 of the 3rd November 1905, calling for the views of the District Board regarding the planting of sapplings and constructing troughs at Santemarahalli market plain, to afford shade and water convenience.

*Resolution.*—The Board is willing to bear an expenditure of Rs. 414 on this account.

*Appeal No.* 108 *of* 1904-05.

*Subject.*

Appeal against the order of the Deputy Commissioner of the Tumkur District, confirming the sale held for arrears of revenue of lands Survey Nos. 49, 41 and 170 of Lakkenahalli village in the Gubbi Taluk.

The facts of the case are briefly these :—

Survey No. 49 (wet) measuring eight acres and thirty guntas and assessed at Rs. 40, of Lakkenahalli village, though included in the atchkat of Lakkenahalli tank is dependent for its irrigation on the Konanakallu tank. But the tank, breached and its bed was given out for temporary cultivation. Thus the only source of irrigation for Survey No. 49 failed and the appellant nevertheless offered to take it up for cultivation in the state in which it then was and he was accordingly put in possession of it in the year Plava (1901-02) and the kandayam therefor was also recovered from him. In the next year, he contended that he was not liable to pay the wet rate of assessment on the ground that there was no means of irrigating his land and prayed either for a remission of asesssment or for permission to utilize the water of the Lakkenahalli tank. But neither of these alternatives were allowed. Meanwhile the kandayam on this land for 1902-03 having fallen into arrears, a demand notice was duly served on the party. The appellant having failed to pay up the arrears, the lands in his khate including the number in question were, after the observance of all the prescribed formalities, put up to auction and at the sale held by the Amildar there were no bids forthcoming for Survey No. 49 which was bought in by Government, while the remaining numbers fetched small prices. When the records came up before the Deputy Commissioner, he, after personal inspection of the land, ordered the confirmation of the sale and also directed that as the petitioner had unauthorizedly taken Government tank water for cultivating his land (No. 49) which he had purchased in the condition in which it then was, he saw no reason to allow any remission and accordingly directed the recovery of the full assessment from the appellant. Hence the present appeal praying for the cancellation of the sale of Survey No. 49 and for the remission of half assessment on the said land.

*Decision.*

Though situated under a breached tank, the land in question was deliberately applied for and obtained by the appellant on the usual terms, that is, subject to the payment of full assessment. He paid full assessment accordingly for the first year. His default in the next year led to the adoption of the coercive measures of which he now complains. The Deputy Commissioner rightly held that the appellant had no valid grievance since the terms of the grant did not entitle him to any concession or relief and since moreover he had used the water of some other Government tank for the irrigation of his land. Government see no reason to interfere.

The appeal is rejected.

*Appeal No.* 109 *of* 1904-05.

Appellant—Kapinipati Nanjundaiya *alias* Srikantaiya, kayamguttadar of Ponnathpur, (represented by his agent L. C. Shama Rao).

*Subject.*

Appeal against the Inam Superintendent's order treating the village of Ponnathpur in the Alur Sub-Taluk, Hassan District, as a jodi village, and directing the imposition of excess quit-rent.

The facts of the case appear sufficiently from the following :—

*Decision.*

This is an appeal from an order of the Inam Superintendent treating the village of Ponnathpur as a jodi village, and directing the levy of an enhanced quit-rent on it.

2. On 8th August last, Government passed the following *ad interim* order remitting the case to the Inam Superintendent with certain observations, and calling for a further expression of his views :—

"This case relates to the annual payment due to Government from the holder of the village of Ponnathpur. The old kayamgutta was Rs. 805-6-1. At the Inam Settlement, it was raised by Rs. 40-4-4 which figure has now been further increased by Rs. 443-8-11, the village being dealt with as a jodi and not a kayamgutta village. Hence this appeal.

"The Inam enquiry disclosed the fact that the land was long being treated in the accounts and enjoyed as a kayamgutta village, and that Captain Chalmers, the Division Superintendent, was in error in referring to it as a jodi village in the concluding part of the order dated 29th January 1838.

"In his order dated 8th August 1876, the Chief Commissioner observed 'the list of kayamgutta grants received with the above has been compared with the accounts in the Chief Commissioner's office and found to be correct. The villages may be exempted from enquiry at the time of the Survey Settlement.' The list referred to include the village in question (Ponnathpur).

"Admittedly, Captain Chalmers could not, and did not, convert the tenure from kayamgutta to jodi and yet the Inam Commissioner in his Order dated 12th June 1879, observed as follows :—'The Brahmins resigned the kayamgutta tenure, and such tenure was apparently not continued by Captain Chalmers even if he had the power to do so, and he twice alludes to it in his orders as a jodi village. I am of opinion that this village should be struck off the list of kayamgutta villages.....'

"In a subsequent order dated 19th December 1879, recorded under the first one in the Inam Settlement Register, Colonel Cole said 'No. 1 in column 10 has attended. The confirmation on half quit-rent is to stand good, but as a kayamgutta village on the rules recently sanctioned.' The recent Rules he referred to were probably the Chief Commissioner's Order No. 1871-33—Rev. 331, dated the 8th August 1879, and paras 3 and 4 of his letter to the Government of India therein adverted to. It is however doubtful whether this village could be said to have come under the disability mentioned therein after it had been recognized and enjoyed as kayamgutta for a considerable period and after such tenure had been unequivocally admitted by the Chief Commissioner's order of 8th August 1876.

"The relinquishment by the bulk of the holders or rather the transfer by them to the only remaining holder whom the appellant represents, could not be taken to have altered or extinguished the tenure as will be seen from the papers produced by the appellant and also quoted in the Inam Settlement Register. Nor could Captain Chalmers' obvious misdescription have had any such effect. And yet Colonel Cole seems to have held that the kayamgutta tenure had ceased to exist by reason of the said transaction and misdescription.

"In the title-deed and the final Quit-rent Register, this village has been shown as kayamgutta and in the Inam Commissioner's endorsement dated 8th April 1880, the holder of the village has been called kayamguttadar.

"With reference to the Inam Superintendent's endorsement dated 1st November 1904, it may be observed that under the revised order of Colonel Cole, dated 19th December 1879, the village was settled as kayamgutta and not as jodi. In these circumstances, the case seems to require further elucidation. The above observations will accordingly be communicated to the Superintendent of Inams with a request that he will be good enough to favor Government with his opinion as to the soundness or otherwise of the appellant's contention that the amount fixed at the Inam Settlement is not liable to enhancement at the orders of Government, dated 17th February 1904. It is also a question whether the imposition of a small quit-rent at the Inam Settlement could be taken to have the effect of estopping the appellant from asserting that the tenure on which he holds the village is neither jodi nor doubtful kayamgutta, but undoubted and acknowledged kayamgutta."

3. The Inam Superintendent in his reply states as follows :—

"If Colonel Cole was wrong in holding that the kayamgutta tenure had ceased to exist, the imposition of the quit-rent at the Inam Settlement will have to be cancelled.

"Colonel Cole accepted the views of his Assistant as recorded in the register, but seems to have attached no weight to the Chief Commissioner's order of 8th August 1876. Documentary evidence regarding the village being conferred on kayamgutta is somewhat deficient, but the village had been treated and recognized as kayamgutta and, but for the interpretation incorrectly put upon Captain Chalmers' power to convert the tenure, would have been treated as such.

"I think the original Inam Settlement, including the imposition of quit-rent, may be set aside and the village recorded as kayamgutta."

4. It is clear that this has long been a kayamgutta village and that it should have treated as such at the Inam Settlement. The quit-rent first imposed on it was not objected to probably owing to its smallness. That quit-rent having been recently considerably raised, objection has now been taken to the manner in which the village has been dealt with by the Inam Department.

5. In concurrence with Colonel Grant, Government direct that the Inam Settlement including the imposition of quit-rent be set aside and the village recorded as kayamgutta.

*Appeal No.* 37 *of* 1905-06.

| *Appellant* | *Vs.* | *Respondent.* |
|---|---|---|
| Kare Bangaloora of Halu Bhavipalya, Magadi Taluk. | | |

*Subject.*

Appeal against the order of the Deputy Commissioner of the Bangalore District, directing the levy of an assessment of annas eight on the appellant for the year 1903-04, and his eviction from the subsequent year, from a vacant site No. 18 of Halu Bhavipalya village in the Magadi Taluk, alleged to be encroached upon by him but claimed as his private property.

The facts of the case appear sufficiently from the following :—

*Decision.*

These proceedings relate to a vacant building site which has been in the appellant's possession for some time past. In 1902, objection was, for the first time, taken to his enjoyment of it on the ground that he had no documentary evidence in proof of his title. The Assistant Commissioner ordered the usual site tax to be levied from him in addition to a fine of annas eight. The appellant was thereupon given a patta on the strength of which as well as of his antecedent title he continued to be in possession until the following year, when the Deputy Commissioner cancelled the patta and ordered the man's eviction. In appeal it is contended that this order is erroneous and unsustainable.

2. Government hold that the appeal is entitled to succeed. The appellant being in possession, it is for the party impugning his title to show that the site is not his property but that of Government. On this point there is absolutely no evidence. Under the law (Section 36 of the Revenue Regulation) what is not the property of individuals is the property of Government. This does not mean, that the "*onus probandi*" lies on the individual actually in possession in assertion of his own right. It has not been shown that the site in question is not private property and that the appellant's possession is wrongful.

3. The appeal is allowed and the order directing the appellant's eviction set aside.

| J. Muniappa Setti of Kasba Mulbagal. | | Venkatarayappa, Shanbhog of Kavitanahalli village, Mulbagal Taluk. |

*Subject.*

Appeal against the order of the Deputy Commissioner of the Kolar District, affirming the order of the Assistant Commissioner, cancelling the alienation, by mortgage, of a portion of a certain service Inam land attached to the shanbhogi office of Kavitanahalli village in the Mulbagal Taluk, on the ground that such alienation was invalid as per rules ; and directing that the mortgagee, who is the appellant, should be dispossessed of the said land.

The facts of the case appear sufficiently from the following:—

*Decision.*

This case relates to a service Inam land which, at the potgi settlement was fully assessed to revenue. The respondent is the shanbhog of the village. One-half of the land was in his possession and the other half in that of his hissedar Ramanna. The whole number stood registered in the respondent's name. He objected to his potgi being held responsible for the assessment due on the portion not in his enjoyment. At the inquiry it transpired that Ramanna had mortgaged his half to the appellant. In the result the Deputy Commissioner passed the order appealed from.

2. Though fully assessed and partly in the enjoyment of a hissedar, the land in question is nevertheless a shanbhogi Inam land which, under the Rules, is inalienable. The Deputy Commissioner therefore rightly refused to recognize the mortgage relied upon by the appellant. Government see no reason to interfere.

3. The appeal fails and is accordingly rejected.

*No. R.* 9172—*L. R.* 353-05-2, *dated 5th January* 1906.

In supersession of Notification No. R. 4318, dated the 30th June 1904, published in page 548 of the *Mysore Gazette* dated the 21st July 1904, the following revised rules regarding the scheme sanctioned by the Government of His Highness the Maharaja of Mysore for improving the Shekdari service are published for general information :—

1. From the 1st of July 1904, the pay of the shekdars shall be Rs. 35 for the first class, Rs. 30 for the second and Rs. 25 for the third.

2. The number of the shekdars shall be 374, and their number in each class shall not exceed the following proportion :—

Twenty per cent of the total number in the first class, *i.e.*, 75 at Rs. 35 each.

Thirty per cent of the total number in the second class, *i.e.*, 112 at Rs. 30 each.

Fifty per cent of the total number in the 3rd class, *i.e.*, 187 at Rs. 25 each.

3. The shekdars will draw a horse allowance of Rs. 10 each per month, and the malnad allowance, wherever allowed, will continue as heretofore.

4. Every shekdar shall keep a decent riding pony, and spend at least twenty days in every month on tour in his hobli.

5. The qualifications for admission into this service shall be :—

(1) That the applicant has passed a University Examination not lower than the Matriculation, and that in the case of men not already in service, they are not above the age of twenty-five years;

(2) That the candidate is pronounced physically fit by a Medical Officer not inferior in rank to a District Medical Officer.

6. Candidates for shekdari shall ordinarily have—

(*a*) passed the Local Service Revenue Examination,

(*b*) obtained a certificate from the Deputy Commissioner that he has satisfied himself, by personally examining or with the aid of others, that the candidate is able to read and write Kannada,

(*c*) undergone one year's course in the Government Engineering School at Mysore in the class for Sub-Surveyors, Maistris, Tank and Work Inspectors and qualified themselves in the following subjects :—

(1) Building, Drawing and Estimating (Elementary).
(2) Building Materials and Construction ( do ).
(3) Hydraulic and Irrigation Works ( do ).
(4) Earthwork and Road-making ( do ).

(*d*) obtained a certificate from the Commandant of the Imperial or the Local Service Regiment at Bangalore or Mysore, that they are able to ride at least six miles an hour or fifteen miles in four hours, cross country, without unduly distressing themselves or their animals, or satisfied the Deputy Commissioner concerned that they have attained the above standard of proficiency in riding.

7. Candidates qualifying as above shall become eligible for the post of shekdar, the first appointment being ordinarily made on the occurrence of a vacancy.

In exceptional cases, however, Government reserve to themselves the power of directing that a candidate after appointment but prior to confirmation, be allowed to obtain either of the qualifications mentioned in clause (*c*) or clause (*d*) or both, of Rule 6.

8. As it is necessary that a person so appointed should be trained in practical surveying before he is confirmed and actually put upon the duties of shekdar, the following course of instruction is prescribed :—

(1) He will be attached to a Measuring Establishment for one Field Season, eight months or less in special cases, for receiving practical instruction.

(2) As a test to his qualification, he should obtain a certificate from the Officer in charge of the Measuring Establishment to which he is attached, that he is competent to execute ordinary chain and cross-staff measurement and knows the Measuring Rules.

(3) In very exceptional cases, where the candidate deserves it, the Officer may grant a certificate after a training of not less than four months.

(4) When the number of shekdars to be trained is too large to admit of their being attached to Measuring Establishments, some of them may be attached to District Surveyors, who may also grant certificates in the same manner as officers in charge of Measuring Establishments and such certificates may be accepted.

9. In the case of candidates who are already in the service of Government, or who have been nominated as fit for the post of shekdar under these rules by the Deputy Commissioners of Districts or the Revenue Commissioner, and to whom it has been considered expedient to allow the benefit of the proviso to Rule 7, an allowance of one-half of the pay of such shekdars shall be granted during the period of their stay, not exceeding one term, in the Engineering School at Mysore to qualify themselves, as required in clause (c) of Rule 6, and they shall be admitted to the Engineering School as free scholars. A similar allowance shall also be given to candidates attached to Measuring Establishments of the Mysore Revenue Survey, as required by Rule 8, while so attached.

The concessions allowed by this rule shall be in operation only for such period as Government may from time to time direct.

10. Promotions from the third class to the second class, and from the second to the first shall be regulated in the following manner :—

(1) Till the maximum number of vacancies is filled up in each class, two years' efficient service in a class of a shekdar qualified as above will entitle him to promotion to the next higher class ;

(2) when the full number of shekdars in the first and second classes is appointed, promotion will be regulated by vacancies occurring from time to time, and will depend upon the comparative merits, qualifications and services of men in the lower classes.

11. No shekdar that does not qualify himself as herein laid down shall be entitled to the pay of any of the new classes, but shall get only the pay to which he is entitled under the old rules.

Licenses to possess and carry arms for destroying wild animals.

18. Licenses to possess and carry arms and ammunition may be granted by the Magistrate of the district or sub-division of the district in Form VII without fee, and for a term of five years, to persons who require arms for the destruction of wild animals which do injury to human beings, cattle, or crops. Such a license will be valid only in or on the immediate confines of the district for which it is granted. It will be subject to the conditions that the license and the weapon it covers are shown once a year, between the 15th November and the 31st December, to the nearest Magistrate; that the weapon becomes confiscated to Government directly it is sold or seized in execution of any debt; and that such weapon is carried only on occasions when it is to be used *bonâ fide* for the destruction of wild animals. Holders of licenses under this rule must not go armed in railway carriages, or to fairs, religious processions, or other public assemblages. If a gun covered by such license is lost or stolen, the license-holder shall at once give notice of the fact at the nearest Police Station.

Restriction as regards breech-loading rifles and balled rifle ammunition.

19. Licenses in Forms I, IV, V, VI and VII shall not, in the case of breech-loading rifles and balled rifle ammunition, be granted without the previous sanction of the Government.

Licenses for possession or transport of sulphur.

20. Licenses for the possession or transport of sulphur, proved to the satisfaction of Government to be intended only for *bonâ fide* medicinal, manufacturing or agricultural purposes, may be granted without payment of any fee. This concession does not extend to sulphur intended for the manufacture of gunpowder or of ammunition generally, as defined in Section 4 of the Mysore Arms Regulation.

*General.*

Fees how levied.

21. The fees leviable under these rules shall be taken in the shape of "impressed stamps." Ordinarily the applications for licenses or renewals of licenses shall be written on "impressed stamps" of value equal to the

amount of fee leviable in respect of such licenses or renewals, and the licenses will be issued on plain paper. But when the licenses themselves are written or printed on "impressed stamps," the applications may be on paper of the value hereinafter mentioned. When an application for a license is written on an "impressed stamp," and the license is refused, the value of the stamp will be refunded to the applicant.

Applications for licenses.

22. Applications for licenses in respect of which no fee is leviable, or regarding licenses printed on impressed stamps on which the full fee has been paid, shall be considered to be applications within the meaning of Schedule II, Article 1, Clause (a), of the Mysore Court Fees Regulation, 1900, and shall bear a Court-fee stamp of one anna.

Period of currency of licenses.

23. All licenses under Rules 13 and 15 shall expire on the 31st December of the year for which they may be issued; licenses under Rule 18 shall expire on the 31st December of the fifth year of their currency. But the currency of a license may be renewed,—previous to its expiration, and on payment of a second fee,—by the same authority that granted it; provided always that, where a renewal of license is applied for as aforesaid, the period of its currency shall, whether the application is eventually granted or refused, be deemed to include the interval during which the application was pending disposal.

Grant of duplicates of licenses lost or destroyed.

24. When a license granted in accordance with these rules is lost or accidentally destroyed, a duplicate may be granted to the licensee on payment of the same fee as he paid on the original license, if not in excess of one rupee; and, in any other case, on payment of a fee of one rupee. Cultivators or other persons to whom licenses may have been granted without payment of any fee may obtain duplicates of such licenses, if lost or destroyed, free of all fee.

Conditions subject to which licenses are granted.

25. All licenses shall be given and held subject to the conditions endorsed on the reverse, and subject to these rules and to the provisions of the Arms Regulation. Where arms are intended to be employed in the pursuit of game, a separate license under the Mysore Game Regulation and Rules is necessary. Licenses under Rules 15 and 18 may also be granted subject to the observance of a close season in the pursuit of animals and birds that do not injure either men, or cattle, or crops and are not otherwise provided for. The limits of the close season will be decided by the Government, and the condition regarding such close season, if imposed, shall be endorsed on the reverse of the license.

Licenses to be produced on demand.

26. Any person holding a license, or acting under a license, granted in accordance with these rules, shall be bound to produce the same, when called upon to do so by any Magistrate or by any Police Officer in charge of a Police Station, or by any Police Officer of higher rank.

Language of licenses.

27. Licenses granted for use within a district shall be written or printed in Kannada. Licenses for use beyond the district where they may be granted shall be in English and may be in Kannada as well.

Scope of licenses.

28. A license granted under these rules will cover only the weapons or other articles and the person named therein, unless the officer granting a license under Rule 15 or 16 deems it expedient to include the retainers of any person named in the license; in such case, the entry on the face of the license shall declare how many and whose retainers are covered by the license. Joint licenses in the names of more than one person cannot be issued; every person seeking to possess or carry arms must take out a separate license.

Powers of officers empowered to grant licenses.

29. Any officer empowered to grant a license under these rules may, at his discretion, refuse to grant, to renew, or to consent to the issue of, a license, or may refer any application for the orders of the Government.

Certificates of exemption.

30. All persons exempted under Section 22 of the Regulation or Rule 1 of these rules are entitled on application to the Magistrate of the district tob e furnished with certificates of such exemption.

Subordination of officers.

31. All Magistrates and other authorities acting under these rules will perform their duties subject to the control of their executive superiors and of the Government.

GOVT. OF H. H THE MAHARAJA OF MYSORE, GENL. AND REV. SECRETARIAT,
*Dated Bangalore, 5th January* 1906.

By Order,
B. K. VENKATA VARADA IYENGAR,

BEFORE THE GOVERNMENT OF HIS HIGHNESS
THE MAHARAJA OF MYSORE.

*Appeal No.* 9 *of* 1905-06.

| *Appellant* | *Versus* | *Respondent* |
|---|---|---|
| Boregowda, son of Boregowda of Sambunahalli village, French Rocks Sub-Taluk | | Marigowda, son of Chikkegowda. |

*Subject.*

Appeal against the order of the Deputy Commissioner of the Mysore District, directing the registry of the pateli baraward of Sambunahalli village in the French Rocks Sub-Taluk, in the name of the respondent.

The facts of the case appear sufficiently from the following :—

*Decision.*

One Chennegowda and Boregowda were brothers. The pateli of the village in question appears to have originally stood in their joint names while the duties thereof were being performed by one Chikkegowda, the son of the former. Chennegowda was the first to die. Chikkegowda and Boregowda next died about the same time, that is, in the year 1877-78. The respondent Marigowda, the son of Chikkegowda, has since been in sole possession and enjoyment of the office. Appellant Boregowda is the son of the joint barawardar Boregowda. He was a minor when his father died. But he preferred no claim to the office for some fourteen years after the attainment by him of his majority. Neither he nor his father was thus ever in possession. In 1902, the respondent applied that, as he was a sickly person, the office might be transferred to a son of his named Bora. This led to an enquiry in the course of which the appellant for the first time set up a title of his own on the ground of his father having once been a joint barawardar. The Deputy Commissioner declined to recognise this title, nor did he consider a transfer from the respondent to his son really called for. The office has thus been formally registered in the name of the respondent who, as already observed, has held it continuously and without interruption for nearly thirty years past. The appellant is only a hissedar, being a member of the younger branch of the family. He cannot successfully claim possession either jointly with the respondent or to his exclusion. The village moreover is too small for two patels. Nor, again, do the circumstances of the case warrant an arrangement involving retatory performance of the duties of the office by both the parties. For these reasons, Government have no hesitation in holding that the Deputy Commissioner has arrived at a correct decision and that there are no grounds for any interference therewith.

The appeal fails and is accordingly rejected.

Copy of the above is forwarded to the Deputy Commissioner of the Mysore District, together with the records received with his letter No. 37, dated the 12th July 1905.

*Appeal No.* 35 *of* 1905-06.

| *Appellant* | *Versus* | *Respondent* |
|---|---|---|
| Lakshmegowda | | Hutchegowda. |

*Subject.*

Claim to the pateli office (Municipal Section) of Kasaba Nagamangala.

The facts of the case appear sufficiently from the following decision :—

*Decision.*

The parties appear to belong to the same family, the respondent being the grandson of the first and the appellant, the grandson of the second, sons of a common ancestor by name Mudde Gowda. The appellant's grandfather Kempe Gowda held the office of patel of Nagamangala from 1867 to 1874, when on his death he was succeeded by one of his sons, Lakshmana, with the consent of his other son Mudda. On Lakshmana's demise in 1884 his son, the present appellant, was appointed to the office in 1884. Owing to the appellant's minority his uncle, the above named Mudda, was first appointed his gumasta, and on the latter's death and shortly after the gumastaship was conferred on the respondent who, both then and on several subsequent occasions, the last being in 1893, agreed to hold the office on behalf of the appellant and to surrender the same to him on his attaining majority. The appellant having recently ceased to be a minor claimed possession of the office from the respondent. The latter, however, resisted the claim on the ground that being a descendant of the elder branch of the family, he could not be superseded in favor of the appellant who belonged to the junior branch of it. He further contended that in any case, the village being a large one, he should be left in undisturbed possession of a portion of the pateli duties appertaining thereto, namely the Municipal and cattle-pound sections thereof. The Sub-Division Officer rejected the respondent's contention and directed that the pateli should revert *in toto* to the appellant who was the barawardar while the respondent was only his gumasta. In appeal, the Deputy Commissioner while recognizing the appellant's title, held that the village was too big a charge for a single individual and that therefore the respondent's alternative contention should be allowed. Hence this appeal.

2. Government are of opinion that the order made by the Deputy Commissioner is erroneous and unsustainable. It is now unnecessary to go into the question why in the remote past, the office came to be held by the members of the younger branch in preference to those of the

elder. Suffice it to say that there is absolutely no justification for the reversal of an arrangement which has existed without interruption for some forty years past. The respondent's change of front cannot be countenanced. Admittedly he got in as the appellant's gumasta on the distinct understanding that he would vacate as soon as the appellant ceased to be under a disability. So recently as 1893, he deposed in unequivocal language that he was prepared to abide by the terms of his original appointment. That being so, his present attitude is most unreasonable. To all intents and purposes the village is a single charge. The respondent is bound to give it up to the appellant on whose behalf he has held it for some years. Whether administrative necessities demand the making of a separate arrangement for the more satisfactory performance of the Municipal portion of the pateli duties is a question which has to be dealt with independently of the present litigation which merely involves the transfer of the office from the gumasta to his principal. The Deputy Commissioner has laid some stress on the fact of the respondent's long possession, but he has evidently overlooked the circumstance that that possession was permissive and not hostile. Government see no reason why the appellant who is no longer under a disqualification should be kept out of the whole or any portion of his rights at the instance, and for the benefit of the respondent.

3. For the above reasons, the Deputy Commissioner's order is set aside and that of the Sub-Division Officer restored.

*Appeal No.* 136 *of* 1904-05.

*Appellant* Anneppa.

*Subject.*

Appeal against the order of the Deputy Commissioner of the Mysore District, affirming that of the Assistant Commissioner (Jamabandi Officer) directing the levy of full assessment from the appellant for the period he has been cultivating magi No. 205 of Badanavalu village in the Nanjangud Taluk claimed by him as his Inam land but included into the tank bed and classed as kharab at the time of the settlement.

*Decision.*

The facts of the case are very simple. Magi No. 205 was a wet land which, along with certain dry lands, was at the Inam Settlement confirmed on a consolidated quit-rent of Rs. 13 to one Subhadra Bayi and Yamana Bayi whom the appellant Anneppa now represents. At the Survey Settlement which took place in 1900, this land (wet portion of the inam) was treated as kharab and included in the bed of the Narsambudhi tank to the whole of which was given a single survey number namely 376. The appellant was evidently not a consenting party to this inclusion notwithstanding which he continued to cultivate and enjoy the land until 1902-03 when, on a report made to him by the Taluk authorities, the Jamabandi Officer directed the levy of full temporary assessment from the occupant pending final orders on the question of his right to hold the land free of assessment in spite of its situation with reference to the tank. The Deputy Commissioner to whom an appeal was preferred, declined to interfere on the ground that the appellant ought not to have cultivated the land without previous permission in that behalf. Hence this appeal. It may be noted that the enforced levy continues regardless of the appellant's protest.

2. There can be no doubt that the title recognized by the Inam Settlement continues in force and that the mere inclusion of the land in the tank bed at the subsequent Survey Settlement does not convert an authorized and rightful possession into an unauthorized and wrongful one. If in the interests of the tank, any interference with vested private rights is deemed desirable, the proper course for Government to adopt is to buy up those rights in the manner prescribed by law so long as no such acquisition is made the appellant is entitled to enjoy the land by payment of quit rent with such khalsat for the excess, if any, as might be imposed under standing orders. He can neither be summarily dispossessed nor prevented from cultivating the land, nor compelled to pay any assessment over and above the quit-rent and khalsat due under the title deed and Khalsat Rules. He has thus a valid grievance.

3. The orders of the Assistant Commissioner and Deputy Commissioner will therefore be reversed and the appellant's possession under the title deed directed to be left undisturbed until he is bought out and evicted in accordance with law. The assessment which he was under no legal obligation to pay and which nevertheless was recovered from him, by way apparently of fine, should be refunded to him.

*No. R.* 9172—*L. R.* 353-05-2, *dated* 5*th January* 1906.

In supersession of Notification No. R. 4318, dated the 30th June 1904, published in page 548 of the *Mysore Gazette* dated the 21st July 1904, the following revised rules regarding the scheme sanctioned by the Government of His Highness the Maharaja of Mysore for improving the Shekdari service are published for general information :—

1. From the 1st of July 1904, the pay of the shekdars shall be Rs. 35 for the first class, Rs. 30 for the second and Rs. 25 for the third.

2. The number of the shekdars shall be 374, and their number in each class shall not exceed the following proportion :—

Twenty per cent of the total number in the first class, *i.e.*, 75 at Rs. 35 each.

Thirty per cent of the total number in the second class, *i.e.*, 112 at Rs. 30 each.

Fifty per cent of the total number in the 3rd class, *i.e.*, 187 at Rs. 25 each.

3. The shekdars will draw a horse allowance of Rs. 10 each per month, and the malnad allowance, wherever allowed, will continue as heretofore.

4. Every shekdar shall keep a decent riding pony, and spend at least twenty days in every month on tour in his hobli.

5. The qualifications for admission into this service shall be :—

(1) That the applicant has passed a University Examination not lower than the Matriculation, and that in the case of men not already in service, they are not above the age of twenty-five years;

(2) That the candidate is pronounced physically fit by a Medical Officer not inferior in rank to a District Medical Officer.

6. Candidates for shekdari shall ordinarily have—

(a) passed the Local Service Revenue Examination,

(b) obtained a certificate from the Deputy Commissioner that he has satisfied himself, by personally examining or with the aid of others, that the candidate is able to read and write Kannada,

(c) undergone one year's course in the Government Engineering School at Mysore in the class for Sub-Surveyors, Maistris, Tank and Work Inspectors and qualified themselves in the following subjects :—

(1) Building, Drawing and Estimating (Elementary).

(2) Building Materials and Construction ( do ).

(3) Hydraulic and Irrigation Works ( do ).

(4) Earthwork and Road-making ( do ).

(d) obtained a certificate from the Commandant of the Imperial or the Local Service Regiment at Bangalore or Mysore, that they are able to ride at least six miles an hour or fifteen miles in four hours, cross country, without unduly distressing themselves or their animals, or satisfied the Deputy Commissioner concerned that they have attained the above standard of proficiency in riding.

7. Candidates qualifying as above shall become eligible for the post of shekdar, the first appointment being ordinarily made on the occurrence of a vacancy.

In exceptional cases, however, Government reserve to themselves the power of directing that a candidate after appointment but prior to confirmation, be allowed to obtain either of the qualifications mentioned in clause (c) or clause (d) or both, of Rule 6.

8. As it is necessary that a person so appointed should be trained in practical surveying before he is confirmed and actually put upon the duties of shekdar, the following course of instruction is prescribed :—

(1) He will be attached to a Measuring Establishment for one Field Season, eight months or less in special cases, for receiving practical instruction.

(2) As a test to his qualification, he should obtain a certificate from the Officer in charge of the Measuring Establishment to which he is attached, that he is competent to execute ordinary chain and cross-staff measurement and knows the Measuring Rules.

(3) In very exceptional cases, where the candidate deserves it, the Officer may grant a certificate after a training of not less than four months.

(4) When the number of shekdars to be trained is too large to admit of their being attached to Measuring Establishments, some of them may be attached to District Surveyors, who may also grant certificates in the same manner as officers in charge of Measuring Establishments and such certificates may be accepted.

9. In the case of candidates who are already in the service of Government, or who have been nominated as fit for the post of shekdar under these rules by the Deputy Commissioners of Districts or the Revenue Commissioner, and to whom it has been considered expedient to allow the benefit of the proviso to Rule 7, an allowance of one-half of the pay of such shekdars shall be granted during the period of their stay, not exceeding one term, in the Engineering School at Mysore to qualify themselves, as required in clause (c) of Rule 6, and they shall be admitted to the Engineering School as free scholars. A similar allowance shall also be given to candidates attached to Measuring Establishments of the Mysore Revenue Survey, as required by Rule 8, while so attached.

The concessions allowed by this rule shall be in operation only for such period as Government may from time to time direct.

10. Promotions from the third class to the second class, and from the second to the first shall be regulated in the following manner :—

(1) Till the maximum number of vacancies is filled up in each class, two years' efficient service in a class of a shekdar qualified as above will entitle him to promotion to the next higher class ;

(2) when the full number of shekdars in the first and second classes is appointed, promotion will be regulated by vacancies occurring from time to time, and will depend upon the comparative merits, qualifications and services of men in the lower classes.

11. No shekdar that does not qualify himself as herein laid down shall be entitled to the pay of any of the new classes, but shall get only the pay to which he is entitled under the old rules.

No money orders will be received by the undersigned except from outside the Province.

Charges of private advertisements must be forwarded to this office.

No. 3.—Much inconvenience is caused in this office by subscribers not giving their full and correct addresses, and writing illegibly on the money order coupons, which are unfit for record.

No. 4.—Communications on post-cards or on paper less than half a sheet of foolscap will not receive attention.

No. 9.—Spare copies of notifications, etc., are often asked for long after their publication, when the matter has been broken up, necessitating its resetting, causing inconvenience to the Press and waste of money. It is therefore requested that when spare copies are wanted, a note to that effect, stating the number of copies, be made at foot of such notification, etc.

No. 10.—If no instructions, either at foot of notifications, or separately by docket, accompany any matter, it will be printed in the language in which it is written, and published only once.

5. No arms or ammunition or military stores shall be transported in any part of Mysore without a license in Form I appended to these Rules. The license will be granted by the Magistrate of the district. If the articles are to be consigned to a place beyond the jurisdiction of the officer granting the license, the consent of the Magistrate of the district to which the consignment is made must be obtained before the license is issued. Such consent may be obtained by the person applying for the license, or the District Magistrate to whom application for the license is made may forward the proposed license to the officer whose consent is required, and on receiving a reply should either issue the license to the applicant, or inform him that his application for a license to transport arms, etc., has been refused. 6. Every consignment of arms or ammunition or military stores transported in any part of Mysore by railway on lines within the jurisdiction of His Highness the Maharaja of Mysore shall be conspicuously

marked with the words "Arms," "Ammunition" or "Military Stores," as the case may be, in such a manner as to be readily recognizable by the Railway authorities. A copy of the license to transport the articles shall be attached to the way bill when the consignment is booked as a parcel, and to the invoice when booked as goods, and no consignment shall leave the railway premises without the contents being verified and compared with the license by the Railway Police at the place of delivery. Transport by persons entitled to possess arms.

7. Persons lawfully entitled to possess arms, or to go armed, are permitted to transport, in any part of Mysore, arms or ammunition in reasonable quantities for their own use. Any person abusing this exemption and transporting such articles otherwise than in reasonable quantities for his own use, will be held to have contravened this rule, and will, on conviction, become liable to the penalties under sections 13 and 14.

*Note.*—A cooly or servant carrying a packet properly secured and addressed to an exempted person so long as he travels with it on the direct route from the licensed dealer's premises or a railway station to the residence of such exempted person will be held to require no license provided that the exempted person is responsible for the conduct of the cooly or servant he employs and that the cooly or servant himself does not deviate from the direct route.

8. A person licensed to possess arms, ammunition or military stores, or who is exempted from the liability to take out such a license, is entitled to transport to his residence, from the premises of a licensed dealer, arms, ammunition or military stores without a separate transport license, so long as the articles purchased are in reasonable quantity and for his own use. A licensed dealer in arms, ammunition and military stores may supply the order of any such person, and may, without a separate transport license, send or despatch, in any way desired, to the residence of the purchaser, the articles ordered by any such person, so long as they fulfil the requirements of Rule 7, and are legibly addressed to the person for whom they are intended.

Restrictions to which transport license is subject.

9. A license to transport arms or ammunition or military stores is void, if the consignment breaks bulk at any place short of the district for which it may be granted. A license to transport shall ordinarily not be made valid for more than twice the period actually required for the conveyance of the articles to their destination by the intended route.

Application for transport-license.

10. Persons desirous of transporting arms, ammunition or military stores must apply in writing to the officer authorized to grant transport licenses from the place of despatch. The application must specify—

(*a*) the place to which the articles are to be transported, the route of transport, and the probable time that will be occupied in the journey;

(*b*) the quantity, description, average price, and the purpose of each kind of arms or ammunition;

(*c*) whether the applicant desires that the officer to whom he applies should obtain the consent of the Magistrate of the place of consignment; (if the applicant has obtained such consent, the evidence of such consent must be produced);

(*d*) in the case of breech-loading rifles and balled rifle ammunition, whether the previous sanction of the Government has been obtained.

Contents of packages to be marked.

11. Persons transporting arms, ammunition or military stores under a license must write legibly on the cases or packages containing such articles an account of their contents.

Procedure on arrival of articles at destination.

12. Within six days of the articles reaching their destination, the consignee must deliver the transport license to the Magistrate of the district, who must satisfy himself that the articles transported to his district correspond with the entries in the license, and that any deficiency is properly accounted for.

*Manufacture and sale.*

Licenses to manufacture, convert, keep and sell.

13. Licenses to manufacture, convert, keep and sell arms or ammunition or military stores may be granted by the Magistrate of the district or by the Magistrate of a sub-division of the district. They shall be in Forms II and III appended to these Rules. The fee, payable in stamps, shall be twenty rupees in respect of licenses to manufacture, convert and sell, and ten rupees in respect of licenses to keep and sell. Every license-holder under this rule shall keep, in such form as the Government may from time to time direct, registers of all arms manufactured or converted, of all ammunition and military stores manufactured, of all stock in hand, and of all sales. He shall exhibit his stock and his registers on demand by any Magistrate, or by any Police officer not below the rank of Inspector. Magistrates and all Police officers not below the rank of Inspector are hereby empowered to enter and inspect any premises within their several jurisdictions in which arms or ammunition or sulphur are manufactured, or kept, and to examine the stock and accounts of receipts and sales of arms, ammunition and military stores. Every person licensed to sell arms and ammunition shall affix a signboard on a

conspicuous part of his shop or usual place of business, and shall cause to be painted thereon in large letters in English, or in Kannada, his name and the words "licensed to manufacture," or "licensed to deal in arms, ammunition and military stores," as the case may be. He shall also post up in his shop a copy of section 23 of the Mysore Arms Regulation in Kannada or in English.

Notwithstanding anything contained in this Rule, a person holding a license under the Mysore Explosives Regulation. II of 1888, endorsed in accordance with Rule 42 of the Rules thereunder, to manufacture, possess and sell, or to possess and sell, explosives, may be granted *free of all charge* a license for the same period in Form II or Form III, respectively, in regard to ammunition or military stores which are not explosives.

14. Licenses to manufacture, convert, keep and sell arms or ammunition issued under Rule 13 shall exclude by specific and express condition, (1) the manufacture and conversion of breech-loaders and (2) the use of parts of British Military weapons (whether condemned or not) in any process of manufacture and conversion.

*Possession of arms and going armed.*

Licenses to possess arms and go armed sport, etc.

15. Licenses to possess arms and ammunition in reasonable quantities and to go armed for purposes of sport of protection, or of display, may be granted by the Magistrate of the district or by the Magistrate of a sub-division of the district in Form IV. Such a license shall be liable to a fee of four annas for each weapon; and will authorize the holder to carry the arms described in it on occasions when they may be reasonably required for the purposes named in the license. But the holder, unless specially authorized by the Magistrate, must not go armed in railway carriages, or to fairs, religious processions, or other public assemblages. Licenses granted under this rule shall, on countersignature by the Secretary to Government in the General Department, or other officer authorized in this regard by the Government, be valid for such districts as may be specified by the countersigning officer.

Licenses to go armed on a journey.

16. The Magistrate of the district or the Magistrate of a sub-division of the district may grant a license in Form V for a journey, specifying the direction of the journey, and the period it will occupy. Such license will be valid in other jurisdictions only for such journey and for such period, and will be liable to a fee of four annas for each weapon. Holders of licenses under this rule, unless specially authorized by the officer granting the licenses, must not go armed in railway carriages, or to fairs, religious processions, or other public assemblages.

When such Magistrate receives an application for a license in Form V from a person who is not resident within his jurisdiction, or is not personally known to him, he shall, before granting the license, ascertain from the Magistrate of the district or sub-division of the district in which the applicant resides, whether there is any objection to the grant of the license, unless for reasons to be recorded, he considers this precaution to be clearly unnecessary.

Licenses to possess arms.

17. Licenses to *possess* fire-arms or ammunition or military stores may be granted by the Magistrate of the district or sub-division of the district in Form VI without fee, and shall be valid for five years. Such licenses will not authorize the holders to go armed or to carry arms. Licenses to possess *and carry* arms (Form IV) will be liable to fees as stated in Rule 15.

Licenses to possess and carry arms for destroying wild animals.

18. Licenses to possess and carry arms and ammunition may be granted by the Magistrate of the district or sub-division of the district in Form VII without fee, and for a term of five years, to persons who require arms for the destruction of wild animals which do injury to human beings, cattle, or crops. Such a license will be valid only in or on the immediate confines of the district for which it is granted. It will be subject to the conditions that the license and the weapon it covers are shown once a year, between the 15th November and the 31st December, to the nearest Magistrate; that the weapon becomes confiscated to Government directly it is sold or seized in execution of any debt; and that such weapon is carried only on occasions when it is to be used *bonâ fide* for the destruction of wild animals. Holders of licenses under this rule must not go armed in railway carriages, or to fairs, religious processions, or other public assemblages. If a gun covered by such license is lost or stolen, the license-holder shall at once give notice of the fact at the nearest Police Station.

Restriction as regards breech-loading rifles and balled rifle ammunition.

19. Licenses in Forms I, IV, V, VI and VII shall not, in the case of breech-loading rifles and balled rifle ammunition, be granted without the previous sanction of the Government.

Licenses for possession or transport of sulphur.

20. Licenses for the possession or transport of sulphur, proved to the satisfaction of Government to be intended only for *bonâ fide* medicinal, manufacturing or agricultural purposes, may be granted without payment of any fee. This concession does not extend to sulphur intended for the manufacture of gunpowder or of ammunition generally, as defined in Section 4 of the Mysore Arms Regulation.

*General.*

Fees how levied.

21. The fees leviable under these rules shall be taken in the shape of "impressed stamps." Ordinarily the applications for licenses or renewals of licenses shall be written on "impressed stamps" of value equal to the

amount of fee leviable in respect of such licenses or renewals, and the licenses will be issued on plain paper. But when the licenses themselves are written or printed on "impressed stamps," the applications may be on paper of the value hereinafter mentioned. Applications for licenses.

22. Period of currency of licenses.

23. All licenses under Rules 13 and 15 shall expire on the 31st December of the year for which they may be issued; licenses under Rule 18 shall expire on the 31st December of the fifth year of their currency. When a license granted in accordance with these rules is lost or accidentally destroyed, a duplicate may be granted to the licensee on payment of the same fee as he paid on the original license, if not in excess of one rupee; and, in any other case, on payment of a fee of one rupee. Cultivators or other persons to whom licenses may have been granted without payment of any fee may obtain duplicates of such licenses, if lost or destroyed, free of all fee.

The limits of the close season will be decided by the Government, and the condition regarding such close season, if imposed, shall be endorsed on the reverse of the license.

BANGALORE,
*17th January* 1906.

B. K. VENKATA VARADA IYENGAR,
*Secy. to the Govt of H. H. the Maharaja of Mysore,*
*Gen. & Rev. Dept.*

BEFORE THE GOVERNMENT OF HIS HIGHNESS
THE MAHARAJA OF MYSORE.

*Review Application No. 5 of 1905-06.*

*Petitioner.*—S. Shatagopa Iyengar, retired Head-quarter Inspector of Police, Bangalore.

*Subject.*

Prayer for the removal of the direction contained in Government Order No. 1606—P.F. 19-99, dated the 22nd February 1902, that the restoration to the petitioner of the Dharmadaya Inam land, Survey No. 84 of the Kogile village in the Bangalore Taluk, is subject to the condition that the deficient number of trees (111) on the Bangalore-Madras road is made good within the next six months.

*Decision.*

This is an application for a review of the Order of Government No. 1606-7—P. F. 19-99, dated the 22nd February 1902. The petitioner objects to the direction therein contained that the restoration of the Inam land in question to him is subject to "the condition that the deficient number of trees (111) is made good within the next six months." His contention is that under the terms of the Commissioner's Notification, dated 22nd July 1846, and of the order of 6th September 1865 granting the Inam, his obligation does not extend to a larger number of trees than 400. Government hold that this contention is entitled to prevail. The Notification of 1846 entitled the petitioner's father to an Inam of 12 pagodas for every 200 trees planted by him. He had planted 533 trees but the Deputy Superintendent recommended the grant to him of land assessed at only twenty-four pagodas "for 533 (trees) minus 133." This was sanctioned by the Chief Commissioner. The question is, not how many trees the grantee had actually planted but how many he was bound to plant and maintain. The latter was 400 and this number did, as a matter of fact, exist at the time of the Inam Settlement. The demand for an additional 111 trees so as to make up the 533, which existed at the time of the grant, was not justified by the Rules and could not consequently be properly enforced. This circumstance was lost sight of by Government when they authorized the restoration of the resumed Inam subject to the condition complained of. That condition is now removed and the order made absolute. The Deputy Commissioner's report shows that as many as 588 mature trees and thirty-seven plants are at present maintained by the petitioner. The petitioner's object then is clear that he is simply anxious that an additional obligation not in accordance with the terms of the grant should not attach to him and his descendants permanently for all time to come.

2. The grant was made up of eight kandis of land situate at Dyavasandra and four kandis at Kogile. The petitioner continues entitled to the whole of this extent. Under the Rules of 1874, some excess found in the lands of both villages was removed from his holding and otherwise disposed of. On the strength, however, of the subsequent Rules of 1891 as explained in Proceedings Nos. 2872-81—Cir. 28 and 16246-55—R. F. 295-92, dated the 19th May 1892 and 24th March 1893 respectively, certain other land was allotted to the petitioner under Proceedings No. 5130-2—R. F. 295-9, dated the 3rd December 1895, in lieu of the excess taken away from him in the Dyavasandra village. A similar treatment is now asked for by the petitioner and recommended by the Deputy Commissioner, in regard to the excess (Survey No. 82) in the village of Kogile. If under the Rules of 1891 and the explanatory orders of 1892 and 1893 the petitioner is entitled either to the grant of fresh land or to any other suitable relief, the Deputy Commissioner should submit definite proposals for the orders of Government in the Revenue Department.

Copy of the above is forwarded to the Deputy Commissioner of the Bangalore District, together with the records received with his letter No. S. 251, dated the 11th September 1905, for needful reference and resubmission with the report called for.

| Sreenivasiengar | | 1. Lingegowda (dead)<br>2. Ameer Sab. |

*Subject.*

Appeal against the Mysore Deputy Commissioner's order cancelling the sale for arrears of revenue of Survey No. 71 of Lakshampur village, Akkihebbal hobli of the Krishnarajpete Taluk.

The facts of the case appear sufficiently from the following:—

*Decision.*

The land in question stood registered in the name of one Lingegowda. A default in the payment of its assessment having occurred, a notice of demand was issued on the 10th of March 1903. The Khatedar was reported to be dead. The notice was served on the person said to be in possession, namely the 2nd respondent Ameer Sab, who, however, repudiated his liability on the ground that he had sold off the occupancy to one Chowrabi. But the latter's tenant and

representative, Gaffur Saib, declined to meet the demand on the ground that the land was still in the enjoyment of 2nd respondent Ameer Sab. The endorsement made to this effect bears *inter alia* the attestation of "Khatedar Linga." As the arrear remained undischarged, the land was forfeited and ordered to be sold. The sale took place on the 21st November 1903, with the result that the appellant became the purchaser. The sale was duly confirmed on the 25th April 1904 and possession given to the appellant on the 26th August 1904. In the meantime, *i. e.*, several months subsequent to the date of the sale, the patel received the arrears from the 2nd respondent in two instalments on the 13th March 1904 and 12th April 1904, respectively. On the representation of the 2nd respondent made on the 5th August 1904, the Deputy Commissioner set aside the sale on the 12th December 1904. Hence this appeal.

2. Government are clearly of opinion that there were no sufficient grounds to justify the cancelment of the sale. The Deputy Commissioner's order is based on certain irregularities which were either non-existent or immaterial. There can be no doubt that though not entitled to a notice, the 2nd respondent did receive one long before the date of forfeiture and sale. He then contested his liability by alleging a sale in favor of a third party. His subsequent action was a complete reputation of that contention. His explanation that he declined to pay under the impression that the demand related to some other land which he had conveyed to Chowrabi, cannot be accepted as satisfactory and must be rejected as an afterthought. Having been given an opportunity of satisfying the demand and deliberately and under a false pretext failed to avail himself of it, it was not afterwards opened to him to turn round and assert that he was entitled to have the sale cancelled inasmuch as the patel had received the arrear from him shortly before the date of confirmation of the sale. The patel knew that the sale had been held in November 1903. The receipt of payment by him from the 2nd respondent partly in March and partly in April following, was a wholly unauthorized proceeding which could not be relied upon as helping the 2nd respondent's case in any way. The objections taken to the sale were none of them worth serious consideration. The khist payable in February 1903 fell into arrears and the notice was issued in March 1903. The non-mention of the year after the month of default was too trifling an omission to merit any serious notice. The same remark applies to the omission of the date of service and the enjoyer's name in the patel's endorsement under the notice. The person "Khatedar Lingegowda" whose attestation appears under Gaffur Saheb's statement was presumably the deceased defaulting occupant's son and namesake. The genuineness of the statement is not disputed, and an unimportant and inadvertant misdescription of one of the attesting witnesses does not in any way affect the validity of the proceedings connected with the sale, when the 2nd respondent was not entitled to a notice of demand, much less was he entitled to have the sale proclamation served on him. The land being situate in a bechirakh village and the first sale having proved infructuous for want of bidders, the second sale impugned by the 2nd respondent was held in a populated village only a furlong or two from the first mentioned village. This surely was not so grave an irregularity as to warrant the cancelment of the sale. It is not seriously contended that there was a paucity of bidders in consequence of this change of *venue*. No importance deserves to be attached to the objection that the record makes no mention of the hours of the commencement and close of the sale. These observations dispose of nearly all the points urged in support of the Deputy Commissioner's order. There remains to be dealt with the single argument that the price realised at the sale was inadequate. This *per se* does not justify any interference with a sale held in accordance with law and long since confirmed and given effect to. In short, the sale was a perfectly valid transaction and the 2nd respondent has himself to thank for the loss of a land in which he seems to have had some interest which he could easily have protected if he had been so minded. His conduct disentitles him to any treatment of the kind shown to him by the Deputy Commissioner on grounds both insufficient and inadmissible.

3. Under these circumstances, the Deputy Commissioner's order will be reversed, and that of the Assistant Commissioner reaffirmed and restored.

*Memo No. R. 9559—R. M. 766-04-4, dated Bangalore, the 13th January 1906.*

Copy of the above is forwarded to the Deputy Commissioner of the Mysore District, together with the records received with his letter No. 337, dated the 19th September 1905.

*Subject.*

Appeal gainst the order of the Deputy Commissioner of the Tumkur District, cancelling the sale held for the arrears of revenue of Survey No. 3—2 of Nademavinapura Anehanta, Kunigal Taluk.

The facts of the case appear sufficiently from the following:—

*Decision.*

The land in question stood registered in the name of one Alasingrachar. A default having occurred in the payment of the assessment due thereon the land was forfeited and brought

to sale after due notice to the defaulting occupant. Before the date of sale, however, the Taluk authorities ascertained, with reference to previous correspondence, that the respondent was interested in the continuance of the occupancy. They accordingly sent him a copy of the order of forfeiture and of the notification of sale. Before these could be returned, however, a sale was held with the result that the defaulter's son, the appellant, became the purchaser. Within a few days after the sale and long before action could be taken in regard to its confirmation, the respondent appeared before the Amildar and paid up the full amount of the arrears due. The Amildar was of opinion that the sale had been brought about by a fraud on the part of the defaulter and his son, and that the respondent had a valid grievance. The Deputy Commissioner accepted this opinion and refused to confirm the sale. Hence this appeal.

2. Admittedly the respondent had paid the kandayam of certain previous years. He had also, in May 1904, applied to have his name entered in the register maintained for the purpose under Rule 40 of the Rules under the Land Revenue Code (*vide* application produced before Government by the respondent). That application though duly stamped with the Court-fee of one rupee, was returned on the ground that it had not been accompanied by a fee of one rupee in cash. Whether this was correct or not, it is clear that the Taluk authorities knew that the respondent had an interest in the land and had paid its assessment in previous years. It was for this reason that they sent him certain processes. Having done so, they should have waited until the return of those processes, duly served. The sale was a suspicious transaction. It was not confirmed and given effect to. The appellant has no valid complaint. Government see no reason to interfere with the Deputy Commissioner's order appealed from.

3. Under these circumstances, Government direct that the appeal be rejected.

Claim in respect of vacant Government land No. 149 of Kasba Kolar.

The facts of the case appear sufficiently from the following :—

*Decision.*

A piece of land belonging to the appellant was acquired in 1895 by payment of compensation and added on to the bed of the Kolar Amanikere tank. In 1903, the respondent applied for a portion of it on the ground that it was not actually within the water-spread of the tank. This allegation was on inspection ascertained to be a fact. There was thus nothing to prevent the land being duly assessed and granted for cultivation. In exercise of the discretion vested in him by Rule 41 of the Land Revenue Rules, the Deputy Commissioner granted the occupancy to the Respondent on payment of a price fixed by him. The appellant subsequently asked that the land be given to himself in preference to the respondent. This the Deputy Commissioner declined to do. Hence this appeal. Government are not prepared to hold that the Deputy Commissioner exercised his discretion so unjudiciously and arbitrarily as to call for their interference. The grant has already been given effect to. The appellant has no claim properly called. The Deputy Commissioner might have given him the first refusal or ordered a public sale, but he was not bound to do so. Government are not satisfied that sufficient grounds exist for the cancellation of a grant formally made and duly effectuated.

The appeal fails and is accordingly rejected.

*Proceedings of the Government of His Highness the Maharaja of Mysore.*

READ—

(1) Letter No. 283, dated the 11th September 1905, from the District Magistrate of Hassan, to the Secretary to the Government of His Highness the Maharaja of Mysore, General and Revenue Department :—

"1. I have the honor to state that on the night of the 3rd April 1905, Mr. A R. Park of Batchanhalla estate, President of the Mysore Game and Fish Preservation Association in Manjarabad Taluk of this district, furnished information to the Hanbal Police Station that some persons were illegally fishing at the junction of the Waddanhalla stream near Handigoanahalli estate of the same taluk. Constable Dasi of the Hanbal Police Station at once proceeded to the spot and seized a creel, a woman's cloth and some fish and brought the same to the Police Station along with the accused persons, Krishne Gowda and four others. On the following day Police dafadar Shek Davood, who had by that time returned to the Police Station, went to the Waddanhalla stream, saw that two dams had been constructed across in the stream in the water of which he found some powdered root of "*Arakalberu*" presumed to be a poisonous substance which he secured and drew up a Mahazar regarding these particulars. The said dafadar after completing the investigation of the case lodged a formal complaint against the abovenamed accused persons before the Amildar and 2nd Class Magistrate of Manjarabad Taluk, charging them for contravention of Rule 4 of the Rules framed under the Mysore Game and Fish Preservation Regulation, II of 1901, being an offence punishable under Section 8 of the said Regulation.

2. The Amildar-Magistrate after examining the witnesses for the prosecution and after record of the statements of the accused 1 to 4, acquitted all of them under Section 245, Criminal Procedure Code, being of opinion that the acts of the accused did not constitute any contravention of the Rules framed under the Regulation.

3. It is apparent from the statements of the accused persons 1 to 3 that they admitted that on the night of the 3rd April 1905 they went to the Waddanhalla stream for the purpose of fishing, that the woman's cloth and the creel found in the river and seized by the Police belonged to the 3rd accused Subbegowda, that they had tied the woman's cloth across the stream and had fixed the creel in the river and that there were some ten or twelve fish in the creel. In the face of the prosecution evidence and such admissions of the accused 1 to 3, the Amildar-Magistrate concluded (1) that the action of the accused did not constitute any offence since the stream flowed from west to east joining the Hemavati River which ultimately joins the river Cauvery, (2) that the offence was not committed during the "close season;" (3) that fishing was not prohibited in the said Waddanhalla stream; and (4) that the flaked root called "Arakalberu" was not proved by any evidence of the prosecution to be a poisonous substance or that it was put into the water of the halla by the accused persons.

4. I may here point out that the basis of the prosecution was not that the accused persons were fishing during "close season" but that they were fishing by prohibited or illegal means. Hence the Amildar-Magistrate's findings on the 1st, 2nd and 3rd points were quite irrelevant to the case.

5. Although the Amildar-Magistrate held that the flakes of the root called "Arakalberu" were not proved by the prosecution to be poisonous substance to constitute a contravention of Rule 4, still he entirely overlooked the provision contained in the same Rule 4 framed under the Regulation, forbidding the capture or destruction of fish in any stream by "the setting of fixed engines," in which expression the construction of dams across the stream, tying of the woman's cloth across the stream, and fixing the creel against it so as to present its mouth to the current of the stream and thus to catch fish in it, must be presumed to be included. If so, whether such means of fishing be employed during "close season" or not, is quite immaterial and would equally amount to a contravention of Rule 4 punishable under Section 8 of the Regulation. The prosecution evidence and the admissions of the accused 1 to 3 clearly proved such contravention against them and the purport of the Police dafadar's written complaint presented to the Magistrate and his sworn statement thereon clearly included such contravention of Rule 4 which was particularly quoted by him in the written complaint.

6. From the foregoing it is apparent that the Amildar-Magistrate's finding that the accused persons had not committed any contravention of Rule 4 punishable under Section 8 of the Regulation, resulting in his order of acquittal of the accused persons under Section 245, Criminal Procedure Code, and return of the creel and the cloth to the 3rd accused, was illegal and arose out of a mistake or evasion of law.

7. Accordingly I made a reference to the Chief Court on the above facts under provision of Section 439, Criminal Procedure Code, submitting the entire records of the Case No. 98 of 1904-05 on the file of the Amildar and 2nd Class Magistrate of Manjarabad Taluk for orders, whereupon the Chief Judge in Criminal Revision Case No. 10 of 1905-06 on the file of the Chief Court of Mysore, passed the following order :—"The attention of the District Magistrate is drawn to the provisions of Sections 439 (5) and 417, Criminal Procedure Code. The remedy sought should be by way of appeal by Government, not by way of review."

8. I may point out that owing to the forested and very intersected nature of the malnad tracts of Manjarabad Taluk and as the villages in those parts are few and far between, the chances of detection of such illegal fishing by the villagers are very few, as the difficulty

of watching such extensive areas of intersected and unfrequented country is very great. And when a *prima facie* case had been made out against the accused persons both by the evidence of the prosecution witnesses and the admissions of the accused persons themselves, the effect of an acquittal of the accused persons by the Magistrate is calculated not only to embolden them to recklessly commit similar offences in future and thus defy the authority of law itself, but also to have no deterrent effect against other persons similarly disposed to commit such offences.

9. Hence it appears obvious to me that there has been a clear miscarriage of justice by an improper acquittal in this case which is one of sufficient importance calculated to affect subsequent prosecution in cases of this nature, as may be seen from a copy of the letter of the Honorary Secretary of the Mysore Game and Fish Preservation Association herewith forwarded.

10. In accordance with instructions conveyed in Government Proceedings No. J. 3354-63—C. 162-2, dated 22nd May 1905, calling attention to para 2 of the previous Government Proceedings No. Camp 2391-400, dated the 25th January 1888, I made a reference to the Government Advocate at Bangalore to favor me with his opinion as to the fitness of moving Government to sanction an appeal against the order of acquittal being preferred in this case to the Chief Court of Mysore under provision of Section 417, Criminal Procedure Code.

11. I herein enclose a copy of letter No. 46, dated 9th September 1905, this day received in reply from the Government Advocate, from which it may be seen that he is of opinion that the case is a fit one for appeal.

12. I therefore request that you will be so good as to obtain sanction of Government to instruct the Government Advocate to prefer an appeal to the Chief Court of Mysore under provision of Section 417, Criminal Procedure Code, against the order of acquittal of the accused persons under Section 245, Criminal Procedure Code, passed by the Amildar and 2nd Class Magistrate of Manjarabad Taluk.

13. The entire records of Criminal Case No. 98 of 1904-05 on the file of the Amildar and 2nd Class Magistrate of Manjarabad Taluk, together with a certified copy of his judgment, dated 31st May 1905, referred to in the concluding paragraph of the Government Advocate's letter No. 46, dated the 9th instant, are also herewith submitted for favor of forwardal to the Government Advocate, should Government accord sanction to preferring the appeal to the Chief Court of Mysore."

(2) Government Proceedings No. J. 988-9—C. 91-2, dated the 30th September 1905, instructing the Government Advocate to prefer an appeal to the Chief Court against the order of acquittal of the accused persons, passed by the Amildar-Magistrate of the Manjarabad Taluk in the said case.

(3) Correspondence ending with letter No. 120, dated the 12th December 1905, from the Government Advocate in Mysore, stating that the Chief Court in Criminal Appeal No. 90 of 1905-06, set aside the order of acquittal of three of the four accused persons and sentenced them to pay a fine of Rs. 2 each.

(4) The Judgment passed by the Chief Court in the above appeal :—

*Thursday, the 23rd day of November 1905.*

Appeal against the order of acquittal passed by the Amildar-Magistrate of Manjarabad Taluk in Criminal Case No. 98 of 1904-05.

This appeal coming on for hearing on Wednesday the 22nd day of November 1905, the Court pronounced the following—

*Order.*

* There is no proof that the accused placed the powder of the plant in water or that it is poisonous or otherwise deleterious. But the accused admit having fixed a basket for catching fish against the stream and lain watching near the place throughout the night. This comes under the prohibition against the setting of fixed engines for the capture or destruction of fish contained in Rule 4 (Notification 9007—Legis. 56, dated the 11th December 1901). We find the three accused persons, Krishna Gowda, Vasantha and Subbe Gowda, guilty under this provision and sentence them each to a fine of Rs. 2 under Section 8 of the Game and Fish Preservation Regulation.

*No. J. 1882-91—Cts. 91-05-7, dated Bangalore, 9th January 1906.*

ORDER THEREON.—Circulated among the Deputy Commissioners with a request that early and wide publicity be given to the judgment by circulars addressed to all patels and by *tom-tom* in the villages, as there is ground to believe that the mode of catching fish in the manner referred to in the judgment is practised generally by villagers and professional fishermen.

1. From the 1st of July 1904, the pay of the shekdars shall be Rs. 35 for the first class, Rs. 30 for the second and Rs. 25 for the third.

2. The number of the shekdars shall be 374, and their number in each class shall not exceed the following proportion :—

Twenty per cent of the total number in the first class, *i.e.*, 75 at Rs. 35 each.

4. Every shekdar shall keep a decent riding pony, and spend at least twenty days in every month on tour in his hobli.

In exceptional cases, however, Government reserve to themselves the power of directing that a candidate after appointment but prior to confirmation, be allowed to obtain either of the qualifications mentioned in clause (*c*) or clause (*d*) or both, of Rule 6.

8. As it is necessary that a person so appointed should be trained in practical surveying before he is confirmed and actually put upon the duties of shekdar, the following course of instruction is prescribed :—

9. In the case of candidates who are already in the service of Government, or who have been nominated as fit for the post of shekdar under these rules by the Deputy Commissioners of Districts or the Revenue Commissioner, and to whom it has been considered expedient to allow the benefit of the proviso to Rule 7, an allowance of one-half of the pay of such shekdars shall be granted during the period of their stay, not exceeding one term, in the Engineering School at Mysore to qualify themselves, as required in clause (c) of Rule 6, and they shall be admitted to the Engineering School as free scholars. ## MYSORE CITY IMPROVEMENT TRUST BOARD.

Proceedings of an Ordinary Meeting of the Board of Trustees for the Improvements of the City of Mysore, held at the Chairman's Office on Wednesday the 27th December 1905.

Mr. D. Sitarama Rao, Chairman.

TRUSTEES.

,, M. Anantharajaiya.
,, M. Venkatakrishnaiya.
,, M. C. Ranga Iyengar.

*Absent.*

Dr. P. S. Achyuta Rao.
Mr. C. Venkata Rao.

*Subjects.*

I. Letter No. 276 of 4th December 1905, from the Vice-President, Mysore City Municipality, forwarding copy of docket No. 5544-Ml. (236-05)-4 of the 27th November 1905, from the Secretary, General and Revenue Department, *in re* the cost of countergrading the Purnaiya's Nalla in Mysore.

*Resolutions.*

*Resolved* that the Chairman be requested to intimate to Government that the Board is prepared to undertake the work at any time on funds becoming available; but that without a special grant it will not be possible to carry it out before the close of the present financial year.

| *Subjects.* | *Resolutions.* |
|---|---|
| II. Docket No. 5922—Ml. (266-05)-5 of the 5th instant, enquiring, with reference to Gowramma's petition, why the portion of the petitioner's property measuring 8'×18' that remains after acquiring a portion of the same, *i.e.*, 4'×18' for widening the conservancy lane should not be given over to her. | *Resolved* that the Chairman be requested to inform Government that the locality concerned is highly congested and insanitary, and that the handing over of the remainder of the site to the petitioner for her to build on (as it is known she intends to do), will be most objectionable, and will form a bad precedent when similar cases occur elsewhere. The "Building Bye-law" No. 11 provides that no building is to be allowed in *Extensions* on sites measuring less than 30'×50'. It is not possible to enforce this rule in the City, but the Board consider that they should be allowed discretion in dealing with sites, which, like the one in question, are obviously too small to admit of the erection of a sanitary dwelling. |
| III. General and Revenue Secretary's Official Memorandum No. 6130—Ml. (309-05)-2 of the 9th instant, forwarding for report a petition from the residents of Dodda Vakkalagere, Mandi Mohalla, Mysore City, about the acquisition of their houses for the construction of an Industrial School, and reply thereto. | Recorded. |
| IV. Letter dated 11th December 1905, from Mr. A. Lacey, Bangalore, soliciting a trial of one of his patent Septic Tank Latrine at a cost of Rs. 2,537-12-0. | *Resolved* that the Chairman be requested to experiment with one or two latrines on Mr. Lacey's pattern, and report the result to the Board. |
| V. Application, without date, from merchant Sileman Shooker Sait *alias* Buddu Sait, requesting that a portion of the land belonging to the old Sayer Cutcherry, now demolished, measuring 50' × 110' that remains vacant after using the portion required for the conservancy lane may be sold to him. | *Resolved* that Government may be asked whether there is any objection to the Board disposing of the site. |
| VI. Disposal of tenders for laying pipes in connection with the water-supply to the New Idiga Extension, direct from the Service Reservoir. | *Resolved* that the contract be given to Fathe Khan, who makes the lowest tender, and who is known to be a satisfactory contractor. |

D. SITARAMA RAO,
*Chairman.*

No. 6.—Complaints regarding non-receipt of the Gazette should be forwarded to the undersigned within a week after the date on which it is due.

No. 7.—Copy is sometimes sent to the Press late on Wednesday evenings for publication in the next day's Gazette. This involves considerable inconvenience to the Press and expense to Government. It is therefore notified that all matter intended for publication in Parts II, III and IV should reach this office not later than Tuesday evening; and that for Part I not later than the forenoon of Wednesday, for the following Thursday's issue of the Gazette.

No. 8.—It is requested that Departments will refrain from sending to the Press any matter for publication as extremely urgent later than 12 noon on Tuesdays, when such matter can without inconvenience be held over for the next week's Gazette.

No. 9.—Spare copies of notifications, etc., are often asked for long after their publication, when the matter has been broken up, necessitating its resetting, causing inconvenience to the Press and waste of money. It is therefore requested that when spare copies are wanted, a note to that effect, stating the number of copies, be made at foot of such notification, etc.

No. 10.—If no instructions, either at foot of notifications, or separately by docket, accompany any matter, it will be printed in the language in which it is written, and published only once.

License required for transport of arms, etc.

5. No arms or ammunition or military stores shall be transported in any part of Mysore without a license in Form I appended to these Rules. The license will be granted by the Magistrate of the district. If the articles are to be consigned to a place beyond the jurisdiction of the officer granting the license, the consent of the Magistrate of the district to which the consignment is made must be obtained before the license is issued. Such consent may be obtained by the person applying for the license, or the District Magistrate to whom application for the license is made may forward the proposed license to the officer whose consent is required, and on receiving a reply should either issue the license to the applicant, or inform him that his application for a license to transport arms, etc., has been refused. Consignments to be marked.

6. Every consignment of arms or ammunition or military stores transported in any part of Mysore by railway on lines within the jurisdiction of His Highness the Maharaja of Mysore shall be conspicuously

marked with the words "Arms," "Ammunition" or "Military Stores," as the case may be, in such a manner as to be readily recognizable by the Railway authorities. A copy of the license to transport the articles shall be attached to the way bill when the consignment is booked as a parcel, and to the invoice when booked as goods, and no consignment shall leave the railway premises without the contents being verified and compared with the license by the Railway Police at the place of delivery. Telegraphic advice of every such consignment shall be sent to the receiving station by the Railway authorities at the forwarding station.

Transport by persons entitled to possess arms.

7. Persons lawfully entitled to possess arms, or to go armed, are permitted to transport, in any part of Mysore, arms or ammunition in reasonable quantities for their own use. Any person abusing this exemption and transporting such articles otherwise than in reasonable quantities for his own use, will be held to have contravened this rule, and will, on conviction, become liable to the penalties under sections 13 and 14.

*Note.*—A cooly or servant carrying a packet properly secured and addressed to an exempted person so long as he travels with it on the direct route from the licensed dealer's premises or a railway station to the residence of such exempted person will be held to require no license provided that the exempted person is responsible for the conduct of the cooly or servant he employs and that the cooly or servant himself does not deviate from the direct route.

8. A person licensed to possess arms, ammunition or military stores, or who is exempted from the liability to take out such a license, is entitled to transport to his residence, from the premises of a licensed dealer, arms, ammunition or military stores without a separate transport license, so long as the articles purchased are in reasonable quantity and for his own use. A licensed dealer in arms, ammunition and military stores may supply the order of any such person, and may, without a separate transport license, send or despatch, in any way desired, to the residence of the purchaser, the articles ordered by any such person, so long as they fulfil the requirements of Rule 7, and are legibly addressed to the person for whom they are intended.

Restrictions to which transport license is subject.

9. A license to transport arms or ammunition or military stores is void, if the consignment breaks bulk at any place short of the district for which it may be granted. A license to transport shall ordinarily not be made valid for more than twice the period actually required for the conveyance of the articles to their destination by the intended route.

Application for transport-license.

10. Persons desirous of transporting arms, ammunition or military stores must apply in writing to the officer authorized to grant transport licenses from the place of despatch. The application must specify—

(*a*) the place to which the articles are to be transported, the route of transport, and the probable time that will be occupied in the journey;

(*b*) the quantity, description, average price, and the purpose of each kind of arms or ammunition;

(*c*) whether the applicant desires that the officer to whom he applies should obtain the consent of the Magistrate of the place of consignment; (if the applicant has obtained such consent, the evidence of such consent must be produced);

(*d*) in the case of breech-loading rifles and balled rifle ammunition, whether the previous sanction of the Government has been obtained.

Contents of packages to be marked.

11. Persons transporting arms, ammunition or military stores under a license must write legibly on the cases or packages containing such articles an account of their contents.

Procedure on arrival of articles at destination.

12. Within six days of the articles reaching their destination, the consignee must deliver the transport license to the Magistrate of the district, who must satisfy himself that the articles transported to his district correspond with the entries in the license, and that any deficiency is properly accounted for.

*Manufacture and sale.*

Licenses to manufacture, convert, keep and sell.

13. Licenses to manufacture, convert, keep and sell arms or ammunition or military stores may be granted by the Magistrate of the district or by the Magistrate of a sub-division of the district. They shall be in Forms II and III appended to these Rules. The fee, payable in stamps, shall be twenty rupees in respect of licenses to manufacture, convert and sell, and ten rupees in respect of licenses to keep and sell. Every license-holder under this rule shall keep, in such form as the Government may from time to time direct, registers of all arms manufactured or converted, of all ammunition and military stores manufactured, of all stock in hand, and of all sales. He shall exhibit his stock and his registers on demand by any Magistrate, or by any Police officer not below the rank of Inspector. Magistrates and all Police officers not below the rank of Inspector are hereby empowered to enter and inspect any premises within their several jurisdictions in which arms or ammunition or sulphur are manufactured, or kept, and to examine the stock and accounts of receipts and sales of arms, ammunition and military stores. Every person licensed to sell arms and ammunition shall affix a signboard on a

conspicuous part of his shop or usual place of business, and shall cause to be painted thereon in large letters in English, or in Kannada, his name and the words "licensed to manufacture," or "licensed to deal in arms, ammunition and military stores," as the case may be. He shall also post up in his shop a copy of section 23 of the Mysore Arms Regulation in Kannada or in English.

Notwithstanding anything contained in this Rule, a person holding a license under the Mysore Explosives Regulation, II of 1888, endorsed in accordance with Rule 42 of the Rules thereunder, to manufacture, possess and sell, or to possess and sell, explosives, may be granted *free of all charge* a license for the same period in Form II or Form III, respectively, in regard to ammunition or military stores which are not explosives.

14. Licenses to manufacture, convert, keep and sell arms or ammunition issued under Rule 13 shall exclude by specific and express condition, (1) the manufacture and conversion of breech-loaders and (2) the use of parts of British Military weapons (whether condemned or not) in any process of manufacture and conversion.

*Possession of arms and going armed.*

Licenses to possess arms and go armed sport, etc.

15. Licenses to possess arms and ammunition in reasonable quantities and to go armed for purposes of sport of protection, or of display, may be granted by the Magistrate of the district or by the Magistrate of a sub-division of the district in Form IV. Such a license shall be liable to a fee of four annas for each weapon; and will authorize the holder to carry the arms described in it on occasions when they may be reasonably required for the purposes named in the license. But the holder, unless specially authorized by the Magistrate, must not go armed in railway carriages, or to fairs, religious processions, or other public assemblages. Licenses granted under this rule shall, on countersignature by the Secretary to Government in the General Department, or other officer authorized in this regard by the Government, be valid for such districts as may be specified by the countersigning officer.

Licenses to go armed on a journey.

16. The Magistrate of the district or the Magistrate of a sub-division of the district may grant a license in Form V for a journey, specifying the direction of the journey, and the period it will occupy. Such license will be valid in other jurisdictions only for such journey and for such period, and will be liable to a fee of four annas for each weapon. Holders of licenses under this rule, unless specially authorized by the officer granting the licenses, must not go armed in railway carriages, or to fairs, religious processions, or other public assemblages.

When such Magistrate receives an application for a license in Form V from a person who is not resident within his jurisdiction, or is not personally known to him, he shall, before granting the license, ascertain from the Magistrate of the district or sub-division of the district in which the applicant resides, whether there is any objection to the grant of the license, unless for reasons to be recorded, he considers this precaution to be clearly unnecessary.

Licenses to possess arms.

17. Licenses to *possess* fire-arms or ammunition or military stores may be granted by the Magistrate of the district or sub-division of the district in Form VI without fee, and shall be valid for five years. Such licenses will not authorize the holders to go armed or to carry arms. Licenses to possess *and carry* arms (Form IV) will be liable to fees as stated in Rule 15.

Licenses to possess and carry arms for destroying wild animals.

18. Licenses to possess and carry arms and ammunition may be granted by the Magistrate of the district or sub-division of the district in Form VII without fee, and for a term of five years, to persons who require arms for the destruction of wild animals which do injury to human beings, cattle, or crops. Such a license will be valid only in or on the immediate confines of the district for which it is granted. It will be subject to the conditions that the license and the weapon it covers are shown once a year, between the 15th November and the 31st December, to the nearest Magistrate; that the weapon becomes confiscated to Government directly it is sold or seized in execution of any debt; and that such weapon is carried only on occasions when it is to be used *bonâ fide* for the destruction of wild animals. Holders of licenses under this rule must not go armed in railway carriages, or to fairs, religious processions, or other public assemblages. If a gun covered by such license is lost or stolen, the license-holder shall at once give notice of the fact at the nearest Police Station.

Restriction as regards breech-loading rifles and balled rifle ammunition.

19. Licenses in Forms I, IV, V, VI and VII shall not, in the case of breech-loading rifles and balled rifle ammunition, be granted without the previous sanction of the Government.

Licenses for possession or transport of sulphur.

20. Licenses for the possession or transport of sulphur, proved to the satisfaction of Government to be intended only for *bonâ fide* medicinal, manufacturing or agricultural purposes, may be granted without payment of any fee. This concession does not extend to sulphur intended for the manufacture of gunpowder or of ammunition generally, as defined in Section 4 of the Mysore Arms Regulation.

*General.*

Fees how levied.

21. The fees leviable under these rules shall be taken in the shape of "impressed stamps." Ordinarily the applications for licenses or renewals of licenses shall be written on "impressed stamps" of value equal to the

amount of fee leviable in respect of such licenses or renewals, and the licenses will be issued on plain paper. But when the licenses themselves are written or printed on "impressed stamps," the applications may be on paper of the value hereinafter mentioned. When an application for a license is written on an "impressed stamp," and the license is refused, the value of the stamp will be refunded to the applicant.

Applications for licenses.

22. Applications for licenses in respect of which no fee is leviable, or regarding licenses printed on impressed stamps on which the full fee has been paid, shall be considered to be applications within the meaning of Schedule II, Article I, Clause (*a*), of the Mysore Court Fees Regulation, 1900, and shall bear a Court-fee stamp of one anna.

Period of currency of licenses.

23. All licenses under Rules 13 and 15 shall expire on the 31st December of the year for which they may be issued; licenses under Rule 18 shall expire on the 31st December of the fifth year of their currency. But the currency of a license may be renewed,—previous to its expiration, and on payment of a second fee,—by the same authority that granted it; provided always that, where a renewal of license is applied for as aforesaid, the period of its currency shall, whether the application is eventually granted or refused, be deemed to include the interval during which the application was pending disposal.

Grant of duplicates of licenses lost or destroyed.

24. When a license granted in accordance with these rules is lost or accidentally destroyed, a duplicate may be granted to the licensee on payment of the same fee as he paid on the original license, if not in excess of one rupee; and, in any other case, on payment of a fee of one rupee. Cultivators or other persons to whom licenses may have been granted without payment of any fee may obtain duplicates of such licenses, if lost or destroyed, free of all fee.

Conditions subject to which licenses are granted.

25. All licenses shall be given and held subject to the conditions endorsed on the reverse, and subject to these rules and to the provisions of the Arms Regulation. Where arms are intended to be employed in the pursuit of game, a separate license under the Mysore Game Regulation and Rules is necessary. Licenses under Rules 15 and 18 may also be granted subject to the observance of a close season in the pursuit of animals and birds that do not injure either men, or cattle, or crops and are not otherwise provided for. The limits of the close season will be decided by the Government, and the condition regarding such close season, if imposed, shall be endorsed on the reverse of the license.

Licenses to be produced on demand.

26. Any person holding a license, or acting under a license, granted in accordance with these rules, shall be bound to produce the same, when called upon to do so by any Magistrate or by any Police Officer in charge of a Police Station, or by any Police Officer of higher rank.

Language of licenses.

27. Licenses granted for use within a district shall be written or printed in Kannada. Licenses for use beyond the district where they may be granted shall be in English and may be in Kannada as well.

Scope of licenses.

28. A license granted under these rules will cover only the weapons or other articles and the person named therein, unless the officer granting a license under Rule 15 or 16 deems it expedient to include the retainers of any person named in the license; in such case, the entry on the face of the license shall declare how many and whose retainers are covered by the license. Joint licenses in the names of more than one person cannot be issued; every person seeking to possess or carry arms must take out a separate license.

Powers of officers empowered to grant licenses.

29. Any officer empowered to grant a license under these rules may, at his discretion, refuse to grant, to renew, or to consent to the issue of, a license, or may refer any application for the orders of the Government.

Certificates of exemption.

30. All persons exempted under Section 22 of the Regulation or Rule 1 of these rules are entitled on application to the Magistrate of the district tob e furnished with certificates of such exemption.

Subordination of officers.

31. All Magistrates and other authorities acting under these rules will perform their duties subject to the control of their executive superiors and of the Government.

*Proceedings of the Government of His Highness the Maharaja of Mysore.*

READ—

(1) Letter No. 283, dated the 11th September 1905, from the District Magistrate of Hassan, to the Secretary to the Government of His Highness the Maharaja of Mysore, General and Revenue Department:—

"1. I have the honor to state that on the night of the 3rd April 1905, Mr. A. R. Park of Batchanhalla estate, President of the Mysore Game and Fish Preservation Association in Manjarabad Taluk of this district, furnished information to the Hanbal Police Station that some persons were illegally fishing at the junction of the Waddanhalla stream near Handigoanahalli estate of the same taluk. Constable Dasi of the Hanbal Police Station at once proceeded to the spot and seized a creel, a woman's cloth and some fish and brought the same to the Police Station along with the accused persons, Krishne Gowda and four others. On the following day Police dafadar Shek Davood, who had by that time returned to the Police Station, went to the Waddanhalla stream, saw that two dams had been constructed across in the stream in the water of which he found some powdered root of "*Arakalberu*" presumed to be a poisonous substance which he secured and drew up a Mahazar regarding these particulars. The said dafadar after completing the investigation of the case lodged a formal complaint against the abovenamed accused persons before the Amildar and 2nd Class Magistrate of Manjarabad Taluk, charging them for contravention of Rule 4 of the Rules framed under the Mysore Game and Fish Preservation Regulation, II of 1901, being an offence punishable under Section 8 of the said Regulation.

2. The Amildar-Magistrate after examining the witnesses for the prosecution and after record of the statements of the accused 1 to 4, acquitted all of them under Section 245, Criminal Procedure Code, being of opinion that the acts of the accused did not constitute any contravention of the Rules framed under the Regulation.

3. It is apparent from the statements of the accused persons 1 to 3 that they admitted that on the night of the 3rd April 1905 they went to the Waddanhalla stream for the purpose of fishing, that the woman's cloth and the creel found in the river and seized by the Police belonged to the 3rd accused Subbegowda, that they had tied the woman's cloth across the stream and had fixed the creel in the river and that there were some ten or twelve fish in the creel. In the face of the prosecution evidence and such admissions of the accused 1 to 3, the Amildar-Magistrate concluded (1) that the action of the accused did not constitute any offence since the stream flowed from west to east joining the Hemavati River which ultimately joins the river Cauvery, (2) that the offence was not committed during the "close season;" (3) that fishing was not prohibited in the said Waddanhalla stream; and (4) that the flaked root called "Arakalberu" was not proved by any evidence of the prosecution to be a poisonous substance or that it was put into the water of the halla by the accused persons.

4. I may here point out that the basis of the prosecution was not that the accused persons were fishing during "close season" but that they were fishing by prohibited or illegal means. Hence the Amildar-Magistrate's findings on the 1st, 2nd and 3rd points were quite irrelevant to the case.

5. Although the Amildar-Magistrate held that the flakes of the root called "Arakalberu" were not proved by the prosecution to be poisonous substance to constitute a contravention of Rule 4, still he entirely overlooked the provision contained in the same Rule 4 framed under the Regulation, forbidding the capture or destruction of fish in any stream by "the setting of fixed engines," in which expression the construction of dams across the stream, tying of the woman's cloth across the stream, and fixing the creel against it so as to present its mouth to the current of the stream and thus to catch fish in it, must be presumed to be included. If so, whether such means of fishing be employed during "close season" or not, is quite immaterial and would equally amount to a contravention of Rule 4 punishable under Section 8 of the Regulation. The prosecution evidence and the admissions of the accused 1 to 3 clearly proved such contravention against them and the purport of the Police dafadar's written complaint presented to the Magistrate and his sworn statement thereon clearly included such contravention of Rule 4 which was particularly quoted by him in the written complaint.

6. From the foregoing it is apparent that the Amildar-Magistrate's finding that the accused persons had not committed any contravention of Rule 4 punishable under Section 8 of the Regulation, resulting in his order of acquittal of the accused persons under Section 245, Criminal Procedure Code, and return of the creel and the cloth to the 3rd accused, was illegal and arose out of a mistake or evasion of law.

7. Accordingly I made a reference to the Chief Court on the above facts under provision of Section 439, Criminal Procedure Code, submitting the entire records of the Case No. 98 of 1904-05 on the file of the Amildar and 2nd Class Magistrate of Manjarabad Taluk for orders, whereupon the Chief Judge in Criminal Revision Case No. 10 of 1905-06 on the file of the Chief Court of Mysore, passed the following order:—"The attention of the District Magistrate is drawn to the provisions of Sections 439 (5) and 417, Criminal Procedure Code. The remedy sought should be by way of appeal by Government, not by way of review."

8. I may point out that owing to the forested and very intersected nature of the malnad tracts of Manjarabad Taluk and as the villages in those parts are few and far between, the chances of detection of such illegal fishing by the villagers are very few, as the difficulty

of watching such extensive areas of intersected and unfrequented country is very great. And when a *prima facie* case had been made out against the accused persons both by the evidence of the prosecution witnesses and the admissions of the accused persons themselves, the effect of an acquittal of the accused persons by the Magistrate is calculated not only to embolden them to recklessly commit similar offences in future and thus defy the authority of law itself, but also to have no deterrent effect against other persons similarly disposed to commit such offences.

9. Hence it appears obvious to me that there has been a clear miscarriage of justice by an improper acquittal in this case which is one of sufficient importance calculated to affect subsequent prosecution in cases of this nature, as may be seen from a copy of the letter of the Honorary Secretary of the Mysore Game and Fish Preservation Association herewith forwarded.

10. In accordance with instructions conveyed in Government Proceedings No. J. 3354-63—C. 162-2, dated 22nd May 1905, calling attention to para 2 of the previous Government Proceedings No. Camp 2391-400, dated the 25th January 1888, I made a reference to the Government Advocate at Bangalore to favor me with his opinion as to the fitness of moving Government to sanction an appeal against the order of acquittal being preferred in this case to the Chief Court of Mysore under provision of Section 417, Criminal Procedure Code.

11. I herein enclose a copy of letter No. 46, dated 9th September 1905, this day received in reply from the Government Advocate, from which it may be seen that he is of opinion that the case is a fit one for appeal.

12. I therefore request that you will be so good as to obtain sanction of Government to instruct the Government Advocate to prefer an appeal to the Chief Court of Mysore under provision of Section 417, Criminal Procedure Code, against the order of acquittal of the accused persons under Section 245, Criminal Procedure Code, passed by the Amildar and 2nd Class Magistrate of Manjarabad Taluk.

13. The entire records of Criminal Case No. 98 of 1904-05 on the file of the Amildar and 2nd Class Magistrate of Manjarabad Taluk, together with a certified copy of his judgment, dated 31st May 1905, referred to in the concluding paragraph of the Government Advocate's letter No. 46, dated the 9th instant, are also herewith submitted for favor of forwardal to the Government Advocate, should Government accord sanction to preferring the appeal to the Chief Court of Mysore."

(2) Government Proceedings No. J. 988-9—C. 91-2, dated the 30th September 1905, instructing the Government Advocate to prefer an appeal to the Chief Court against the order of acquittal of the accused persons, passed by the Amildar-Magistrate of the Manjarabad Taluk in the said case.

(3) Correspondence ending with letter No. 120, dated the 12th December 1905, from the Government Advocate in Mysore, stating that the Chief Court in Criminal Appeal No. 90 of 1905-06, set aside the order of acquittal of three of the four accused persons and sentenced them to pay a fine of Rs. 2 each.

(4) The Judgment passed by the Chief Court in the above appeal :—

*Thursday, the 23rd day of November* 1905.

PRESENT.

Mr. Justice A. Rangasami Iyengar, Judge, and
Mr. Justice H. V. Nanjundayya, Judge.

*Criminal Appeal No.* 90 *of* 1905-06.

| The Government of Mysore by Mr. S. Narayana Rao, Government Advocate. | | 1. Krishne Gowda. 2. Vasanta. 3. Subbe Gowda. |

Appeal against the order of acquittal passed by the Amildar-Magistrate of Manjarabad Taluk in Criminal Case No. 98 of 1904-05.

This appeal coming on for hearing on Wednesday the 22nd day of November 1905, the Court pronounced the following—

*Order.*

* There is no proof that the accused placed the powder of the plant in water or that it is poisonous or otherwise deleterious. But the accused admit having fixed a basket for catching fish against the stream and lain watching near the place throughout the night. This comes under the prohibition against the setting of fixed engines for the capture or destruction of fish contained in Rule 4 (Notification 9007—Legis. 56, dated the 11th December 1901). We find the three accused persons, Krishne Gowda, Vasantha and Subbe Gowda, guilty under this provision and sentence them each to a fine of Rs. 2 under Section 8 of the Game and Fish Preservation Regulation.

---

*No. J.* 1882-91—*Cts.* 91-05-7, *dated Bangalore, 9th January* 1906.

ORDER THEREON.—Circulated among the Deputy Commissioners with a request that early and wide publicity be given to the judgment by circulars addressed to all patels and by *tom-tom* in the villages, as there is ground to believe that the mode of catching fish in the manner referred to in the judgment is practised generally by villagers and professional fishermen.

The prices of the corresponding fortnight of last year were omitted to be shown in this statement owing to the closing of mandies on account of plague.

Prices of food grains have risen partly to the absence of rain and partly by the exportation of food staff to neighbouring towns.

B. K. VENKATA VARADA IYENGAR,
*Secy. to the Govt. of H. H. the Maharaja of Mysore,*
*Gen. & Rev. Dept.*

*Proceedings of the Government of His Highness the Maharaja of Mysore.*

READ—

(1) Letter No. 283, dated the 11th September 1905, from the District Magistrate of Hassan, to the Secretary to the Government of His Highness the Maharaja of Mysore, General and Revenue Department:—

"1. I have the honor to state that on the night of the 3rd April 1905, Mr. A. R. Park of Batchanhalla estate, President of the Mysore Game and Fish Preservation Association in Manjarabad Taluk of this district, furnished information to the Hanbal Police Station that some persons were illegally fishing at the junction of the Waddanhalla stream near Handigoanahalli estate of the same taluk. Constable Dasi of the Hanbal Police Station at once proceeded to the spot and seized a creel, a woman's cloth and some fish and brought the same to the Police Station along with the accused persons, Krishne Gowda and four others. On the following day Police dafadar Shek Davood, who had by that time returned to the Police Station, went to the Waddanhalla stream, saw that two dams had been constructed across in the stream in the water of which he found some powdered root of "*Arakalberu*" presumed to be a poisonous substance which he secured and drew up a Mahazar regarding these particulars. The said dafadar after completing the investigation of the case lodged a formal complaint against the abovenamed accused persons before the Amildar and 2nd Class Magistrate of Manjarabad Taluk, charging them for contravention of Rule 4 of the Rules framed under the Mysore Game and Fish Preservation Regulation, II of 1901, being an offence punishable under Section 8 of the said Regulation.

2. The Amildar-Magistrate after examining the witnesses for the prosecution and after record of the statements of the accused 1 to 4, acquitted all of them under Section 245, Criminal Procedure Code, being of opinion that the acts of the accused did not constitute any contravention of the Rules framed under the Regulation.

3. It is apparent from the statements of the accused persons 1 to 3 that they admitted that on the night of the 3rd April 1905 they went to the Waddanhalla stream for the purpose of fishing, that the woman's cloth and the creel found in the river and seized by the Police belonged to the 3rd accused Subbegowda, that they had tied the woman's cloth across the stream and had fixed the creel in the river and that there were some ten or twelve fish in the creel. In the face of the prosecution evidence and such admissions of the accused 1 to 3, the Amildar-Magistrate concluded (1) that the action of the accused did not constitute any offence since the stream flowed from west to east joining the Hemavati River which ultimately joins the river Cauvery, (2) that the offence was not committed during the "close season;" (3) that fishing was not prohibited in the said Waddanhalla stream; and (4) that the flaked root called "Arakalberu" was not proved by any evidence of the prosecution to be a poisonous substance or that it was put into the water of the halla by the accused persons.

4. I may here point out that the basis of the prosecution was not that the accused persons were fishing during "close season" but that they were fishing by prohibited or illegal means. Hence the Amildar-Magistrate's findings on the 1st, 2nd and 3rd points were quite irrelevant to the case.

5. Although the Amildar-Magistrate held that the flakes of the root called "Arakalberu" were not proved by the prosecution to be poisonous substance to constitute a contravention of Rule 4, still he entirely overlooked the provision contained in the same Rule 4 framed under the Regulation, forbidding the capture or destruction of fish in any stream by "the setting of fixed engines," in which expression the construction of dams across the stream, tying of the woman's cloth across the stream, and fixing the creel against it so as to present its mouth to the current of the stream and thus to catch fish in it, must be presumed to be included. If so, whether such means of fishing be employed during "close season" or not, is quite immaterial and would equally amount to a contravention of Rule 4 punishable under Section 8 of the Regulation. The prosecution evidence and the admissions of the accused 1 to 3 clearly proved such contravention against them and the purport of the Police dafadar's written complaint presented to the Magistrate and his sworn statement thereon clearly included such contravention of Rule 4 which was particularly quoted by him in the written complaint.

6. From the foregoing it is apparent that the Amildar-Magistrate's finding that the accused persons had not committed any contravention of Rule 4 punishable under Section 8 of the Regulation, resulting in his order of acquittal of the accused persons under Section 245, Criminal Procedure Code, and return of the creel and the cloth to the 3rd accused, was illegal and arose out of a mistake or evasion of law.

7. Accordingly I made a reference to the Chief Court on the above facts under provision of Section 439, Criminal Procedure Code, submitting the entire records of the Case No 98 of 1904-05 on the file of the Amildar and 2nd Class Magistrate of Manjarabad Taluk for orders, whereupon the Chief Judge in Criminal Revision Case No. 10 of 1905-06 on the file of the Chief Court of Mysore, passed the following order:—"The attention of the District Magistrate is drawn to the provisions of Sections 439 (5) and 417, Criminal Procedure Code. The remedy sought should be by way of appeal by Government, not by way of review."

8. I may point out that owing to the forested and very intersected nature of the malnad tracts of Manjarabad Taluk and as the villages in those parts are few and far between, the chances of detection of such illegal fishing by the villagers are very few, as the difficulty

of watching such extensive areas of intersected and unfrequented country is very great. And when a *prima facie* case had been made out against the accused persons both by the evidence of the prosecution witnesses and the admissions of the accused persons themselves, the effect of an acquittal of the accused persons by the Magistrate is calculated not only to embolden them to recklessly commit similar offences in future and thus defy the authority of law itself, but also to have no deterrent effect against other persons similarly disposed to commit such offences.

9. Hence it appears obvious to me that there has been a clear miscarriage of justice by an improper acquittal in this case which is one of sufficient importance calculated to affect subsequent prosecution in cases of this nature, as may be seen from a copy of the letter of the Honorary Secretary of the Mysore Game and Fish Preservation Association herewith forwarded.

10. In accordance with instructions conveyed in Government Proceedings No. J. 3354-63—C. 162-2, dated 22nd May 1905, calling attention to para 2 of the previous Government Proceedings No. Camp 2391-400, dated the 25th January 1888, I made a reference to the Government Advocate at Bangalore to favor me with his opinion as to the fitness of moving Government to sanction an appeal against the order of acquittal being preferred in this case to the Chief Court of Mysore under provision of Section 417, Criminal Procedure Code.

11. I herein enclose a copy of letter No. 46, dated 9th September 1905, this day received in reply from the Government Advocate, from which it may be seen that he is of opinion that the case is a fit one for appeal.

12. I therefore request that you will be so good as to obtain sanction of Government to instruct the Government Advocate to prefer an appeal to the Chief Court of Mysore under provision of Section 417, Criminal Procedure Code, against the order of acquittal of the accused persons under Section 245, Criminal Procedure Code, passed by the Amildar and 2nd Class Magistrate of Manjarabad Taluk.

13. The entire records of Criminal Case No. 98 of 1904-05 on the file of the Amildar and 2nd Class Magistrate of Manjarabad Taluk, together with a certified copy of his judgment, dated 31st May 1905, referred to in the concluding paragraph of the Government Advocate's letter No. 46, dated the 9th instant, are also herewith submitted for favor of forwardal to the Government Advocate, should Government accord sanction to preferring the appeal to the Chief Court of Mysore."

(2) Government Proceedings No. J. 988-9—C. 91-2, dated the 30th September 1905, instructing the Government Advocate to prefer an appeal to the Chief Court against the order of acquittal of the accused persons, passed by the Amildar-Magistrate of the Manjarabad Taluk in the said case.

(3) Correspondence ending with letter No. 120, dated the 12th December 1905, from the Government Advocate in Mysore, stating that the Chief Court in Criminal Appeal No. 90 of 1905-06, set aside the order of acquittal of three of the four accused persons and sentenced them to pay a fine of Rs. 2 each.

(4) The Judgment passed by the Chief Court in the above appeal :—

*Thursday, the 23rd day of November* 1905.

PRESENT.

Mr. Justice A. Rangasami Iyengar, Judge, and
Mr. Justice H. V. Nanjundayya, Judge.

*Criminal Appeal No.* 90 *of* 1905-06.

| The Government of Mysore by Mr. S. Narayana Rao, Government Advocate. | | 1. Krishne Gowda. 2. Vasanta. 3. Subbe Gowda. |

Appeal against the order of acquittal passed by the Amildar-Magistrate of Manjarabad Taluk in Criminal Case No. 98 of 1904-05.

This appeal coming on for hearing on Wednesday the 22nd day of November 1905, the Court pronounced the following—

*Order.*

* There is no proof that the accused placed the powder of the plant in water or that it is poisonous or otherwise deleterious. But the accused admit having fixed a basket for catching fish against the stream and lain watching near the place throughout the night. This comes under the prohibition against the setting of fixed engines for the capture or destruction of fish contained in Rule 4 (Notification 9007—Legis. 56, dated the 11th December 1901). We find the three accused persons, Krishne Gowda, Vasantha and Subbe Gowda, guilty under this provision and sentence them each to a fine of Rs. 2 under Section 8 of the Game and Fish Preservation Regulation.

*No. J.* 1882-91—*Cts.* 91-05-7, *dated Bangalore, 9th January* 1906.

ORDER THEREON.—Circulated among the Deputy Commissioners with a request that early and wide publicity be given to the judgment by circulars addressed to all patels and by *tom-tom* in the villages, as there is ground to believe that the mode of catching fish in the manner referred to in the judgment is practised generally by villagers and professional fishermen.

## EXPLANATORY MEMORANDUM ON THE CO-OPERATIVE SOCIETIES REGULATION III OF 1905.

1. *I. The Objects of Co-operative Societies.*—Attention is invited to the reference made to the new Regulation known as the Co-operative Societies Regulation, in the Dewan's Address to the Representative Assembly, which met in October last. This Regulation, as stated in the Address, is intended to be helpful to all classes of people for the furtherance of thrift and providence among them, and the means adopted is to be that of co-operation. The word co-operation, it may be stated, is used here not in the sense of mere association for any and every purpose, but in the somewhat restricted sense of association of a number of individuals for mutual profit, whether in the purchase and distribution of commodities for consumption, or in the production of commodities, or in the borrowing and lending of capital. Accordingly, the objects of Co-operative Societies have been specified in Section 3 of the Regulation as being the following :—

(1) The furtherance of thrift and providence among the members;

(2) the attraction of capital and the grant of credit to the members;

(3) the supply to members of raw material, seed or manure;

(4) the sale on behalf of members of agricultural produce or of manufactured goods;

(5) the manufacture of goods or growth of produce by the members co-operatively;

(6) the purchase of foodstuffs, clothing or other articles of consumption, or of animals, implements, or other stock required in agriculture or industry, and their retail sale to members;

(7) the purchase of machinery and its use in common by members;

(8) the building of houses or purchase of lands for members;

(9) the carrying out or development by joint action, of an improvement whether agricultural or industrial, or of any other object approved by Government.

2. Perhaps a word of explanation is needed regarding each of these objects. The importance of thrift and providence on the part of any individual needs no explanation, and especially are they needed in the case of the agriculturists and artizans who are now as it were, solitary units left to struggle against adverse circumstances as best as each could.

3. For purposes of business, it need scarcely be stated that credit is largely needed. The cultivating raiyats for instance, need loans for various purposes, such as (1) the purchase or improvement of land, (2) relief from prior debt, (3) the purchase of cattle, manure, seed, implements, (4) house-building, (5) advances in anticipation of the sale of produce, (6) maintenance, (7) payment of revenue or rent.

4. The raiyats, however, have now to pay heavy interest to their sowcars, not to speak of the fees they have often to pay their sureties or witnesses. These items go to reduce their profits to a material extent with little prospect thereby of their condition of hand to mouth living being bettered at any time. The temporary use even of a few rupees for the purchase say, of a bullock, may make all the difference as to whether or not a raiyat will be able to raise his next crop. As an isolated individual his credit is low and his security is uncertain, but as a member of a society he becomes known to others and his credit accordingly rises. A society can easily attract to its coffers by its united credit money which looks askance at individual security. As is well known it is not so much the lack of capital as the lack of credit that is in the way of business-people obtaining loans at a rate of interest which will not absorb the major portion of their profits. In the State Savings Banks there are nearly ninety lakhs of rupees which, it may be believed, if the requisite security was forthcoming would be diverted by their depositors to respond to the needs of the agriculturists and artizans instead of being as at present either locked up in Government of India Securities at small rates of interest or lying unfructuous in the State Treasuries. The need for societies which by their systematic and open modes of business and generally by their independence of the vicissitudes of individual members are able to inspire greater confidence and offer better security than individuals can hope to do, is therefore real and the question therefore deserves serious consideration.

5. In various other ways also the Co-operative Societies may make themselves useful to the members. Through the agency of societies, raw material, seed or manure may be procured at large quantities, thereby obtaining a reduction of price. The societies will also be in a better position to secure a guarantee of quality than unknown individuals with their small orders can hope to do. There is special difficulty at present in the employment of machinery. The small farmers and the smaller artizans find them either too costly for their means or that they have not enough work of their own. In such a case, a society may procure the machinery and let it out on hire, or enable the members to purchase on special terms. Then again, instead of each producer sending off his own particular lot as a separate consignment, the individual lots may be clubbed together as far as their qualities permit and through the agency of the societies, lesser transport charges incurred and better sales effected by obtaining command of wider markets. The societies may also serve as useful agents to advise the members as to the kinds

of produce most likely to find purchasers in outside markets, to give practical guidance in respect to growing, packing and despatch, to receive the produce at fixed centres, to supervise its storage and sale and remit the proceeds of such sale to the producers, less a small charge for expenses. A society after it is fairly well established, may even undertake the establishment of model peasant farms, equipped with the implements and stock considered to be most suitable for the needs of any particular locality. The societies may also organise periodical shows of agricultural and industrial produce and of stock, offer prizes for the efficient management of small allotments, and in other ways further the interests of their members.

6. *II. Success of Co-operative Societies elsewhere.*—Such is an outline of the scope of usefulness of these societies, and if carefully nurtured, there appears to be no limit to this usefulness. In Mysore, however, the small success that has hitherto attended the scheme of Agricultural Banks, may be cited as an instance of the difficulties in the way of the development of these beneficent institutions. There is no need to refer here to the causes of their failure, as they have all been analyzed in the addresses to the Representative Assemblies of the years 1901 to 1903. These causes, however, are not peculiar to Mysore and though they have operated in other countries also yet the scheme has ultimately succeeded after the application of proper correctives. In British India, after the introduction of the Co-operative Act, several societies have come into existence and are showing signs of growing life. If these institutions languish in Mysore the disappointing result cannot be attributed entirely to their own want of adaptability to their surroundings, for the conditions of Mysore, agricultural and industrial are not dissimilar to those of many parts of the Bombay and the Madras Presidencies. The past failures merely indicate the need in Mysore for fresh efforts and to such efforts the provisions of the Co-operation Regulation are specially helpful. To prove that efforts are worth being made, the success that has attended the movement in European countries may be cited. The following extracts from the article on Co-operative Societies in the Encyclopaedia Brittanica, Vol. XXVII, will bear out this statement.

"Irish co-operation is agricultural and dates from the foundation of one co-operative dairy in 1889. Thence has grown a movement already of great importance and rapidly spreading. In 1890 there was still only one such society; in 1891 there were seventeen, but on 31st December 1900 there were 412, of which 171 were dairies, 106 agricultural societies, seventy-six Banks. By August 1901 the societies numbered about 470 and the members about 54,000. The agricultural societies are chiefly engaged in buying farm requisites pure and cheap and retailing them among their members; in this way they have saved the farmers very large sums. Their trade is about £ 100,000. The Co-operative Banks are of the Raiffesen type and aim at providing the peasants with necessary capital and expelling the usurer. They are increasing rapidly. Among miscellaneous objects of co-operation are selling eggs, poultry, barley and pigs, joint ownership of machinery, joint grazing, potato spraying, producing flax, and so on; and these promise a great growth in number and variety. The dairy societies have federated into an agency for reaching the English market, and the agricultural societies into an Irish wholesale society for purchasing to the best advantage. Besides the direct profits and economies of these societies, they have greatly benefited Ireland by teaching men of all classes, parties and religions to act together for peaceful progress; they have led to a wide diffusion of better agricultural knowledge, and to the establishment by Government of the Agricultural Department.

"Turning abroad we find, in almost all civilized countries, important and growing movements roughly similar to those above described. The most prominent fact since 1877 is the great growth of agricultural co-operation from small dimensions, till it amounts to a great force, almost everywhere and in some countries to a revolution notably in Denmark, where almost every village is an example of varied co-operation. Agricultural co-operation is now the strongest branch of the movement in France, and its backbone are the agricultural syndicates or associations. These, though they began in 1883, numbered 1,500 in 1895, and now probably number 2,500 with 700,000 to 800,000 members.

"As part of agricultural co-operation we may reckon the development of an entirely new type of credit co-operation. The Schultze-Delitzsch credit societies are primarily town institutions, and while they have multiplied and grown great, and sometimes grown capitalistic, many thousands of country folk have learnt to bless the little Raiffeisen loan banks. Such a bank is an association of neighbours uniting to borrow a sum of money in order to lend it out as cheaply as possible in small sums to such of themselves as need loans. It also receives savings deposits, which often produce a large part or even all the capital the society needs to lend. Usually a few of the members are persons of rather more means than the others, and join to help their neighbours by increasing the society's credit. These have no special privilege, but by a common consent they usually take a leading part. Though co-operative credit societies are split up into innumerable groups, insisting on various minor modifications, and making various compromises between the two systems, these two types really include them all. They have spread from Germany into almost all European countries, even at last to Ireland and England besides America and Asia. In Germany, there were in March 1901 out of a total of 19,557 co-operative societies, 12,140 credit associations, and these lent out in 1900 more than £ 120,000,000. In Italy, Austria and Hungary, they are also strong. In 1896 it was estimated

that £ 150,000,000 a year must be very well within the total amount lent by money co-operation on the continent of Europe; £ 190,000,000 may be estimated for 1900.

"Among minor but still important developments may be mentioned the steady growth of co-operative production in France; the co-operative labour gangs or rather societies which undertake building and navying work in Italy; and the letting out of railway construction to co-operative groups of workmen in New Zealand and Victoria. It has been roughly estimated that altogether the members of one or other branch of co-operation number six millions representing with their families a population of twenty-five million people."

8. *III. Membership.*—Having explained, it is hoped, sufficiently clearly the objects of the societies as specified in the Regulation, some of its other provisions may now be taken up. The minimum number of members to form a society is fixed at ten who should all be above the age of eighteen years. It is essential for the proper development of mutual credit that the members of a society should exercise by means of personal acquaintance and moral pressure a mutual control over one another in their transaction with the society. In the report of the Committee on the establishment of co-operative credit societies in India, submitted to the Government of India, it was accordingly suggested that membership should be by election and should be limited to residents in the same town or village or group of villages. The Government of India in their resolution explaining the provisions of the Co-operative Act, have remarked upon this suggestion of the Committee that "there are communities among whose members a common organisation or common interests supply the place of propinquity of residence, and ensure the desired conditions. A compact and closely organised tribe or caste, a community such as is formed by the Native Christians attached to a particular mission, or even the employees on a given line of railway, are instances in point. The Act therefore empowers the Registrar to dispense with the residence test where he is satisfied that this may be safely done, if the society is to be confined to the members of a single tribe or class or caste." In the Mysore Regulation, no such restrictions have been introduced; nevertheless in enlisting its members, it is highly desirable that a society should keep the principles enunciated by the Government of India clearly in view. It should also be remembered that it is desirable that the admission of new members should not be made under an automatic rule, but that each new member must be accepted by the older ones or by the executive committee who represent them in accordance with the provisions of the regulation and with the by-laws of the society.

9. *IV. Liabilities of Members.*—Section 7 of the Regulation provides that the liability of each member of a society for the debts of the society shall be unlimited or limited as may be provided by the by-laws or by any rules framed under the regulation. Where the liability of a member is unlimited, he is, in case of a winding up of a society, liable to contribute without limit to discharge the debts of the society, but in societies limited by shares, a share-holder who has paid up the nominal amount of his shares is not liable for any further amount. The liability of a past member for the debts of the society as they existed at the time when he ceased to be a member, shall continue for a period of one year from the date of ceasing to be a member (section 17). Similarly the estate of a deceased member shall be liable for a period of one year from the time of his decease.

10. *V. Restrictions regarding number of shares and their transfer.*—To prevent a society from getting into the hands of only a few large shareholders to the prejudice of the interests of others, section 12, restricts the maximum number of shares to be held by a member, where the liability is limited, to one-fifth of the total number of shares, the nominal value of which is, without the express sanction of Government, not to exceed one thousand rupees. The restrictions contained in section 14 on transfer by a member of his share or interest in the capital of the society are also to be carefully noted. No such transfer can take place unless the share or interest to be transferred has been held by the member for one year at least. Where a transfer is allowed, it can only be to the society or to a member of the society, and subject to any conditions as to maximum holding. The object of these restrictions is, as stated in the resolution of the Government of India "to render impossible the acquisition by individuals of a predominent interest in such societies, to prevent speculation in connection with them, and to discourage those who might desire for reasons of personal profit to avail themselves of the facilities given by the Act to start banks for other ends than those for which these societies are intended."

11. *VI. Privileges granted to Co-operative Societies.*—The privileges granted to the societies are specially to be noted. In the first place, the share or interest of a member in the capital of a society is not liable to attachment or sale under any decree or order of a court of justice in respect of any debt or liability incurred by the member. Neither the official assignee nor a receiver appointed under Chapter XX of the Code of Civil Procedure is entitled to or has any claim on such share or interest (section 15). But a society has a charge upon the shares or interest in the capital and on the deposits of present and past members, and upon any dividend, bonus or profits payable to them in respect of any debts due from them to the society, and may set off for the purpose any sum credited or payable to such members (section 20).

12. (*a*) In the next place, except in respect of land revenue or any money recoverable as land revenue due to Government or in respect of rent or any money recoverable as rent due to

a land-lord, a society formed under the Co-operative Societies Regulation is entitled in priority to other creditors to enforce its claim

(1) upon the crops or other agricultural produce of present or past members at any time within a year from the date when seed or manure was advanced or money for their purchase was lent,

(2) upon any cattle, agricultural or industrial implements or raw material for manufactures, supplied by the society or purchased in whole or in part with money lent by the society (section 19).

(*b*) The societies have the benefit of a free audit of their accounts by the Registrar once at least in every year, including an examination of overdue debts if any, and a valuation of the assets and the liabilities of the society. It is also open to the Registrar, the Deputy Commissioner or any person authorized in this behalf by the Registrar or the Deputy Commissioner, to inspect at any time the books, accounts, papers and securities of a society (21-" 1 to 4").

(*c*) A certified copy of any entry in a book of any society regularly kept in the course of business is receivable in any suit to recover a debt due to the society to the same extent as the original entry itself is receivable under the existing law (section 22).

(*d*) The Government may exempt any society or class of society from local and general taxes, from stamp duty on instruments and from payment of fees under the Registration Act (section 25). Under Section 6, cl. (5) no charge is made for the registration of the society itself.

13. *VII. Restrictive conditions to ensure efficacy of management.*—In consideration of the special privileges which, as above stated, have been accorded to the Co-operative Societies, certain restrictions have been placed, intended for their more efficacious management A sum which is to be not less than one-fourth of the profits in each year of every society, unless otherwise directed by Government by special order in any particular case, is to be carried to a fund (to be called the Reserve Fund) before any dividend or payment on account of profits is paid to the members (section 8).

Secondly, a society may receive deposits from members without restriction, but it may borrow from persons who are not members only to such extent and under such conditions as may be prescribed in that behalf.

Thirdly, a society can make no loan to any person other than a member, but with the consent of the Registrar, it may make loans to any other society.

Fourthly, a society may deposit its funds in the Government Savings Bank but if it wishes to do so with any banker or with any other person, it can only do so with the approval of the Registrar.

14. *VIII. Caution regarding loans on the security of movable or immovable property.*—A word of explanation is necessary regarding the power reserved to Government in section 10 (2) to prohibit or restrict by general or special order the lending of money on the security of movable or immovable property or any kind thereof by any society or class of society. In the Government of India Act power is given to the Registrar to allow any society which he thinks, can safely be trusted, to advance money upon jewellery. In the Mysore Regulation no distinction is maintained between movable and immovable property and unless prohibited or restricted by Government, a society is not debarred from making advances of money on their security. There are practical difficulties, however, in connection with the custody and valuation of jewellery. When, as stated in the Government of India resolution, a rural society is located in a town or large village, with silversmiths available, with a ready market at hand, and with members and officers of intelligence, it may safely be trusted to conduct transactions which might be dangerous in the case of a more strictly rustic association, which has no such facilities. In the case of mortgages, the considerations are still more difficult. "On the one hand, one of the methods in which an involved cultivator can most effectively be assisted is by enabling him to substitute a mortgage upon reasonable for one upon exorbitant terms; and a member who is refused the credit to which his property in land fairly entitles him, merely because he is not allowed to hypothecate it to the society, may be driven to the money-lender for a loan, which, had it not been for the prohibition, he might have taken from the society with advantage to both parties. On the other hand, it is exceedingly inadvisable that these societies should be allowed to lock up their limited capital in a form in which it is not readily available; their most useful form of business will probably be small loans for short periods with prompt recoveries; and it is above all things desirable that they should keep out of the law courts." Hence, it is necessary that special care should be exercised by the societies in advancing money on the security of jewellery or on mortgages.

15. *IX. Conclusion.*—Such are the main objects and scope of this new Regulation which, if rightly worked, is expected to introduce a highly beneficial change in the agricultural and industrial economy of the country. The Regulation is specially intended for the benefit of the

rural classes to whom credit, as has been already stated, is essential to conduct their business and to develop it. The Co-operative Societies under the Regulation have been taken out of the operation of the general law on the subject, and have been accorded special privileges and facilities, in order to encourage their formation and assist their operations. Since they enjoy exemption from the general law and have also facilities of a special nature, particular care is necessary to prevent abuse on the part of any possible speculators availing themselves of the privileges under colourable pretexts.

A set of by-laws is appended to serve as a model. These by-laws may be adopted with such variations as the circumstances of individual societies necessitate.

BANGALORE,
*7th February* 1906.

B. K. VENKATA VARADA IYENGAR,
*Secy. to the Govt. of H. H. the Maharaja of Mysore,*
*Gen. & Rev. Dept.*

## BEFORE THE GOVERNMENT OF HIS HIGHNESS THE MAHARAJA OF MYSORE.

*Appeal No.* 34 *of* 1905-06.

| Appellants | | Respondent |
|---|---|---|
| A. Bhima Rao and other raiyats of Holalvadi, Nanjangud Taluk | *Versus* | K. Narasimhaiya, shop-keeper, Mysore City. |

*Subject.*

Claim respecting the occupation of Government waste or vacant land Survey No. 1 of Holalvadi village in the Nanjangud Taluk.

The facts of the case appear sufficiently from the following :—

*Decision.*

Survey No. 1 is a kharab or unassessed waste, being part of the bed of an old abandoned tank. It adjoins the village site. From the commencement, it was being used for such communal purposes as the storage of manure, etc. A small quantity of water sometimes stands on the low lying portion of it and it has been long used by the cattle of the village. Some years back, the applications of certain persons for the grant of the land for cultivation, seem to have been rejected after duly considering the objection taken to the same by the raiyats of the village (*vide* Amildar's report dated the 25th October 1901). In August 1900, a similar application made by one Muddappa was rejected by the Deputy Commissioner. In reporting upon that petition, the Amildar expressed the opinion that the land should not be given out for cultivation. Subsequently, there were several petitions from several individuals asking that portions of the land be given to them for building and kindred purposes. The Amildar, with the concurrence of the villagers, was in favor of the grant and submitted a recommendation accordingly. During the pendency of the correspondence on the subject, the respondent asked that the whole number be given to him for garden cultivation, for the small upset price of Rs. 20 per acre in consideration of the loss he had sustained in connection with certain other lands which in previous years he had purchased for large sums at revenue sales. The villagers objected to the grant thus applied for. The Amildar and the Assistant Commissioner nevertheless recommended the grant. They knew at the time that the villagers would be subjected to serious discomfort and inconvenience if the land were given away to an outsider for cultivation. They also knew of the existence of the previous darkhasts. In the face of this and of their belief that if put up to competition the land would realise a much higher price than the nominal price offered for it by the respondent, they chose to consider that the objection taken by the villagers should be over-ruled, and that the respondent's application should be favorably dealt with. The Deputy Commissioner in reliance upon their opinion wrote to the Revenue Commissioner recommending the grant. The Revenue Commissioner thought that the price offered was too low. He further seemed to think that the villager's objection based upon the absence of gomal was not wholly without force. Under the circumstances represented to him, however, he saw no reason to withhold the sanction applied for which accordingly he conveyed on 22nd May 1905. This sanction was passed on to the Amildar for needful action on 7th June 1905. The Amildar accepted the price from the respondent on the 16th idem, and on the same date issued to him a saguvali chit pending the assessment being fixed in due course by the Survey Department. This was done in spite of the pendancy of two petitions from one Bhima Rao, dated 21st and 25th April 1905, in which he had referred to the several previous darkhasts both from himself and from other individuals and not only protested against the grant to the respondent then under contemplation but also offered to take the land himself on the same terms as those offered by the respondent. He even asked that the land be sold by auction if it could not be given to him for an upset price. The local authorities had evidently made up their minds that the respondent should be given the land on favorable terms to the prejudice of the villagers and the exclusion of the prior darkhastdars. In this they were solely influenced by their estimate of the loss which the respondent had sustained in connection with certain other sales. The one had nothing whatever to do with the other and yet the respondent was shown a concession to which he was not reasonably entitled. As soon as the villagers became conversant of what was going on, they hastened to the Deputy Commissioner with a protest on which that officer passed the following order on the date of the saguvali chit itself. "As there appears to be something in this objection, the order already issued (*i. e.*, the order intimating the Revenue Commissioner's sanction) will be held in abeyance if not given effect to, pending inspection of the land, one day next week." This order does not appear to have been formally communicated to the respondent. The Deputy Commissioner inspected the land a few days after, *i. e.*, on the 29th June, and on the next day he passed an order as follows:—"I inspected this land yesterday and find that I was misled regarding it, as it is really required for village purposes, storage of manure, and extending the village at any future time, and that it should not have been given out for cultivation. As however orders have already been received from the Revenue Commissioner on the subject on my recommendation, I am unable to move further in the matter and the only course left is for the petitioners to apply to the Revenue Commissioner to revise his order." The Revenue Commissioner, who was thereupon appealed to, informed the petitioners (appellants) that "as the sanction for the

grant of the land for cultivation purposes was accorded from his office, they (petitioners) should appeal to Government." Hence the present appeal, immediately on the institution of which, *i. e.*, on the 5th August 1905, Government passed an order that further proceedings should be stayed and that if the respondent had been put in possession he should be directed not to interfere with the land pending the disposal of the appeal.

2. It is abundantly clear from the Deputy Commissioner's orders quoted above and from his report, that he was misled into making a serious mistake which he is anxious to see rectified. The land according to him is fit for building purposes. That was also the opinion of a former Amildar who had reported upon the antecedent darkhasts to which reference has already been made and which were ignored in dealing with the respondent's darkhast. The village is a large one and appears to stand in real and urgent need of extension. By its situation, the land in question is admirably suited for the location of such extension. The respondent's contention that another land equally eligible is readily available for the purpose, is clearly untenable as will be seen from an order passed by the Amildar on the 25th December 1900, rejecting one Narasanna's darkhast for the land (No. 164 measuring only one acre and twenty-three guntas) on the ground that there was a temple on it, and that moreover a fair was being held on it every year. It is unsatisfactory that on a ground manifestly inadmissible, the local authorities thought it proper to ignore all previous correspondence and to prefer an outsider like the respondent to both the villagers generally and the previous applicants in particular. The needs of the village failed to receive from them the consideration to which they were undoubtedly entitled. Though not ear-marked and formally set apart for communal purposes, it is obvious that no assessment was fixed on the land which, being then a kharab, was for a long time being used by the villagers for the common benefit, such as storage of manure and straw, cattle-stand, cattle-pond, etc. The higher portion is suitable for building purposes and the lower for collection of water for cattle. The correspondence shows that the latter was intended to be excluded and reserved, but even this was not done. This is not an occupied waste, and its disposal ought not to have been ordered as a routine matter and without proper enquiry. The grant is liable to be set aside on sufficient cause shown. Government are satisfied that this is a case in which authorities below did not evince a judicious discretion and that their interference is imperatively called for and should not be refused. The Deputy Commissioner himself is of that opinion and Government have no hesitation in agreeing with him. The cancelment of the grant made to the respondent so as to render possible the reservation of the land for communal purposes, is the only order which the Government consider proper under the circumstances. There were several applicants of whom the respondent was the last. A grant to the latter for an upset price much below the market value, was a proceeding for which there was no justification. A public sale was a more correct proceeding. And even this was extremely undesirable in view of the fact that a reservation was necessary in the interests of the village.

3. The respondent poses as a seriously aggrieved party in that he asserts that he has *bonâ fide* spent such a considerable sum as Rs. 1,500 on improvements. This assertion is wholly without foundation. He knew that his application was being strenuously opposed by prior applicants as well as by the villagers. On the date of the Amildar's permit itself, the Deputy Commissioner placed on record his opinion that there was something in the objection and that the matter should be further investigated. The respondent could not have been unaware of this though a formal intimation of it was somehow not sent to him. Within a fortnight of the grant, the Deputy Commissioner inspected the land and expressed his opinion against the propriety of the grant. Government decline to believe that the respondent remained in ignorance even of this. The Deputy Commissioner's report shows that up to that date, no improvements of any kind had been carried out by the respondent. Between that date and the date of the interdiction issued by Government, some little work seem to have been done by the respondent, not in good faith but in order to make out a grievance for himself. The mahazar prepared at the Sheristadar's inspection of 20th August 1905 clearly shows that beyond hurriedly getting some pits dug and plantain plants put in, at a cost of about Rs. 100, the respondent had done nothing whatever to the land by way of improvement or preparation, and that even this small cost had only been incurred by him within the preceding twenty days. The matter was *pendentelite* and the respondent at his own risk endeavoured to manufacture a claim for himself in the hope of being thus enabled to successfully resist the case made against him. There was no *bonâ fide* improvement and consequently no compensation is claimable.

4. For the foregoing reasons the grant relied upon by the respondent is cancelled, thus setting free the land for appropriation for non-agricultural purposes in the manner suggested by the Deputy Commissioner.

*Subject.*

Appeal against the order of the Deputy Commissioner of the Mysore District, rejecting the claim of the appellant to Survey No. 74 of Desahalli village in the Mandya Taluk held to belong to Government and confirming the darkhast sale thereof to the respondent.

The facts of the case appear sufficiently from the following :—

*Decision.*

Land No. 74 was an assessed waste. Its total extent is one acre and thirty guntas, of which thirty guntas were dealt with as kharab owing to the existence of a disused katte on the land. It would appear that one Nanjundaiya applied for the land at the time of the Survey Settlement but that the Settlement officer ordered that the katte should be inspected after the ensuing rains before granting the land for cultivation. Nanjundaiya repeated his application in 1888 but the then Amildar rejected it on the grounds that the katte still retained a small quantity of water, that the unarable portion exceeded the arable portion and that it was fit for a sandal plantation. This reservation was not, however, made under authority nor was entered in the village accounts. In November 1900, the respondent presented a darkhast for the land. As directed by the Amildar, the land was inspected and reported upon by the shekdar who after consulting the villagers, gave it as his opinion that the katte was quite out of order and scarcely retained any water for the use of men or cattle and that there was no objection to the land being granted for cultivation. The Amildar thereupon ordered the sale of the land in due course. After publicity given in the manner prescribed by law, a sale was held on 13th January 1901 at which the respondent became the purchaser. A large number of persons were present at the sale which, however, owing to the existence of pits on the land and the costly nature of the work to be done to render the land fit for cultivation, did not attract a higher bid than Rs. 2-4-0 offered by the respondent. After making a personal inspection and satisfying himself that the sale was above-board, the Amildar confirmed the sale and issued a saguvali chit on the 10th May 1901. Several months afterwards, *i.e.*, in January 1902, the appellant complained to the then Sub-Division Officer Mr. Venkat Rao, that the sale was a fraudulent transaction, that in holding it the Amildar's previous order of 1888 had been wilfully ignored, and that the katte standing on the land was his own property having been originally constructed by one of his ancestors. He further alleged that the price realized was wholly inadequate. Mr. Venkat Rao in calling for a report directed the suspension of cultivation pending orders on the appellant's protest. The Amildar in reporting upon the case expressed the opinion that the sale having been regularly held and duly given effect to, there were no grounds for any interference with it. He also stated that the appellant had made out no title either to the land or to the katte on it, and that his (appellant's) cupidity had been excited by the costly improvements which the purchaser had effected after he had obtained possession in pursuance of the sale. Mr. Venkat Rao thereupon, *i. e.*, on 16th May 1902, declined to interfere. He did not however communicate this order to the appellant who consequently again petitioned him on the subject in June following. The matter was once again referred by him to the Amildar for inspection and report. About that time there was a change of Amildars, and the new Amildar after seeing the land and holding an enquiry, reported *inter alia* that the appellant had failed to substantiate his title, that the patel's denial of all knowledge of the sale was untrustworthy, that considering the initial cost involved, the price realized could not be said to be too low, but that the sale must be pronounced irregular since the extent mentioned in the several papers concerned was one acre only while including the katte the area of the number was one acre and thirty guntas. He seemed to think, judging from the difference in area, that the katte had been excluded without the formality of a phode or sub-division. On 19th November 1902, the Sub-Division Officer (Mr. Dorasami Iyer) cancelled the grant, thus superseding the orders of his predecessor. He was of opinion that the katte was useful to the public and that the sale was brought about by a fraud practised by the respondent, who as a shanbhog could not have been unaware of the proceedings of 1888 but who nevertheless suppressed the same so as to enable his darkhast to succeed. The respondent appealed on 19th December 1902, and the then Deputy Commissioner Mr. Ramanujaiengar in calling for record directed that the Sub-Division Officer's order should be held in abeyance pending the disposal of the appeal. The record was received in January 1903 but the appeal was not heard until 24th July 1905 on which date Mr. Sparkes held that the land had been properly sold and that Mr. Dorasami Iyer's order could not be sustained. Hence this appeal.

2. Government agree with the Amildars who dealt with the case and with Mr. Sparkes in holding that the appellant has not established his title to the katte in question. The katte is a neglected pond much silted up and quite out of repair. It is evident that it is of no use whatever to the villagers or their cattle. The land was not classed as kharab at the Survey Settlement, but on the contrary it was dealt with as an assessed waste with a deduction under kharab on account of the existence of a katte on it. The direction that the land should be inspected after the rains before granting it for cultivation shows that there was no intention to

refuse the grant unless the katte filled so as to useful to the public and overflowed so as to render the land unfit for cultivation. The Amildar's order of 1888 was one of questionable propriety. That the katte then contained a small quantity of water, was not a sufficient justification for the reservation of the land, nor the fact that a good bit of the land was unarable, nor that the land was an eligible one for a sandal plantation. The Amildar exceeded his powers in directing on his own responsibility the reservation of a land which had been duly assessed to revenue by the Survey Department. That being so, there was nothing to prevent the darkhast of 1900 being entertained, investigated, and disposed of on its own merits and irrespective of what had transpired in 1888. Local inspection both by the shekdar and by the Amildar coupled with the statement of a large body of the villagers, left no room for doubt that the katte was not only not private property but was also practically useless, and that the land was one which should be disposed of under the darkhast rules. The record connected with the sale as well as the subsequent correspondence further shows that the land was far from attractive in the condition in which it stood at the time of sale, that the bid obtained was a fair one, that there was no secrecy or fraud and that there was absolutely no reason why the formal confirmation of the sale should be withheld. The difference in area was made too much of in the Amildar's report of 1902. There was no need for any sub-division. The exclusion instead of the inclusion of the phut kharab in the papers was an unimportant error which in no way effected the sale or the proceedings connected with it. Government have no hesitation in holding that the sale was rightly confirmed and given effect to by the Amildar in 1901 and that it should not have been set aside by the Sub-Division Officer in 1902.

* * * * *

The case however is a very simple one and there can be but one conclusion, *viz.*, that the appellant has no valid grievance and that the Deputy Commissioner's order must be affirmed.

3. The appeal thus fails and must be rejected.

Claim to the pateli office of Jodi Handalagere village in the Kunigal Taluk.

The facts of the case appear sufficiently from the following :—

*Decision.*

The appellant's father Timmegowda and the respondent and one Chennegowda are the sons of one Karegowda who held the pateli in dispute until his death which took place some time before the year 1877. No successor having been formally appointed to the deceased, Timmegowda and the respondent divided the work between themselves and continued to perform the same until 1901 when the former died. Since then the respondent alone has been in sole possession of the office. He possesses in his own right a substantial share in the village besides paying a large amount of kandayam. Another individual who owns half the village is agreeable to his appointment, and so too his brother Chennegowda. The appellants on the other hand seem to be less respectable and efficient. Under these circumstances, the Deputy Commissioner has conferred the vacancy on the respondent who as already observed was in joint possession for some twenty-five years and in sole possession for two or three years. The family has not been deprived of the office which has only been given to the second son on the ground *inter alia* of his being in every way more competent and acceptable than the sons of the first son. Government consider that the arrangement made by the Deputy Commissioner is unexceptionable and ought not to be interfered with.

2. The appeal fails and is accordingly dismissed.

*Subject.*

Appeal against the order of the Deputy Commissioner of the Bangalore District, declining to permit the appellants to continue to cultivate certain lands of Chikmalur village in the Channapatna Taluk, on the ground that the said lands had been treated as kharab at the time of the Survey Settlement and included into the tank bed of the adjoining Inam village of Kudlur in the said taluk.

The facts of the case appear sufficiently from the following :—

*Decision.*

This is a very simple case. The appellants owned certain lands in the Sirkar village of Chikmalur. At the Survey Settlement these and certain other lands were found to be within the level line of the tank of the neighbouring Inam village of Kudlur. They were thereupon classed as kharab and included in the tank bed. The appellants nevertheless continued to cultivate their lands. For so doing they were found fault with and fined. This was in 1894-95. They have since been persistently complaining against this treatment. There was a difference of opinion as to whether the lands were really within the water spread of the tank. Several inspections were made and in the result both the Revenue and Public Works officers were of opinion that though not altogether outside the water line there was nothing to prevent the lands being permitted to be cultivated as usual when no water was standing thereon. The Deputy Commissioner did not however see his way to grant the appellants any relief. Hence this appeal.

2. There can be no doubt that the lands in question are situate in a Sirkar village, and that the appellants held the same for several decades before the Survey Settlement. That being so the summary eviction of the appellants is a proceeding for which there can be no justification. Nor can they be interdicted from enjoying the lands in such manner as they might find possible so long as the right of occupancy remains unacquired from them either by private negotiation or in accordance with law.

3. Under these circumstances Government direct that the lands be allowed to remain in the appellants' undisturbed possession to be enjoyed by them as best they can and on payment of such assessment as may be fixed by the Survey Department, until duly acquired from them for inclusion in the tank bed.

Appeal against the order of the Deputy Commissioner of the Hassan District, dismissing the appellant's suit filed to establish his claim to the registry of the shanbhogi baraward in his name, of either of the two circles of Jakkanahalli and Agile in the Hassan Taluk.

The facts of the case appear sufficiently from the following :—

*Decision.*

The plaintiff (appellant) and the father of the defendant (respondent) were brothers, being the sons of one Subraya who was the registered shanbhog of Agile and certain villages until his death which took place in the year 1847. The defendant's father being the eldest son of the deceased was appointed as his successor in 1848. In consequence however of his incapacity, the office was as a matter of fact held by the appellant until the former's death which

occured in 1872. Even subsequently the appellant continued to be in possession both at the Potigi Settlement of 1882 and for twelve years afterwards. During all this time the register nominally stood in the name of the defendant's father. At the settlement above referred to, the villages in question were formed into two circles called Agile and Jakkanahalli. The appellant was doing the duties of both until 1894, when it was decided that he should hold only one namely Jakkanahalli, and surrender the other (Agile) to the respondent. The register of both was nevertheless made out in the name of the respondent alone, and the appellant was referred to a regular suit. The present suit has accordingly been instituted. It must be noted that the appellant has another or younger brother by name Seshagiraiya. Both the Assistant Commissioner and the Deputy Commissioner have dismissed the suit on the ground that Seshagiraiya is as much entitled to a share as the appellant and that the villages cannot be re-distributed so as to form three circles in place of the two constituted at the Potigi Settlement. The Deputy Commissioner differring from the Assistant Commissioner has further held that the suit is governed by the six years rule and is consequently barred by limitation. Hence this appeal.

2. The respondent's contention was that the shanbhogi in dispute was his father's self acquisition, having been reacquired by him in 1848, that is, some years after the previous officiator's dismissal in 1826. This he failed to substantiate and the authorities below have correctly found with reference to the documentary evidence on record that the shanbhogi is an ancestral and hereditary office. As already observed, the appellant was in possession of all the villages from 1872 to 1894 and he continues to this day in the enjoyment of such of them as are included in one of the two circles which for administrative convenience were constituted at the settlement of 1882. His case is then clearly distinguishable from that of the third brother Seshagiraiya whose possible claims should not have been imported into this suit and relied upon as an argument against the admissibility of the appellant's claim. Of the three brothers, the eldest was the nominal barawarddar, the second was for several decades the real officiator and the third has apparently never had anything to do either with the office or with the duties appertaining to it. That being so, there is nothing to prevent one of the two circles being adjudged by name as well as in reality to the appellant and the other being allowed to remain in the name and possession of the respondent. No question of division or re-distribution really arises in this case.

3. Having allotted one of the circles to the appellant and the other to the respondent the register should have as a matter of course followed that arrangement instead of the appellant being relegated to a regular suit in 1894. That was a needless technicality and does not prejudicially affect the claims of the appellant who continues to be in the enjoyment of the circle (Jakkanahalli) then assigned to him. All that the appellant wants is an official recognition of his status as the shanbhog of the said circle. Both the circles cannot be held by a single individual. Hence the disposal of one of them in favor of the respondent and of the other in that of the appellant. To enable the registry being made out accordingly there was really no need for a formal suit; such being the view that Government entertain of the case, it is clear that the refusal of the appellant's prayer on the ground of limitation cannot be supported.

4. Neither the existence of a third brother nor the question of limitation thus stands in the way of the appellant being registered as the shanbhog of the circle of which he is in charge.

5. For the above reasons the appeal is allowed and the relief asked for by the appellant granted.

Claim to the shanbhogi office of Hebbari and other villages in the Chintamani Taluk.

The facts of the case appear sufficiently from the following :—

*Decision.*

This is an appeal from an order of the Deputy Commissioner declining to recognize the appellant's claim to the office of shanbhog of Hebbari and certain other villages in the Chintamani Taluk. The appellant is the son of one Venkatachellaiya who was removed from the office in 1891 on a charge of embezzlement. Considering the enormity of the offence the order of dismissal contained a direction that the family should for ever be debarred from holding the office and that a competent person unconnected with it should be appointed to succeed. In persuance of that order, the respondent was first appointed on probation and then confirmed.

2. In 1899, the case came up before Government on an appeal from one Timmarayappa who endeavoured to oust the respondent on the grounds, firstly that he had himself a preferential claim as the descendant of one Shamanna who had been removed in 1854 before the appointment of Venkatachellaiya and secondly that the respondent being the son-in-law of Venkatachellaiya and as such closely connected with his family, his appointment was opposed to the orders of 1891 and could not be supported. Government held that the respondent should be allowed to hold the office during his life time and that Timmarayappa's claim should be taken into consideration on the occurrence of a vacancy.

3. Subsequently, the respondent was for sometime improperly getting the duties of the office performed for him by his brother-in-law the present appellant. When this was brought to notice, the Deputy Commissioner in concurrence with the Assistant Commissioner in charge of the taluk directed that the unauthorized and irregular arrangement should immediately cease, and that if the respondent did not himself enter upon the duties of the office within a month the question of his displacement by Timmarayappa should receive attention. The appellant urged his own claim independently of his relationship to the respondent, but this was disallowed. He now contends that his father's dismissal and the forfeiture of the family hak were ordered on insufficient grounds and that the question should now be fully gone into and the Deputy Commissioner's order of 1891 set aside. Government decline to accede to this contention which is as unreasonable as it is belated. The record shows that the appellant's father helped himself to a large sum of Government money, that he was nevertheless very leniently dealt with in consequence of his old age, and that for years afterwards no action was taken either by him or by any member of his family to have the order then passed, cancelled. The respondent ought not to have been suffered to officiate by proxy, and to that proxy being none other than the son of the dismissed shanbhog himself, there were most serious objections. The conduct of the respondent was highly reprehensible. If tolerated, it would practically nullify the punishment awarded to the erring shanbhog and his family in 1891. The respondent seems to favor the cause of his brother-in-law the appellant. This is not as it should be, and it can under no circumstances justify the restoration to the latter of an office which so far back as 1891, he was by a distinct order passed in strict accordance with rules debarred from succeeding to. Government have no hesitation in holding that the Deputy Commissioner's order appealed from is correct and that there are no grounds for interference with it.

4. The appeal fails and is accordingly rejected.

Application for review of Government Order No. 1315—P. F. 152-03, dated the 20th April 1904, confirming the sale held for arrears of revenue of lands Survey Nos. 37 and 38 of Attikodagi village in the Koppa Taluk.

*Order.*

The petitioner was the purchaser of a portion of the lands in question from the 2nd counter-petitioner. Though thus interested in the continuance of the occupancy, he failed either to obtain a transfer of the khate in his name or to get his name entered in the special register maintained for the purpose nor did he take steps to see that the assessment did not fall into arrears. Though not entitled to a notice, it is evident from the record that he had ample notice of the sale proceedings from first to last, of which however he wilfully failed to take advantage. His subsequent assertion that he had been misled into the belief, that what was being forfeited and sold was some other land of the khatedar in which he possessed no interest, was clearly an afterthought and must be rejected as wholly incredible. He would not meet the demand though he had an abundant opportunity of doing so. On the contrary he wished it to be satisfied either by his vendor the 2nd counter-petitioner or by his mortgagee the 4th counter-petitioner. No such payment having been made, the lands were sold in strict accordance with law. The petitioner is not entitled to have that sale set aside. That being so, Government see no reason to reconsider the order sought to be reviewed. This application is therefore rejected.

Appeal against the order of the Deputy Commissioner of the Kolar District, directing the grant of Survey No. 28 (kharab) of Kolar kasba to the respondent in lieu of some other lands of his submerged by the raising of the weir of Kolar Amanikere, the appellants contending that it should be reserved for public use.

The facts of the case appear sufficiently from the following :—

*Decision.*

Certain lands belonging to the respondent were resumed from him and included in the bed of the Kolar Amani tank. Instead of compensation the respondent asked for and obtained in exchange a small bit of kharab land so far back as July 1901. This land was duly assessed by the Survey Department in February 1902. The respondent has since been in possession. Some three and a half years after the grant of the land to him, the appellants objected to the grant on the ground that there was a pond on the land which was useful not only to the travelling public but also to themselves. The Deputy Commissioner (Mr. Puttanna Chetty) declined to interfere with the grant which had been made by his predecessor (Mr. Carr) in 1901. Hence this appeal.

2. The so called pond or well is a mere pit on account of the existence of which this small piece of land was shown as kharab or unassessed waste in the Survey records. It is evident from the correspondence with the Survey Department that the lands in the occupancy of the appellants are not entitled to be irrigated from the water of the pond. That being so, it is not clear how the appellants could be said to have any valid grievance. Nor does there appear to exist much force in the allegation that the cultivation of the land would prejudicially affect the travelling public. All possible objections were fully considered by Mr. Carr before he granted the land to the respondent and got the Survey Department to fix an assessment on it No interference with the grant thus made and given to, is at this distance of time either called for or justifiable. In reporting upon the case Mr. Puttanna Chetty favors a resumption of the land from the respondent and the payment to him of compensation for the lands acquired from him and included in the water spread of the tank. Government are unable to agree with him either as to the necessity or as to the desirability, of reopening a question decided by Mr. Carr more than four years ago and of upsetting an arrangement which has since been in force. Neither public interests nor private, warrant any action of the kind suggested.

3. For the foregoing reasons Government hold that this appeal is not entitled to succeed and must accordingly be dismissed.

*Appeal No.* 52 *of* 1905-06.

| Appellant | *Versus* | Respondent |
|---|---|---|
| Venkatramaiya | | Rudraiya. |

*Subject.*

Claim to the pateli office of Damarajanapalya, a Dakle village of Navilakurki in the Koratagere Sub-Taluk.

The facts of the case appear sufficiently from the following decision :—

*Decision.*

The respondent has long been the Hakdar Patel of the village of Damarajanapalya, having obtained the office in succession to his father so far back as the year 1873. The appellant is the patel of Navilakurki. At the Survey Settlement the former seems to have been treated as a Dakhala village and the latter as the Asli village. This did not, however, affect the parties each of whom continued until 1903 in the undisturbed possession of his own village. In that year, however, on the strength of the decision passed by Government in Appeal No. 22 of 1901-02, the Deputy Amildar compelled the respondent to surrender charge of his village to the appellant, The Deputy Commissioner interfered and set aside the Deputy Amildar's order on the ground that it had been passed under a misapprehension. The appellant now contests the correctness of the Deputy Commissioner's order. Admittedly he has no right to the office in dispute. All that he contends is that the Potgi Rules and standing orders entitle him to the charge of both the villages.

2. The decision relied upon by the Deputy Amildar does not apply. That was a case between two persons neither of whom was the representative of the original hakdar. Both were the nominees of the Deputy Commissioner, and Government held that the arrangement made by that officer was a clumsy one which could not be upheld. There was no question of hak and no body was deprived of any hak. The present case is thus clearly distinguishable from that one. For a case of this kind there is ample provision in para 2 of the Proceedings of Government No. 10267-75—R. 1055, dated the 3rd January 1894. There is nothing in the Potgi Rules in support of the appellant's contention that the respondent's hak has extinguished by the treatment of his village as a Dakhala village by the Survey Department. The case of patels differs materially from that of shanbhogs, the former being governed by the Proceedings of 3rd January 1894 above referred to and the latter by the principles laid down in Proceedings No. 11829-37—Pet. F. 35-94, dated the 24th January 1905. It is evident that the appellant has no right to oust the respondent and that consequently he has no valid grievance. It is true that both are small villages but this *per se* is no reason why one of the hakdars should be compelled to part with his hak in favour of the other. To both being appointed patels of both the villages with power to officiate by rotation, the appellant does not agree, and no other arrangement satisfactory to both the parties is feasible than the continuance of the one which has existed from time immemorial.

3. The Deputy Commissioner's order is upheld and this appeal is dismissed.

| Balance ... | 10,163 | 0 | 6 |

II. Read returns of patients treated at the Hindu Vaidyasalas of Chikmagalur and Tarikere from July 1905 to end of November 1905. The number of patients admitted and discharged were 8,816 and 8,599 and 6,295 and 6,013, respectively, while those for the same months of the previous years were 13,175 and 12,900 and 5,495 and 5,224, respectively.

(1) Government Proceedings No. 10674-83—Ed. (70 of 04)-13, dated 19th May 1905, directing the contributions payable by the defunct Municipalities towards the cost of education should cease, as twenty-four per cent of the local cess on Land Revenue is already credited towards the cost of education.

(2) Government Order No. 2644-56—L. B. (25-05)-2, dated the 11th September 1905, approving and recording the suggestions of the Hassan District Board that the existing rules as regards the sale of impounded cattle do not require any modification other than that the sale of such cattle should be required to be held at the Taluk Head-quarters on the weekly Santhe day.

(3) Government Order No. 2662-4 —L. B. (102-05)-2, dated the 11th September 1905, sanctioning the establishment of a Hindu Vaidyasala at a cost of Rs. 35 per mensem, of which Rs. 25 will be contributed from the Birur Municipal Funds and the balance of Rs. 10 from District Funds.

(306-04)-5, dated the 13th September 1905, sanctioning the levy of fees on carts, etc., coming to the weekly market on Shandy days at Sakrepatna, and directing that the levy of fees at Ajjampur be held in abeyance till the village revives itself from the depression of trade caused by plague.

(6) Government Proceedings No. 3572-80—L. B. (21-05)-5, dated the 30th September 1905, prescribing forms for registers in the Vaidyasalas of the Province.

(7) Government Notification No. 3708—L. B. (109-05)-6, dated the 3—4th October 1905, confirming the election of the Treasury Assistant Commissioner as Vice-President of the District Board.

(8) Government Order No. 4594-7—L. B. (203-05)-2, dated the 3rd November 1905, approving the lists of incomplete works under District Funds, and authorizing to push on to completion these works during the current year.

(9) Government Order No. 5706-13—L. B. (120-05)-8, dated the 30th November 1905, directing that although according to para 36 of the Rules under Local Boards Regulation, Presidents may, in cases of urgency, sanction works and incur expenditure therefor, yet such works sanctioned by them in anticipation of approval of the Board could only be included in the statement of works sanctioned for that month in which the Board's approval is obtained.

(10) Government Order No. 5495-505—L. B. (204-05)-2, dated the 25th November 1905, sanctioning the supplemental budget estimates of this District Board for 1905-06.

(11) Government Order No. 5117-21—L. B. (194-05)-2, dated the 17th November 1905, informing that if the Board is unable to find funds for the construction of a musafirkhana or a rest-house at Koppa (Balgadi), it must wait till provision can be made for it in the Public Works budget.

IV. Read Secretary's Official Memorandum No. 5793—L. B. (249-05)-2, dated the 1st December 1905, forwarding for disposal the petition dated the 17th November 1905, from Subba Jois and others of Koppa Taluk, praying that the Local Fund Dispensary, which has been in existence for a long time at Hariharpur, may not be transferred to another place.

Read also docket No. 3134, dated the 2nd December 1905, from the Senior Surgeon and Sanitary Commissioner, forwarding for disposal the petition of Subba Jois and others on the same subject.

*Resolved* that the Board sees no reason to re-consider its decision passed already.

From the statistics obtained as to the suitability of the station to which the dispensary may be transferred, the Board resolved after careful consideration that the dispensary be transferred to Balur in the Mudgere Taluk and that the same be recommended to Government.

V. Read Government Order No. 5701-2—L. B. (69-05-5), dated the 30th November 1905, informing that if the contribution of Rs. 1,000 promised for the construction of a Hindu musafirkhana by the District Board of Kadur in 1897 and provided for in the budget for 1897-98, is forthcoming, Government will see about the work being included in the Public Works Department budget for 1906-07.

*Resolved* that the subject be brought up at the next budget meeting.

VI. Read Government Proceedings No. 4284-301—L. B. (378-04)-10, dated the 26th October 1905, directing that due attention be paid to open out roads to villages lying on the roadside.

*Resolved* that a sum of Rs. 500 be provided in the ensuing year's budget for opening out such roads.

VII. Read Senior Surgeon's docket No. 3149, dated 4—5th December 1905, returning the estimate for improving the well at Kerehosahalli village in the Tarikere Taluk, with his countersignature.

*Resolved* that a sum of Rs. 837 be provided in the ensuing year's budget for this purpose.

VIII. Read Comptroller's Circular No. 345, dated the 4th October 1905, requesting, with reference to Government Proceedings No. 3224-12—L. B. (4-04)-16, dated the 25th September 1905, to send a distribution statement for the permanent advance sanctioned in para 4 of the Proceedings referred to above, to the several Taluk Boards and Unions, and to issue cheques in favour of the Taluk Board and Union Panchayets for the amount allotted to them.

As the Board consider it inexpedient to allow large sums as imprests with Amildars owing to the long delay in the receipt of complete vouchers for moneys expended by them, and, as in their opinion, the amounts now sanctioned by Government might be reduced without inconvenience, the Board consider that a sum of Rs. 300 is sufficient for the purpose of imprests and resolve that the same be allotted as-per distribution list given below, which is based upon the information furnished by several officers :—

IX. Read yadi No. 213, dated the 15th September 1905, from the Divisional Assistant Commissioner, forwarding an award order in the matter of payment of compensation of Rs. 10 to one Subba Bhatta, owner of Survey No. 10 of the Ajjampur village, for gravel, etc., dug out of his land for the use of roads, etc., in the Unions.

*Resolved* that the payment of Rs. 10 as compensation be sanctioned out of the current year's budget grant under "B" works.

X. Read docket No. 3598, dated the 23rd October 1905, from the Revenue Commissioner, informing the Deputy Commissioner to address Government in the Local Fund Department in the matter of holding the weekly Santhe at Kudlur in the Tarikere Taluk permanently on Wednesdays.

*Resolved* that Government be addressed to sanction the holding of the weekly Santhe at Kudlur on Wednesdays.

XI. Read Mudgere Amildar's report No. 113, dated the 10th November 1905, requesting the establishment of a cattle-pound in Hornad village, as the people of that village undergo the difficulty of crossing the river Bhadra during the rains, when they want to take cattle to any of the pounds in the villages on the opposite side of the river.

The Board approves of the establishment of a cattle-pound at Hornad village, the patel being in charge of it.

XII. Read Mudgere Amildar's report No. 110, dated the 10th November 1905, forwarding the proposal of the Mudgere Taluk Board to establish a cattle-pound in the Abrakodigi Estate belonging to Mr. Norris.

The Board considers that the opening of a pound is not desirable.

XIII. Read the Divisional Assistant Commissioner's yadi No. 74, dated the 6th November 1905, forwarding the proposal of the Koppa Taluk Board, stating that Lazar Kadados, Coffee Planter, Belgod Estate of the Magunda Hobli, has built a building in his estate, and requesting the establishment of a cattle-pound therein.

*Resolved* that as there is one already at Balehonnur, which is only three miles from this place, another one in the Belgod Estate is not necessary.

XIV. Read Koppa Amildar's report No. 96, dated 1st November 1905, forwarding the resolution of the Taluk Board in the matter of providing a new dhoni to the Tunga crossing at Hebragundi in the Belre Hobli, at Government cost.

*Resolved* that the Board cannot undertake to provide a new dhoni to the contractor, as there is no reference to show that he had been supplied with one on a previous occasion.

XV. Read (i) Resolution No. XIII of the District Board Proceedings dated the 20th September 1905.

(ii) Letter dated 17th October 1905, from Mr. J. Aird of the Mallarasangudda Estate, stating that the estate has not recovered anything from the travelling public crossing the Bhadra River by his dhoni at Ambinakodigi during the past years, but the cooly who works it has been allowed to collect fees from outsiders at the usual Government rates on his own account.

(iii) Also Mudgere Amildar's No. 122, dated the 20th November 1905, stating that a sum ranging from half anna to two annas is collected from every person (excepting the coolies of his estate), crossing the river at Ambinakodigi, according to the nature of the floods, and that some of the villagers pay annually a sum ranging from Re. 1 to Rs. 2 for every house in the village.

As explained in para 3 of Chief Commissioner's Proceedings No. 911-19—P. N. 89, dated the 19th May 1880, the term "ferry" shall not include boats kept by private individuals, not for the public, but for their own use. Since the ferry kept by Mr. Aird at the Ambinakodigi Estate crossing, for the use of his estate, is also reported to be used by the public, the Board is of opinion that the Government will have to be addressed on the subject as this ferry is not included in the list of public ferries entrusted to its charge (*vide* Section 7, clause 8, of Local Boards Regulation). On receipt of Government orders steps will be taken to fix a nominal rent for protecting the interests of the public (*vide* para 4 of the Proceedings dated the 19th May 1880). The Board regrets that it cannot undertake to provide a ferry as it is not an important crossing much resorted by the public.

XVI. Read Mudgere Amildar's report No. 111, dated the 10th November 1905, forwarding the proposal of the Taluk Board that the opening of a new road from Anjur bridge to Devavrinda at a heavy cost, just at present, is unnecessary, as the road is not likely to be useful to many persons.

The Board in agreeing with the opinion of the Taluk Board, resolved that the opening of the road is not practicable.

XVII. Read (i) Revenue Commissioner's Official Memorandum No. 8124, dated the 19th April 1905, forwarding the registered petition of Mr. C. P. Reid and other raiyats of Koppa and Mudgere Taluks, praying that lands be acquired by Government for a road between the Basrekatte and Herur roads, for early report and for obtaining the opinions of Taluk and District Boards.

(ii) Also Koppa Amildar's report No. 118, dated 12th December 1905, forwarding the resolution of the Taluk Board in the matter of the acquisition of the lands for the road in question, and stating that the road, if opened, will commence at the fourth furlong of the thirty first mile of the Wastara-Koppa road and passing through the villages of Herur, Ilikere, Devagodu, Sthirur and Honnagundi, reaches Sollebyle-Balehole road at the sixth furlong of the thirteenth mile and that it will be very useful to the owners of Merthikan, Badnekan, Tirthagundi, Someswarakan, Subbankodigi, Shenkarkodigi, Bettadakolalu and Kattinamane Estates. The road thus passes through nine Government lands and four occupied lands.

*Resolved* that the question of taking over the road for maintenance may be brought forward for discussion after it is constructed by the Planters. It is not known what the length of the road will be and it cannot now be stated what amount will be available from the District Funds. The Board is also of opinion that the acquisition of lands for constructing the road in question rests with the Revenue Department.

XVIII. The President, having found that the work of the Local Fund Department has considerably increased in consequence of the introduction of the Local Boards Regulation and the amalgamation of plague duty in the Local Fund Department and that the pay of the establishment according to the present scale is out of all proportion to the increased responsibilities and heavy duties of the head clerk and others, proposed to increase the strength and pay of the department as per scale noted below :—

| Staff | Existing | | Proposed | | Remarks |
|---|---|---|---|---|---|
| | Minimum | Maximum | Minimum | Maximum | |
| | Rs. | Rs. | Rs. | Rs. | |
| Head clerk ... ... | 30 | 35 | 40 | 50 | An annual increment of Rs. 2. |
| Deputy clerk ... | 25 | 30 | 30 | 35 | Annual increment of Re. 1. |
| 3rd clerk ... ... | 20 | 25 | 25 | 30 | Do do |
| 4th clerk ... ... | 15 | 20 | 20 | 25 | Do do |
| 5th clerk ... ... | ... | ... | 15 | 20 | Do do |
| Record-keeper ... | 10 | 10 | 10 | 15 | Do do |
| Two peons at Rs. 6 each ... | 12 | 12 | 12 | 13 | One at Rs. 7 and another at Rs. 6. |
| Total ... | 112 | 132 | 152 | 188 | |

After careful consideration of the nature and amount of work turned out by several clerks in the Local Fund Department and having regard to the peculiar nature of the district, which has a very heavy correspondence, the Board are unanimously of opinion that as the proposals of the President are reasonable and moderate, they may be commended to Government for sanction.

XIX. Read the following lists of estimates submitted by the several Taluk Boards for sanction :—

| (1) | Sinking a circular drawing well at Kurabarhalli, Kadur Taluk ... | 415 |

*Resolution* :—As estimates for some of the budgetted works have not been received from the Taluk Boards and as the President recommends that it is necessary to sanction estimates for certain works of importance in lieu of those for which estimates have not been received, the Board approved Nos. 4, 5, 6, 7, 9, 12, 13 and 14, costing Rs. 1,572, (Nos. 6, 9 and 14 being budgetted works) and resolved that sanction of Government to the execution of the remaining works, which are non-budgetted, be obtained, as per Government Order No. 6307-17—L. B. (116-11), dated the 24th January 1905.

XX. The Board record with regret the death of Mr. M. Ganesh Rao, one of the oldest members of the Board, and desire to place on record their appreciation of his services on the Board.

XXI. Resolved that the next meeting of the District Board be held on Thursday the 22nd February 1906.

## EXPLANATORY MEMORANDUM ON THE CO-OPERATIVE SOCIETIES REGULATION III OF 1905.

1. *I. The Objects of Co-operative Societies.*—Attention is invited to the reference made to the new Regulation known as the Co-operative Societies Regulation, in the Dewan's Address to the Representative Assembly, which met in October last. This Regulation, as stated in the Address, is intended to be helpful to all classes of people for the furtherance of thrift and providence among them, and the means adopted is to be that of co operation. The word co-operation, it may be stated, is used here not in the sense of mere association for any and every purpose, but in the somewhat restricted sense of association of a number of individuals for mutual profit, whether in the purchase and distribution of commodities for consumption, or in the production of commodities, or in the borrowing and lending of capital. Accordingly, the objects of Co-operative Societies have been specified in Section 3 of the Regulation as being the following :—

(1) The furtherance of thrift and providence among the members;

(2) the attraction of capital and the grant of credit to the members;

(3) the supply to members of raw material, seed or manure;

(4) the sale on behalf of members of agricultural produce or of manufactured goods;

(5) the manufacture of goods or growth of produce by the members co-operatively;

(6) the purchase of foodstuffs, clothing or other articles of consumption, or of animals, implements, or other stock required in agriculture or industry, and their retail sale to members;

(7) the purchase of machinery and its use in common by members

(8) the building of houses or purchase of lands for members;

(9) the carrying out or development by joint action, of an improvement whether agricultural or industrial, or of any other object approved by Government.

2. Perhaps a word of explanation is needed regarding each of these objects. The importance of thrift and providence on the part of any individual needs no explanation, and especially are they needed in the case of the agriculturists and artizans who are now as it were, solitary units left to struggle against adverse circumstances as best as each could.

3. For purposes of business, it need scarcely be stated that credit is largely needed. The cultivating raiyats for instance, need loans for various purposes, such as (1) the purchase or improvement of land, (2) relief from prior debt, (3) the purchase of cattle, manure, seed, implements, (4) house-building, (5) advances in anticipation of the sale of produce, (6) maintenance, (7) payment of revenue or rent.

4. The raiyats, however, have now to pay heavy interest to their sowcars, not to speak of the fees they have often to pay their sureties or witnesses. These items go to reduce their profits to a material extent with little prospect thereby of their condition of hand to mouth living being bettered at any time. The temporary use even of a few rupees for the purchase say, of a bullock, may make all the difference as to whether or not a raiyat will be able to raise his next crop. As an isolated individual his credit is low and his security is uncertain, but as a member of a society he becomes known to others and his credit accordingly rises. A society can easily attract to its coffers by its united credit money which looks askance at individual security. As is well known it is not so much the lack of capital as the lack of credit that is in the way of business-people obtaining loans at a rate of interest which will not absorb the major portion of their profits. In the State Savings Banks there are nearly ninety lakhs of rupees which, it may be believed, if the requisite security was forthcoming would be diverted by their depositors to respond to the needs of the agriculturists and artizans instead of being as at present either locked up in Government of India Securities at small rates of interest or lying unfructuous in the State Treasuries. The need for societies which by their systematic and open modes of business and generally by their independence of the vicissitudes of individual members are able to inspire greater confidence and offer better security than individuals can hope to do, is therefore real and the question therefore deserves serious consideration.

5. In various other ways also the Co-operative Societies may make themselves useful to the members. Through the agency of societies, raw material, seed or manure may be procured at large quantities, thereby obtaining a reduction of price. The societies will also be in a better position to secure a guarantee of quality than unknown individuals with their small orders can hope to do. There is special difficulty at present in the employment of machinery. The small farmers and the smaller artizans find them either too costly for their means or that they have not enough work of their own. In such a case, a society may procure the machinery and let it out on hire, or enable the members to purchase on special terms. Then again, instead of each producer sending off his own particular lot as a separate consignment, the individual lots may be clubbed together as far as their qualities permit and through the agency of the societies, lesser transport charges incurred and better sales effected by obtaining command of wider markets. The societies may also serve as useful agents to advise the members as to the kinds

of produce most likely to find purchasers in outside markets, to give practical guidance in respect to growing, packing and despatch, to receive the produce at fixed centres, to supervise its storage and sale and remit the proceeds of such sale to the producers, less a small charge for expenses. A society after it is fairly well established, may even undertake the establishment of model peasant farms, equipped with the implements and stock considered to be most suitable for the needs of any particular locality. The societies may also organise periodical shows of agricultural and industrial produce and of stock, offer prizes for the efficient management of small allotments, and in other ways further the interests of their members.

6. *II. Success of Co-operative Societies elsewhere.*—Such is an outline of the scope of usefulness of these societies, and if carefully nurtured, there appears to be no limit to this usefulness. In Mysore, however, the small success that has hitherto attended the scheme of Agricultural Banks, may be cited as an instance of the difficulties in the way of the development of these beneficent institutions. There is no need to refer here to the causes of their failure, as they have all been analyzed in the addresses to the Representative Assemblies of the years 1901 to 1903. These causes, however, are not peculiar to Mysore and though they have operated in other countries also yet the scheme has ultimately succeeded after the application of proper correctives.* In British India, after the introduction of the Co-operative Act, several societies have come into existence and are showing signs of growing life. If these institutions languish in Mysore the disappointing result cannot be attributed entirely to their own want of adaptability to their surroundings, for the conditions of Mysore, agricultural and industrial are not dissimilar to those of many parts of the Bombay and the Madras Presidencies. The past failures merely indicate the need in Mysore for fresh efforts and to such efforts the provisions of the Co-operation Regulation are specially helpful. To prove that efforts are worth being made, the success that has attended the movement in European countries may be cited. The following extracts from the article on Co-operative Societies in the Encyclopaedia Brittanica, Vol. XXVII, will bear out this statement.

"Irish co-operation is agricultural and dates from the foundation of one co-operative dairy in 1889. Thence has grown a movement already of great importance and rapidly spreading. In 1890 there was still only one such society; in 1891 there were seventeen, but on 31st December 1900 there were 412, of which 171 were dairies, 106 agricultural societies, seventy-six Banks. By August 1901 the societies numbered about 470 and the members about 54,000. The agricultural societies are chiefly engaged in buying farm requisites pure and cheap and retailing them among their members; in this way they have saved the farmers very large sums. Their trade is about £ 100,000. The Co-operative Banks are of the Raiffesen type and aim at providing the peasants with necessary capital and expelling the usurer. They are increasing rapidly. Among miscellaneous objects of co-operation are selling eggs, poultry, barley and pigs, joint ownership of machinery, joint grazing, potato spraying, producing flax, and so on; and these promise a great growth in number and variety. The dairy societies have federated into an agency for reaching the English market, and the agricultural societies into an Irish wholesale society for purchasing to the best advantage. Besides the direct profits and economies of these societies, they have greatly benefited Ireland by teaching men of all classes, parties and religions to act together for peaceful progress; they have led to a wide diffusion of better agricultural knowledge, and to the establishment by Government of the Agricultural Department.

"Turning abroad we find, in almost all civilized countries, important and growing movements roughly similar to those above described. The most prominent fact since 1877 is the great growth of agricultural co-operation from small dimensions, till it amounts to a great force, almost everywhere and in some countries to a revolution notably in Denmark, where almost every village is an example of varied co-operation. Agricultural co-operation is now the strongest branch of the movement in France, and its backbone are the agricultural syndicates or associations. These, though they began in 1883, numbered 1,500 in 1895, and now probably number 2,500 with 700,000 to 800,000 members.

"As part of agricultural co-operation we may reckon the development of an entirely new type of credit co-operation. The Schultze-Delitzsch credit societies are primarily town institutions, and while they have multiplied and grown great, and sometimes grown capitalistic, many thousands of country folk have learnt to bless the little Raiffeisen loan banks. Such a bank is an association of neighbours uniting to borrow a sum of money in order to lend it out as cheaply as possible in small sums to such of themselves as need loans. It also receives savings deposits, which often produce a large part or even all the capital the society needs to lend. Usually a few of the members are persons of rather more means than the others, and join to help their neighbours by increasing the society's credit. These have no special privilege, but by a common consent they usually take a leading part. Though co-operative credit societies are split up into innumerable groups, insisting on various minor modifications, and making various compromises between the two systems, these two types really include them all. They have spread from Germany into almost all European countries, even at last to Ireland and England besides America and Asia. In Germany, there were in March 1901 out of a total of 19,557 co-operative societies, 12,140 credit associations, and these lent out in 1900 more than £ 120,000,000. In Italy, Austria and Hungary, they are also strong. In 1896 it was estimated

that £ 150,000,000 a year must be very well within the total amount lent by money co-operation on the continent of Europe; £ 190,000,000 may be estimated for 1900.

"Among minor but still important developments may be mentioned the steady growth of co-operative production in France; the co-operative labour gangs or rather societies which undertake building and navying work in Italy; and the letting out of railway construction to co-operative groups of workmen in New Zealand and Victoria. It has been roughly estimated that altogether the members of one or other branch of co-operation number six millions representing with their families a population of twenty-five million people."

8. *III. Membership.*—Having explained, it is hoped, sufficiently clearly the objects of the societies as specified in the Regulation, some of its other provisions may now be taken up. The minimum number of members to form a society is fixed at ten who should all be above the age of eighteen years. It is essential for the proper development of mutual credit that the members of a society should exercise by means of personal acquaintance and moral pressure a mutual control over one another in their transaction with the society. In the report of the Committee on the establishment of co-operative credit societies in India, submitted to the Government of India, it was accordingly suggested that membership should be by election and should be limited to residents in the same town or village or group of villages. The Government of India in their resolution explaining the provisions of the Co-operative Act, have remarked upon this suggestion of the Committee that "there are communities among whose members a common organisation or common interests supply the place of propinquity of residence, and ensure the desired conditions. A compact and closely organised tribe or caste, a community such as is formed by the Native Christians attached to a particular mission, or even the employees on a given line of railway, are instances in point. The Act therefore empowers the Registrar to dispense with the residence test where he is satisfied that this may be safely done, if the society is to be confined to the members of a single tribe or class or caste." In the Mysore Regulation, no such restrictions have been introduced; nevertheless in enlisting its members, it is highly desirable that a society should keep the principles enunciated by the Government of India clearly in view. It should also be remembered that it is desirable that the admission of new members should not be made under an automatic rule, but that each new member must be accepted by the older ones or by the executive committee who represent them in accordance with the provisions of the regulation and with the by-laws of the society.

9. *IV. Liabilities of Members.*—Section 7 of the Regulation provides that the liability of each member of a society for the debts of the society shall be unlimited or limited as may be provided by the by-laws or by any rules framed under the regulation. Where the liability of a member is unlimited, he is, in case of a winding up of a society, liable to contribute without limit to discharge the debts of the society, but in societies limited by shares, a share-holder who has paid up the nominal amount of his shares is not liable for any further amount. The liability of a past member for the debts of the society as they existed at the time when he ceased to be a member, shall continue for a period of one year from the date of ceasing to be a member (section 17). Similarly the estate of a deceased member shall be liable for a period of one year from the time of his decease.

10. *V. Restrictions regarding number of shares and their transfer.*—To prevent a society from getting into the hands of only a few large shareholders to the prejudice of the interests of others, section 12, restricts the maximum number of shares to be held by a member, where the liability is limited, to one-fifth of the total number of shares, the nominal value of which is, without the express sanction of Government, not to exceed one thousand rupees. The restrictions contained in section 14 on transfer by a member of his share or interest in the capital of the society are also to be carefully noted. No such transfer can take place unless the share or interest to be transferred has been held by the member for one year at least. Where a transfer is allowed, it can only be to the society or to a member of the society, and subject to any conditions as to maximum holding. The object of these restrictions is, as stated in the resolution of the Government of India "to render impossible the acquisition by individuals of a predominant interest in such societies, to prevent speculation in connection with them, and to discourage those who might desire for reasons of personal profit to avail themselves of the facilities given by the Act to start banks for other ends than those for which these societies are intended."

11. *VI. Privileges granted to Co-operative Societies.*—The privileges granted to the societies are specially to be noted. In the first place, the share or interest of a member in the capital of a society is not liable to attachment or sale under any decree or order of a court of justice in respect of any debt or liability incurred by the member. Neither the official assignee nor a receiver appointed under Chapter XX of the Code of Civil Procedure is entitled to or has any claim on such share or interest (section 15). But a society has a charge upon the shares or interest in the capital and on the deposits of present and past members, and upon any dividend, bonus or profits payable to them in respect of any debts due from them to the society, and may set off for the purpose any sum credited or payable to such members (section 20).

12. (*a*) In the next place, except in respect of land revenue or any money recoverable as land revenue due to Government or in respect of rent or any money recoverable as rent due to

a land-lord, a society formed under the Co-operative Societies Regulation is entitled in priority to other creditors to enforce its claim

(1) upon the crops or other agricultural produce of present or past members at any time within a year from the date when seed or manure was advanced or money for their purchase was lent,

(2) upon any cattle, agricultural or industrial implements or raw material for manufactures, supplied by the society or purchased in whole or in part with money lent by the society (section 19).

(*b*) The societies have the benefit of a free audit of their accounts by the Registrar once at least in every year, including an examination of overdue debts if any, and a valuation of the assets and the liabilities of the society. It is also open to the Registrar, the Deputy Commissioner or any person authorized in this behalf by the Registrar or the Deputy Commissioner, to inspect at any time the books, accounts, papers and securities of a society (21-" 1 to 4").

(*c*) A certified copy of any entry in a book of any society regularly kept in the course of business is receivable in any suit to recover a debt due to the society to the same extent as the original entry itself is receivable under the existing law (section 22).

(*d*) The Government may exempt any society or class of society from local and general taxes, from stamp duty on instruments and from payment of fees under the Registration Act (section 25). Under Section 6, cl. (5) no charge is made for the registration of the society itself.

13. *VII. Restrictive conditions to ensure efficacy of management.*—In consideration of the special privileges which, as above stated, have been accorded to the Co-operative Societies, certain restrictions have been placed, intended for their more efficacious management A sum which is to be not less than one-fourth of the profits in each year of every society, unless otherwise directed by Government by special order in any particular case, is to be carried to a fund (to be called the Reserve Fund) before any dividend or payment on account of profits is paid to the members (section 8).

Secondly, a society may receive deposits from members without restriction, but it may borrow from persons who are not members only to such extent and under such conditions as may be prescribed in that behalf.

Thirdly, a society can make no loan to any person other than a member, but with the consent of the Registrar, it may make loans to any other society.

Fourthly, a society may deposit its funds in the Government Savings Bank but if it wishes to do so with any banker or with any other person, it can only do so with the approval of the Registrar.

14. *VIII. Caution regarding loans on the security of movable or immovable property.*—A word of explanation is necessary regarding the power reserved to Government in section 10 (2) to prohibit or restrict by general or special order the lending of money on the security of movable or immovable property or any kind thereof by any society or class of society. In the Government of India Act power is given to the Registrar to allow any society which he thinks, can safely be trusted, to advance money upon jewellery. In the Mysore Regulation no distinction is maintained between movable and immovable property and unless prohibited or restricted by Government, a society is not debarred from making advances of money on their security. There are practical difficulties, however, in connection with the custody and valuation of jewellery. When, as stated in the Government of India resolution, a rural society is located in a town or large village, with silversmiths available, with a ready market at hand, and with members and officers of intelligence, it may safely be trusted to conduct transactions which might be dangerous in the case of a more strictly rustic association, which has no such facilities. In the case of mortgages, the considerations are still more difficult. "On the one hand one of the methods in which an involved cultivator can most effectively be assisted is by enabling him to substitute a mortgage upon reasonable for one upon exorbitant terms; and a member who is refused the credit to which his property in land fairly entitles him, merely because he is not allowed to hypothecate it to the society, may be driven to the money-lender for a loan, which, had it not been for the prohibition, he might have taken from the society with advantage to both parties. On the other hand, it is exceedingly inadvisable that these societies should be allowed to lock up their limited capital in a form in which it is not readily available; their most useful form of business will probably be small loans for short periods with prompt recoveries; and it is above all things desirable that they should keep out of the law courts." Hence, it is necessary that special care should be exercised by the societies in advancing money on the security of jewellery or on mortgages.

15. *IX. Conclusion.*—Such are the main objects and scope of this new Regulation which, if rightly worked, is expected to introduce a highly beneficial change in the agricultural and industrial economy of the country. The Regulation is specially intended for the benefit of the

rural classes to whom credit, as has been already stated, is essential to conduct their business and to develop it. The Co-operative Societies under the Regulation have been taken out of the operation of the general law on the subject, and have been accorded special privileges and facilities, in order to encourage their formation and assist their operations. Since they enjoy exemption from the general law and have also facilities of a special nature, particular care is necessary to prevent abuse on the part of any possible speculators availing themselves of the privileges under colourable pretexts.

A set of by-laws is appended to serve as a model. These by-laws may be adopted with such variations as the circumstances of individual societies necessitate.

Office of the Registrar of Co-operative Societies in Mysore, Bangalore, 29*th December* 1905.

*Subject.*

Claim to the shanbhogi office of Vederpura and other villages in the Tumkur Taluk.

The facts of the case appear sufficiently from the following :—

*Decision.*

This is a shanbhogi case. One Ramaiya had four sons named Naranappa, Venkatappa, Krishnappa and Sivaramaiya. He was the hereditary shanbhog of certain villages, seventeen in number. On his death he was succeeded by one of his sons Venkatappa. Eight of the villages were held by Venkatappa and the other nine by one Lingannaiya apparently unconnected with the family. The latter is said to have obtained the nine villages last mentioned in consideration of certain services long rendered by his father to the hakdar's family and on the express understanding that he should not alienate the same. There is some dispute as to whether this is a fact or whether Lingannaiya's connection is traceable to some other origin than a transfer to him by Ramaiya's family. However that may be, it is clear that Lingannaiya, though like every other holder of a hereditary office, incompetent to alienate the shanbhogi of the nine villages in question, was the officially recognized occupant of the latter in his own right and not in a subordinate capacity. For the purpose of this case, it may therefore be taken as established beyond all doubt that of the seventeen villages in dispute, eight belonged to Venkatappa and nine to Lingannaiya. Each of these persons was in the enjoyment of his villages until the year 1862 when Lingannaiya was dismissed on a charge of misappropriation. His sons Nanjappaiya, Puttanna and Timmappa were expressly debarred from succeeding to the office on the ground that they had been privy to the offence aforesaid. In addition to the eight villages which he held in his own right, Venkatappa was appointed to act for the vacancy caused by the removal of Lingannaiya. Venkatappa held all the seventeen villages until his death which occurred in 1871. His minor son Venkatramaiya was next appointed to succeed to his own villages while his brother Naranappa's son Divakeraiya was appointed shanbhog of the remaining, or Lingannaiya's nine villages. Shortly afterwards, *i. e.*, in 1874 Lingannaiya's son Puttanna's son Kapanipataiya and one Krishnappa, a daughter's son of Lingannaiya, claimed the last mentioned nine villages on the ground that they were in no way affected by the order of exclusion passed in 1862. In reply the Deputy Commissioner and the Division Commissioner informed them that there was then no vacancy, that the one which had existed in 1871, had been filled up previous to their application, and that if they renewed their request on the occurrency of a vacancy their claim would be considered by the Deputy Commissioner. Divakeraiya held nine villages in his own account and eight on that of the minor Venkatramaiya for some time, and then died. A gumasta was subsequently put in charge of all the seventeen villages pending further arrangements. Kapanipataiya pressed his claim in 1880. The Deputy Commissioner gave him all the seventeen villages under the impression that his claim related to the entire firka. In so doing, he lost sight of the fact that eight of the villages belonged to Venkatramaiya who could not be prejudicially affected by the demise of his gumasta Divakeraiya. Venkatramaiya protested as soon as he heard of the Deputy Commissioner's order. He further contended that he had attained his majority and was entitled to be inducted into possession of his eight villages. But neither Kapanipataiya nor Venkatramaiya was given possession pending the Survey Settlement which was then near at hand. In the meantime, Divakeraiya's son Naranappa also preferred a claim. In the course of an enquiry held in 1882 Kapanipataiya and Venkatramaiya admitted that they were entitled to only nine and eight villages, respectively. In 1886, the Deputy Commissioner rightly rejected Divakeraiya's son Naranappa's claim. He gave all the seventeen villages to Venkatramaiya on the ground that at the Survey Settlement they had been formed into a single circle to the splitting up of which he (Venkatramaiya) was not agreeable. He had some doubt as to whether a vacancy had occurred of the kind contemplated by the order of 1874, but he held that in any event he could not afford any relief to Kapanipataiya in the face of Venkatramaiya's objection to the subdivision of the consolidated charge duly constituted by the Survey Department. Kapanipataiya died shortly after the rejection of his claim, *i. e.*, about twelve years ago. In 1898, his uncle Timmappa's son Srikantaiya, the 2nd appellant, reasserted the claim but was referred to the order already passed in 1886. In 1903-04, Venkatramaiya died and the question arose as to who should be appointed his successor. The claimants were Venkatramaiya's minor son, the respondent, and Kapanipataiya's brother and cousin, the 1st and 2nd appellants. The Deputy Commissioner in reliance upon the orders of 1886, preferred the former to the latter. Hence this appeal. It must be noted here that the charge being an unwieldy one, the Survey Department with the sanction of Government divided it in 1902 into three circles as particularized in the margin. The appellant contend that the difficulty which confronted the Deputy Commissioner in 1886 has thus since disappeared and that in fairness to them they should be given the share to which they are legitimately entitled.

NOTE.—The other vi lages in the above were absorbed in the above, the total number being reduced to 13.

2. From the above statement of facts, it is abundantly clear that the appellants possess a hereditable right, that that right was not forfeited by the order of 1862, and that there is nothing to prevent the present claim being allowed. Howsoever acquired, Lingannaiya's family had an indefeasible *hak* subject only to the superfluous condition that the office was unalienable. This hak finds mention in several old accounts the genuineness of which is unquestionable. The order of 1862 limited the disqualification to the sons of Lingannaiya who had actively assisted him in the discharge of the duties of shanbhog and in the perpetration of the fraud brought home to him. There is in it no indication that a permanent and perpetual bar was intended. This derives support both from the arrangement under which Venkatappa was only appointed to act and from the order of 1874 which reserved Lingannaiya's grandson's claim for consideration on a vacancy occurring. That claim was not only considered but also admitted by the subsequent order of 1880; in giving immediate effect to which no difficulty should have arisen but for the Deputy Commissioner's misapprehension that the claim involved all the seventeen villages instead of only nine. Another circumstance in favor of the appellants is the admission made by Venkatramaiya in 1882. If the villages had not all been clubbed together and constituted a single circle to the division of which into two charges, Venkatramaiya unreasonably objected in 1886, each of the contending parties, namely, Kapanipataiya and Venkatramaiya would have been given the villages to which he was entitled by right of hereditary succession. It is evident from the order of 1874 that the next vacancy at which Kapanipataiya's claim was promised to be considered was similar to the one which had existed in 1871 but which had been filled up, that is, a vacancy occasioned by the death or removal of the holder and not by the extinction of his family. So long as there was a single circle, Kapanipataiya could not again urge his claim; and he died before the charge was, as observed above, divided into three circles under authority. This division took place in 1900 and the then holder Venkatramaiya died in 1903-04. The appellants thereupon lost no time in again coming forward with their claim. They could not do so earlier as in that case they would have been met by the objection either that there was no vacancy or that the charge was indivisable. The present application is quite in time and is justly deserving of favorable treatment. As between the appellants themselves the first as the brother of Kapanipataiya who had long urged his claim and even secured a recognition of it in 1880, is entitled to priority over the 2nd whose father died some thirty years ago and who never before 1898 made any endeavour to assert and substantiate his title.

3. The ancestors of the parties had, roughly speaking, an equal share in the villages forming the subject of the controversy. The net potgi attached to circle (a) is Rs. 63-2-0, to (b) Rs. 73-8-0 and to (c) Rs. 17-10-0. Circle (b) is thus about equal to circles (a) and (c) together, and must be adjudged to the first appellant unless the respondent prefers to keep it for himself and surrender (a) and (c) to the 1st appellant.

The Deputy Commissioner's order will be modified accordingly.

## EXPLANATORY MEMORANDUM ON THE CO-OPERATIVE SOCIETIES REGULATION III OF 1905.

1. *I. The Objects of Co-operative Societies.*—Attention is invited to the reference made to the new Regulation known as the Co-operative Societies Regulation, in the Dewan's Address to the Representative Assembly, which met in October last. This Regulation, as stated in the Address, is intended to be helpful to all classes of people for the furtherance of thrift and providence among them, and the means adopted is to be that of co operation. The word co-operation, it may be stated, is used here not in the sense of mere association for any and every purpose, but in the somewhat restricted sense of association of a number of individuals for mutual profit, whether in the purchase and distribution of commodities for consumption, or in the production of commodities, or in the borrowing and lending of capital. Accordingly, the objects of Co-operative Societies have been specified in Section 3 of the Regulation as being the following :—

(1) The furtherance of thrift and providence among the members;

(2) the attraction of capital and the grant of credit to the members;

(3) the supply to members of raw material, seed or manure;

(4) the sale on behalf of members of agricultural produce or of manufactured goods;

(5) the manufacture of goods or growth of produce by the members co-operatively;

(6) the purchase of foodstuffs, clothing or other articles of consumption, or of animals, implements, or other stock required in agriculture or industry, and their retail sale to members;

(7) the purchase of machinery and its use in common by members;

(8) the building of houses or purchase of lands for members;

(9) the carrying out or development by joint action, of an improvement whether agricultural or industrial, or of any other object approved by Government.

2. Perhaps a word of explanation is needed regarding each of these objects. The importance of thrift and providence on the part of any individual needs no explanation, and especially are they needed in the case of the agriculturists and artizans who are now as it were, solitary units left to struggle against adverse circumstances as best as each could.

3. For purposes of business, it need scarcely be stated that credit is largely needed. The cultivating raiyats for instance, need loans for various purposes, such as (1) the purchase or improvement of land, (2) relief from prior debt, (3) the purchase of cattle, manure, seed, implements, (4) house-building, (5) advances in anticipation of the sale of produce, (6) maintenance, (7) payment of revenue or rent.

4. The raiyats, however, have now to pay heavy interest to their sowcars, not to speak of the fees they have often to pay their sureties or witnesses. These items go to reduce their profits to a material extent with little prospect thereby of their condition of hand to mouth living being bettered at any time. The temporary use even of a few rupees for the purchase say, of a bullock, may make all the difference as to whether or not a raiyat will be able to raise his next crop. As an isolated individual his credit is low and his security is uncertain, but as a member of a society he becomes known to others and his credit accordingly rises. A society can easily attract to its coffers by its united credit money which looks askance at individual security. As is well known it is not so much the lack of capital as the lack of credit that is in the way of business-people obtaining loans at a rate of interest which will not absorb the major portion of their profits. In the State Savings Banks there are nearly ninety lakhs of rupees which, it may be believed, if the requisite security was forthcoming would be diverted by their depositors to respond to the needs of the agriculturists and artizans instead of being as at present either locked up in Government of India Securities at small rates of interest or lying unfructuous in the State Treasuries. The need for societies which by their systematic and open modes of business and generally by their independence of the vicissitudes of individual members are able to inspire greater confidence and offer better security than individuals can hope to do, is therefore real and the question therefore deserves serious consideration.

5. In various other ways also the Co-operative Societies may make themselves useful to the members. Through the agency of societies, raw material, seed or manure may be procured at large quantities, thereby obtaining a reduction of price. The societies will also be in a better position to secure a guarantee of quality than unknown individuals with their small orders can hope to do. There is special difficulty at present in the employment of machinery. The small farmers and the smaller artizans find them either too costly for their means or that they have not enough work of their own. In such a case, a society may procure the machinery and let it out on hire, or enable the members to purchase on special terms. Then again, instead of each producer sending off his own particular lot as a separate consignment, the individual lots may be clubbed together as far as their qualities permit and through the agency of the societies, lesser transport charges incurred and better sales effected by obtaining command of wider markets. The societies may also serve as useful agents to advise the members as to the kinds

of produce most likely to find purchasers in outside markets, to give practical guidance in respect to growing, packing and despatch, to receive the produce at fixed centres, to supervise its storage and sale and remit the proceeds of such sale to the producers, less a small charge for expenses. A society after it is fairly well established, may even undertake the establishment of model peasant farms, equipped with the implements and stock considered to be most suitable for the needs of any particular locality. The societies may also organise periodical shows of agricultural and industrial produce and of stock, offer prizes for the efficient management of small allotments, and in other ways further the interests of their members.

6. *II. Success of Co-operative Societies elsewhere.*—Such is an outline of the scope of usefulness of these societies, and if carefully nurtured, there appears to be no limit to this usefulness. In Mysore, however, the small success that has hitherto attended the scheme of Agricultural Banks, may be cited as an instance of the difficulties in the way of the development of these beneficent institutions. There is no need to refer here to the causes of their failure, as they have all been analyzed in the addresses to the Representative Assemblies of the years 1901 to 1903. These causes, however, are not peculiar to Mysore and though they have operated in other countries also yet the scheme has ultimately succeeded after the application of proper correctives. In British India, after the introduction of the Co-operative Act, several societies have come into existence and are showing signs of growing life. If these institutions languish in Mysore the disappointing result cannot be attributed entirely to their own want of adaptability to their surroundings, for the conditions of Mysore, agricultural and industrial are not dissimilar to those of many parts of the Bombay and the Madras Presidencies. The past failures merely indicate the need in Mysore for fresh efforts and to such efforts the provisions of the Co-operation Regulation are specially helpful. To prove that efforts are worth being made, the success that has attended the movement in European countries may be cited. The following extracts from the article on Co-operative Societies in the Encyclopaedia Brittanica, Vol. XXVII, will bear out this statement.

"Irish co-operation is agricultural and dates from the foundation of one co-operative dairy in 1889. Thence has grown a movement already of great importance and rapidly spreading. In 1890 there was still only one such society; in 1891 there were seventeen, but on 31st December 1900 there were 412, of which 171 were dairies, 106 agricultural societies, seventy-six Banks. By August 1901 the societies numbered about 470 and the members about 54,000. The agricultural societies are chiefly engaged in buying farm requisites pure and cheap and retailing them among their members; in this way they have saved the farmers very large sums. Their trade is about £ 100,000. The Co-operative Banks are of the Raiffesen type and aim at providing the peasants with necessary capital and expelling the usurer. They are increasing rapidly. Among miscellaneous objects of co-operation are selling eggs, poultry, barley and pigs, joint ownership of machinery, joint grazing, potato spraying, producing flax, and so on; and these promise a great growth in number and variety. The dairy societies have federated into an agency for reaching the English market, and the agricultural societies into an Irish wholesale society for purchasing to the best advantage. Besides, the direct profits and economies of these societies, they have greatly benefited Ireland by teaching men of all classes, parties and religions to act together for peaceful progress; they have led to a wide diffusion of better agricultural knowledge, and to the establishment by Government of the Agricultural Department.

"Turning abroad we find, in almost all civilized countries, important and growing movements roughly similar to those above described. The most prominent fact since 1877 is the great growth of agricultural co-operation from small dimensions, till it amounts to a great force, almost everywhere and in some countries to a revolution notably in Denmark, where almost every village is an example of varied co-operation. Agricultural co-operation is now the strongest branch of the movement in France, and its backbone are the agricultural syndicates or associations. These, though they began in 1883, numbered 1,500 in 1895, and now probably number 2,500 with 700,000 to 800,000 members.

"As part of agricultural co-operation we may reckon the development of an entirely new type of credit co-operation. The Schultze-Delitzsch credit societies are primarily town institutions, and while they have multiplied and grown great, and sometimes grown capitalistic, many thousands of country folk have learnt to bless the little Raiffeisen loan banks. Such a bank is an association of neighbours uniting to borrow a sum of money in order to lend it out as cheaply as possible in small sums to such of themselves as need loans. It also receives savings deposits, which often produce a large part or even all the capital the society needs to lend. Usually a few of the members are persons of rather more means than the others, and join to help their neighbours by increasing the society's credit. These have no special privilege, but by a common consent they usually take a leading part. Though co-operative credit societies are split up into innumerable groups, insisting on various minor modifications, and making various compromises between the two systems, these two types really include them all. They have spread from Germany into almost all European countries, even at last to Ireland and England besides America and Asia. In Germany, there were in March 1901 out of a total of 19,557 co-operative societies, 12,140 credit associations, and these lent out in 1900 more than £ 120,000,000. In Italy, Austria and Hungary, they are also strong. In 1896 it was estimated

that £ 150,000,000 a year must be very well within the total amount lent by money co-operation on the continent of Europe; £ 190,000,000 may be estimated for 1900.

"Among minor but still important developments may be mentioned the steady growth of co-operative production in France; the co-operative labour gangs or rather societies which undertake building and navying work in Italy; and the letting out of railway construction to co-operative groups of workmen in New Zealand and Victoria. It has been roughly estimated that altogether the members of one or other branch of co-operation number six millions representing with their families a population of twenty-five million people."

8. *III. Membership.*—Having explained, it is hoped, sufficiently clearly the objects of the societies as specified in the Regulation, some of its other provisions may now be taken up. The minimum number of members to form a society is fixed at ten who should all be above the age of eighteen years. It is essential for the proper development of mutual credit that the members of a society should exercise by means of personal acquaintance and moral pressure a mutual control over one another in their transaction with the society. In the report of the Committee on the establishment of co-operative credit societies in India, submitted to the Government of India, it was accordingly suggested that membership should be by election and should be limited to residents in the same town or village or group of villages. The Government of India in their resolution explaining the provisions of the Co-operative Act, have remarked upon this suggestion of the Committee that "there are communities among whose members a common organisation or common interests supply the place of propinquity of residence, and ensure the desired conditions. A compact and closely organised tribe or caste, a community such as is formed by the Native Christians attached to a particular mission, or even the employees on a given line of railway, are instances in point. The Act therefore empowers the Registrar to dispense with the residence test where he is satisfied that this may be safely done, if the society is to be confined to the members of a single tribe or class or caste." In the Mysore Regulation, no such restrictions have been introduced; nevertheless in enlisting its members, it is highly desirable that a society should keep the principles enunciated by the Government of India clearly in view. It should also be remembered that it is desirable that the admission of new members should not be made under an automatic rule, but that each new member must be accepted by the older ones or by the executive committee who represent them in accordance with the provisions of the regulation and with the by-laws of the society.

9. *IV. Liabilities of Members.*—Section 7 of the Regulation provides that the liability of each member of a society for the debts of the society shall be unlimited or limited as may be provided by the by-laws or by any rules framed under the regulation. Where the liability of a member is unlimited, he is, in case of a winding up of a society, liable to contribute without limit to discharge the debts of the society, but in societies limited by shares, a share-holder who has paid up the nominal amount of his shares is not liable for any further amount. The liability of a past member for the debts of the society as they existed at the time when he ceased to be a member, shall continue for a period of one year from the date of ceasing to be a member (section 17). Similarly the estate of a deceased member shall be liable for a period of one year from the time of his decease.

10. *V. Restrictions regarding number of shares and their transfer.*—To prevent a society from getting into the hands of only a few large shareholders to the prejudice of the interests of others, section 12, restricts the maximum number of shares to be held by a member, where the liability is limited, to one-fifth of the total number of shares, the nominal value of which is, without the express sanction of Government, not to exceed one thousand rupees. The restrictions contained in section 14 on transfer by a member of his share or interest in the capital of the society are also to be carefully noted. No such transfer can take place unless the share or interest to be transferred has been held by the member for one year at least. Where a transfer is allowed, it can only be to the society or to a member of the society, and subject to any conditions as to maximum holding. The object of these restrictions is, as stated in the resolution of the Government of India "to render impossible the acquisition by individuals of a predominent interest in such societies, to prevent speculation in connection with them, and to discourage those who might desire for reasons of personal profit to avail themselves of the facilities given by the Act to start banks for other ends than those for which these societies are intended."

11. *VI. Privileges granted to Co-operative Societies.*—The privileges granted to the societies are specially to be noted. In the first place, the share or interest of a member in the capital of a society is not liable to attachment or sale under any decree or order of a court of justice in respect of any debt or liability incurred by the member. Neither the official assignee nor a receiver appointed under Chapter XX of the Code of Civil Procedure is entitled to or has any claim on such share or interest (section 15). But a society has a charge upon the shares or interest in the capital and on the deposits of present and past members, and upon any dividend, bonus or profits payable to them in respect of any debts due from them to the society, and may set off for the purpose any sum credited or payable to such members (section 20).

12. (*a*) In the next place, except in respect of land revenue or any money recoverable as land revenue due to Government or in respect of rent or any money recoverable as rent due to

a land-lord, a society formed under the Co-operative Societies Regulation is entitled in priority to other creditors to enforce its claim

(1) upon the crops or other agricultural produce of present or past members at any time within a year from the date when seed or manure was advanced or money for their purchase was lent,

(2) upon any cattle, agricultural or industrial implements or raw material for manufactures, supplied by the society or purchased in whole or in part with money lent by the society (section 19).

(*b*) The societies have the benefit of a free audit of their accounts by the Registrar once at least in every year, including an examination of overdue debts, if any, and a valuation of the assets and the liabilities of the society. It is also open to the Registrar, the Deputy Commissioner or any person authorized in this behalf by the Registrar or the Deputy Commissioner, to inspect at any time the books, accounts, papers and securities of a society (21-" 1 to 4").

(*c*) A certified copy of any entry in a book of any society regularly kept in the course of business is receivable in any suit to recover a debt due to the society to the same extent as the original entry itself is receivable under the existing law (section 22).

(*d*) The Government may exempt any society or class of society from local and general taxes, from stamp duty on instruments and from payment of fees under the Registration Act (section 25). Under Section 6, cl. (5) no charge is made for the registration of the society itself.

13. *VII. Restrictive conditions to ensure efficacy of management.*—In consideration of the special privileges which, as above stated, have been accorded to the Co-operative Societies, certain restrictions have been placed, intended for their more efficacious management. A sum which is to be not less than one-fourth of the profits in each year of every society, unless otherwise directed by Government by special order in any particular case, is to be carried to a fund (to be called the Reserve Fund) before any dividend or payment on account of profits is paid to the members (section 8).

Secondly, a society may receive deposits from members without restriction, but it may borrow from persons who are not members only to such extent and under such conditions as may be prescribed in that behalf.

Thirdly, a society can make no loan to any person other than a member, but with the consent of the Registrar, it may make loans to any other society.

Fourthly, a society may deposit its funds in the Government Savings Bank but if it wishes to do so with any banker or with any other person, it can only do so with the approval of the Registrar.

14. *VIII. Caution regarding loans on the security of movable or immovable property.*—A word of explanation is necessary regarding the power reserved to Government in section 10 (2) to prohibit or restrict by general or special order the lending of money on the security of movable or immovable property or any kind thereof by any society or class of society. In the Government of India Act power is given to the Registrar to allow any society which he thinks, can safely be trusted, to advance money upon jewellery. In the Mysore Regulation no distinction is maintained between movable and immovable property and unless prohibited or restricted by Government, a society is not debarred from making advances of money on their security. There are practical difficulties, however, in connection with the custody and valuation of jewellery. When, as stated in the Government of India resolution, a rural society is located in a town or large village, with silversmiths available, with a ready market at hand, and with members and officers of intelligence, it may safely be trusted to conduct transactions which might be dangerous in the case of a more strictly rustic association, which has no such facilities. In the case of mortgages, the considerations are still more difficult. "On the one hand, one of the methods in which an involved cultivator can most effectively be assisted is by enabling him to substitute a mortgage upon reasonable for one upon exorbitant terms; and a member who is refused the credit to which his property in land fairly entitles him, merely because he is not allowed to hypothecate it to the society, may be driven to the money-lender for a loan, which, had it not been for the prohibition, he might have taken from the society with advantage to both parties. On the other hand, it is exceedingly inadvisable that these societies should be allowed to lock up their limited capital in a form in which it is not readily available; their most useful form of business will probably be small loans for short periods with prompt recoveries; and it is above all things desirable that they should keep out of the law courts." Hence, it is necessary that special care should be exercised by the societies in advancing money on the security of jewellery or on mortgages.

15. *IX. Conclusion.*—Such are the main objects and scope of this new Regulation which, if rightly worked, is expected to introduce a highly beneficial change in the agricultural and industrial economy of the country. The Regulation is specially intended for the benefit of the

rural classes to whom credit, as has been already stated, is essential to conduct their business and to develop it. The Co-operative Societies under the Regulation have been taken out of the operation of the general law on the subject, and have been accorded special privileges and facilities, in order to encourage their formation and assist their operations. Since thy en y exemption from the general law and have also facilities of a special nature, particular care is necessary to prevent abuse on the part of any possible speculators availing themselves of the privileges under colourable pretexts.

A set of by-laws is appended to serve as a model. These by-laws may be adopted with such variations as the circumstances of individual societies necessitate.

Whereas the Government of His Highness the Maharaja of Mysore are satisfied that there is danger of an outbreak of plague in Naikanhatti in the Challakere Taluk, Chitaldrug District, if persons from plague-infected areas are permitted to assemble at that place on the occasion of Tippe Rudradevara jatre.

The Government of His Highness the Maharaja of Mysore, in exercise of the powers vested in them by the Epidemic Diseases Regulation, II of 1897, prohibit the attendance of persons thereat from plague-infected areas from the 13th to the 22nd March 1906, inclusive.

All persons proceeding to the said jatra in contravention of this notification will be turned back.

RESOLUTION.

Read—

Home Department letter No. 1121—1135, dated the 6th July 1905, and the replies of local Governments thereto.

Review of present situation.

More than five years have now passed since the Governor General in Council, when reviewing the report of the Indian Plague Commission, examined in the light of the knowledge then available the various measures which had been proposed or adopted with the object of checking the diffusion of the disease and indicated the considerations of policy which must govern their introduction in India. During this period, while the efforts of Government officers have in no way relaxed, and the people themselves have in many places shown a disposition to acquiesce and even to co-operate

in preventive measures which do not conflict with their social and religious usages, plague has gradually spread to almost every part of India and, subject to certain seasonal fluctuations, tends to recur year after year with undiminished virulence. About a year ago the Government of India, acting in concert with the Royal Society and the Lister Institute, made arrangements for the appointment of a scientific commission which is now investigating the causation of plague in Bombay and the Punjab. Pending the completion of these researches which may extend over a long time and will in any case be directed mainly to the scientific aspects of the problem, the Governor General in Council considered it desirable to place on record in a concise form the results of the practical experience which has been acquired in the last five years of actual plague administration. Local Governments were accordingly asked for reports, based as far as possible on the personal experience of their officers, on the conditions affecting the origin and spread of plague, the character of the measures to be adopted aginst it, the degree of success attained and the causes upon which success or failure depend. The ample materials thus collected place the Governor General in Council in a position to indicate those preventive measures which appear under present conditions most likely to be successful in the future.

Destruction of rats.

2. The most conspicuous change in the opinion of experts in India regarding plague since the issue of the Resolution of 16th July 1900 is the greatly increased importance now ascribed to the part played by rats in spreading and keeping alive the disease. Rats are exceedingly susceptible to plague, and when once they are infected they usually communicate the infection not only to man, but also to houses which have undergone thorough disinfection. It is therefore as essential to the safety of the community to destroy infected rats as to segregate plague-stricken people. In fact almost all the evidence regarding the causation of plague may be regarded as pointing to the rat as the chief agent in its diffusion. For this reason the importance of destroying rats has been insisted on by the framers of the Paris Convention of 1903, and although European opinion is not unanimous on the point, the Governor General in Council considers that the experience recently acquired in India warrants the belief that the systematic destruction of these animals promises to be one of the most effective measures that can be adopted for preventing the spread of plague.

Street improvements; especially paving and draining.

3. Observation has also shown that plague is most severe where the houses of the people are crowded together, ill built and imperfectly ventilated, while it usually spares those areas in towns where the streets are wide, the houses well built, the alleys and side-walks paved, and the drains properly constructed. It follows that municipalities and local bodies should be encouraged and assisted to demolish insanitary quarters, to improve the paving of alleys and side-walks, to neglect no opportunities of widening narrow streets, to enforce simple building rules and to perfect their systems of drainage and conservancy. All godowns where grain is stored should be rendered rat-proof and should be liable to periodical inspection.

Disinfection.

4. In theory the disinfection of both houses and clothing takes a high place among preventive measures and in cases of pneumonic plague it must be regarded as imperative. But the great difficulty of carrying out the process thoroughly in a house casts some doubt upon its practical utility, and the Government of India leave it to the local authorities to determine the extent to which it should be enforced with reference to the prevalent structural conditions. In any case the efficacy of house disinfection depends entirely upon the methods employed. The fluids used must be really germicidal, such as solutions of corrosive sublimate, cyllin, or izal; they must be intelligently applied under proper supervision, and care must be taken to prevent the re-infection of the building by rats. These observations apply in their full force only to towns where the disease has not fully established itself. In villages the disinfection of houses is seldom of much use, while in towns where plague has become indigenous the difficulty of completely excluding the rats leads to constant re-infection.

Evacuation of locality.

5. Of the various measures hitherto adopted with the object of arresting an outbreak of plague none has proved so efficacious as the prompt abandonment of the infected locality for a period that varies with local conditions. In the case of villages, indeed, the evacuation of all the houses, accompanied by systematic destruction of rats, is probably the only means of effectually combating the disease. It is, however, essential that evacuation should be carried out thoroughly: if a portion of the inhabitants remain behind, the disease will continue to spread. In all cases where evacuation is feasible, the people should be encouraged to resort to it and assisted by the grant of blankets and warm clothing, where necessary, and by the provision of huts or the materials for building them.

Inspection of travellers.

6. The evidence which has been collected shows that the inspection of travellers by railway, road, and steamship is often successful in averting or delaying the spread of plague, but that the efficacy of this measure depends on the circumstances in which it is applied. It is of most value in protecting limited areas, such as hill stations, and places so situated that the inspection posts command all routes of access. The mere inspection of persons arriving by steamer is, however, of little use, unless the rats on board the vessel are destroyed or are prevented from reaching the shore.

A segregation camp for the detention of the sick is a necessary adjunct to every inspection station, but no one need be detained who is not actually suffering from plague. In all other cases it is sufficient to record the travellers' names and addresses and to arrange for their being under surveillance for five days. Experience has shown that mere contact with a case of bubonic plague in a railway carriage involves little danger of infection.

Quarantine

7. The example of prisons proves that quarantine may be relied upon to prevent the spread of plague by human beings, but it can seldom be applied effectually except by the people themselves, who have sometimes combined to prevent persons from infected places from entering their villages and have provided accommodation for them outside the inhabited site. In rural areas the adoption of these measures may properly be encouraged : but they do not admit of application to towns.

Segregation of the sick.

8. The removal of the sick to hospital, while it is eminently desirable in their own interests, has always been unpopular, and in cases of bubonic plague the necessity for it may be avoided, provided that the surroundings of the patient can be kept clean and free from rats. That the measure is instrumental, however, in delaying the spread of the disease is undeniable and even though segregation may be relaxed when indigenous cases become widespread, the first few cases imported into a plague-free town should, whenever possible, be segregated without delay. Cases of pneumonic plague, which is directly infectious from man to man, ought always to be segregated

Segregation of contacts.

9. The segregation of persons who have been in contact with a patient suffering from bubonic plague is often impossible in practice. When it can be carried out with the good-will of the people, the measure is no doubt useful, but where coercion has to be employed more harm than good is likely to result. In cases of pneumonic plague, however, the segregation of contacts is necessary as the risk of infection is extreme.

Inoculation.

10. Inoculation with the prophylactic fluid now manufactured at the Parel Laboratory is of value not merely for the protection which it affords against plague but also by reason of its effect in mitigating the violence of an attack. The extent to which it may be adopted depends upon the strength of the popular sentiment in its favour or against it and the Government of India hope that the people may be encouraged to have recourse to it.

General considerations.

11. While the experience of the last five years establishes the utility of the measures enumerated above, it equally teaches that their application must depend upon the circumstances of the locality, the character of the people, the stage which the disease has reached, and the agency available for dealing with it. What is necessary in a district free from plague may be useless or vexatious where plague has become indigenous ; what is effectual in one part of the country may be inoperative in another ; a degree of control which is acceptable to a particular community may be strongly resented by people who observe a different code of social usage ; and in a province with a well developed system of village officials more can be attempted than in a province where no such organization exists. Where the conditions vary so widely from province to province, as is the case in India, it is manifestly impossible for the Governor General in Council to lay down a uniform scheme of plague administration. The local Governments alone are competent to determine what measures are practicable or expedient at particular times and places and it is upon them that the Government of India rely to make the best use of the opportunities which present themselves for checking the spread of the disease. Finally the Governor General in Council would observe that in the last resort all preventive measures depend for their success upon the hearty co-operation of the people themselves and that every effort should be made to enlist their sympathies and to bring home to them through their natural leaders and in any other way that may be practicable that it rests mainly with them to bring about by their own action the cessation of plague in India, as it has long ago disappeared from Europe. When this conviction has been firmly established in the minds of the people, the task of the district officers throughout India will be materially lightened. But that end can only be attained by carrying out thoroughly whatever measures it may be decided to introduce and by impressing upon all officers concerned in plague administration that when a decision has been arrived at there must be no hesitation in giving effect to the policy approved by the local Government.

Whereas the Government of His Highness the Maharaja of Mysore are satisfied that there is danger of an outbreak of plague in Naikanhatti in the Challakere Taluk, Chitaldrug District, if persons from plague-infected areas are permitted to assemble at that place on the occasion of Tippe Rudradevara jatre.

The Government of His Highness the Maharaja of Mysore, in exercise of the powers vested in them by the Epidemic Diseases Regulation, II of 1897, prohibit the attendance of persons thereat from plague-infected areas from the 13th to the 22nd March 1906, inclusive.

All persons proceeding to the said jatra in contravention of this notification will be turned back.

RESOLUTION.

Read—

Home Department letter No. 1121—1135, dated the 6th July 1905, and the replies of local Governments thereto.

Review of present situation.

More than five years have now passed since the Governor General in Council, when reviewing the report of the Indian Plague Commission, examined in the light of the knowledge then available the various measures which had been proposed or adopted with the object of checking the diffusion of the disease and indicated the considerations of policy which must govern their introduction in India. During this period, while the efforts of Government officers have in no way relaxed, and the people themselves have in many places shown a disposition to acquiesce and even to co-operate

in preventive measures which do not conflict with their social and religious usages, plague has gradually spread to almost every part of India and, subject to certain seasonal fluctuations, tends to recur year after year with undiminished virulence. About a year ago the Government of India, acting in concert with the Royal Society and the Lister Institute, made arrangements for the appointment of a scientific commission which is now investigating the causation of plague in Bombay and the Punjab. Pending the completion of these researches which may extend over a long time and will in any case be directed mainly to the scientific aspects of the problem, the Governor General in Council considered it desirable to place on record in a concise form the results of the practical experience which has been acquired in the last five years of actual plague administration. Local Governments were accordingly asked for reports, based as far as possible on the personal experience of their officers, on the conditions affecting the origin and spread of plague, the character of the measures to be adopted aginst it, the degree of success attained and the causes upon which success or failure depend. The ample materials thus collected place the Governor General in Council in a position to indicate those preventive measures which appear under present conditions most likely to be successful in the future.

Destruction of rats.

2. The most conspicuous change in the opinion of experts in India regarding plague since the issue of the Resolution of 16th July 1900 is the greatly increased importance now ascribed to the part played by rats in spreading and keeping alive the disease. Rats are exceedingly susceptible to plague, and when once they are infected they usually communicate the infection not only to man, but also to houses which have undergone thorough disinfection. It is therefore as essential to the safety of the community to destroy infected rats as to segregate plague-stricken people. In fact almost all the evidence regarding the causation of plague may be regarded as pointing to the rat as the chief agent in its diffusion. For this reason the importance of destroying rats has been insisted on by the framers of the Paris Convention of 1903, and although European opinion is not unanimous on the point, the Governor General in Council considers that the experience recently acquired in India warrants the belief that the systematic destruction of these animals promises to be one of the most effective measures that can be adopted for preventing the spread of plague.

Street improvements; especially paving and draining.

3. Observation has also shown that plague is most severe where the houses of the people are crowded together, ill built and imperfectly ventilated, while it usually spares those areas in towns where the streets are wide, the houses well built, the alleys and side-walks paved, and the drains properly constructed. It follows that municipalities and local bodies should be encouraged and assisted to demolish insanitary quarters, to improve the paving of alleys and side-walks, to neglect no opportunities of widening narrow streets, to enforce simple building rules and to perfect their systems of drainage and conservancy. All godowns where grain is stored should be rendered rat-proof and should be liable to periodical inspection.

Disinfection.

4. In theory the disinfection of both houses and clothing takes a high place among preventive measures and in cases of pneumonic plague it must be regarded as imperative. But the great difficulty of carrying out the process thoroughly in a house casts some doubt upon its practical utility, and the Government of India leave it to the local authorities to determine the extent to which it should be enforced with reference to the prevalent structural conditions. In any case the efficacy of house disinfection depends entirely upon the methods employed. The fluids used must be really germicidal, such as solutions of corrosive sublimate, cyllin, or izal; they must be intelligently applied under proper supervision, and care must be taken to prevent the re-infection of the building by rats. These observations apply in their full force only to towns where the disease has not fully established itself. In villages the disinfection of houses is seldom of much use, while in towns where plague has become indigenous the difficulty of completely excluding the rats leads to constant re-infection.

Evacuation of locality.

5. Of the various measures hitherto adopted with the object of arresting an outbreak of plague none has proved so efficacious as the prompt abandonment of the infected locality for a period that varies with local conditions. In the case of villages, indeed, the evacuation of all the houses, accompanied by systematic destruction of rats, is probably the only means of effectually combating the disease. It is, however, essential that evacuation should be carried out thoroughly: if a portion of the inhabitants remain behind, the disease will continue to spread. In all cases where evacuation is feasible, the people should be encouraged to resort to it and assisted by the grant of blankets and warm clothing, where necessary, and by the provision of huts or the materials for building them.

Inspection of travellers.

6. The evidence which has been collected shows that the inspection of travellers by railway, road, and steamship is often successful in averting or delaying the spread of plague, but that the efficacy of this measure depends on the circumstances in which it is applied. It is of most value in protecting

limited areas, such as hill stations, and places so situated that the inspection posts command all routes of access. The mere inspection of persons arriving by steamer is, however, of little use, unless the rats on board the vessel are destroyed or are prevented from reaching the shore. A segregation camp for the detention of the sick is a necessary adjunct to every inspection station, but no one need be detained who is not actually suffering from plague. In all other cases it is sufficient to record the travellers' names and addresses and to arrange for their being under surveillance for five days. Experience has shown that mere contact with a case of bubonic plague in a railway carriage involves little danger of infection.

Quarantine

7. The example of prisons proves that quarantine may be relied upon to prevent the spread of plague by human beings, but it can seldom be applied effectually except by the people themselves, who have sometimes combined to prevent persons from infected places from entering their villages and have provided accommodation for them outside the inhabited site. In rural areas the adoption of these measures may properly be encouraged: but they do not admit of application to towns.

Segregation of the sick

8. The removal of the sick to hospital, while it is eminently desirable in their own interests, has always been unpopular, and in cases of bubonic plague the necessity for it may be avoided, provided that the surroundings of the patient can be kept clean and free from rats. That the measure is instrumental, however, in delaying the spread of the disease is undeniable and even though segregation may be relaxed when indigenous cases become widespread, the first few cases imported into a plague-free town should, whenever possible, be segregated without delay. Cases of pneumonic plague, which is directly infectious from man to man, ought always to be segregated.

Segregation of contacts.

9. The segregation of persons who have been in contact with a patient suffering from bubonic plague is often impossible in practice. When it can be carried out with the good-will of the people, the measure is no doubt useful, but where coercion has to be employed more harm than good is likely to result. In cases of pneumonic plague, however, the segregation of contacts is necessary as the risk of infection is extreme.

Inoculation.

10. Inoculation with the prophylactic fluid now manufactured at the Parel Laboratory is of value not merely for the protection which it affords against plague but also by reason of its effect in mitigating the violence of an attack. The extent to which it may be adopted depends upon the strength of the popular sentiment in its favour or against it and the Government of India hope that the people may be encouraged to have recourse to it.

General considerations.

11. While the experience of the last five years establishes the utility of the measures enumerated above, it equally teaches that their application must depend upon the circumstances of the locality, the character of the people, the stage which the disease has reached, and the agency available for dealing with it. What is necessary in a district free from plague may be useless or vexatious where plague has become indigenous; what is effectual in one part of the country may be inoperative in another; a degree of control which is acceptable to a particular community may be strongly resented by people who observe a different code of social usage; and in a province with a well developed system of village officials more can be attempted than in a province where no such organization exists. Where the conditions vary so widely from province to province, as is the case in India, it is manifestly impossible for the Governor General in Council to lay down a uniform scheme of plague administration. The local Governments alone are competent to determine what measures are practicable or expedient at particular times and places and it is upon them that the Government of India rely to make the best use of the opportunities which present themselves for checking the spread of the disease. Finally the Governor General in Council would observe that in the last resort all preventive measures depend for their success upon the hearty co-operation of the people themselves and that every effort should be made to enlist their sympathies and to bring home to them through their natural leaders and in any other way that may be practicable that it rests mainly with them to bring about by their own action the cessation of plague in India, as it has long ago disappeared from Europe. When this conviction has been firmly established in the minds of the people, the task of the district officers throughout India will be materially lightened. But that end can only be attained by carrying out thoroughly whatever measures it may be decided to introduce and by impressing upon all officers concerned in plague administration that when a decision has been arrived at there must be no hesitation in giving effect to the policy approved by the local Government.

*N.B.*—The question of appointing successors to the deceased members is under correspondence.

I. Read the details of accounts of receipts and expenditure for the months of July, August and September 1905.

*Resolution*—Recorded.

II. Read Government Order No. 7027-35—L. B. (275-05)-2, dated 6th January 1906, calling for the Board's opinion in the matter of awarding annually prizes to patels who keep their village very clean and tidy.

*Resolution.*—The patels are bound to keep their villages clean with the help of the villagers and the village servants. A very small village could be easily kept clean by the village servants while a large village would tax all their energies to clean up and yet remain dirty unless with considerable help from the villagers themselves. There are many villages in which the patel and shanbhog are at variance and each has his own following. In them one party will strive their utmost to prevent the patel from securing the reward. Moreover, no village could be said to be clean unless the houses are also clean. The few streets of a village are usually cleaner than the ill-ventilated and crowded houses, the cleaning up of which would devolve upon the owners, and if then the patels are rewarded for it, the owners might resent it or claim a share in it. The Board, therefore, are diffident in concurring with the Bangalore District Board.

III. Read Executive Engineer's docket No. 975, dated 4th December 1905, forwarding the budget estimates for works to be done by the Public Works Department for 1906-07.

*Resolution.*—The figures be adopted for the next year's budget.

IV. Read the consolidated budget estimates of the Tumkur District Board for 1906-07.

*Resolved* that the budget be submitted to Government for sanction, due provision for the items noted below being made therein as decided already :—

Rs. 50 annual contribution payable to the Deaf and Dumb and Blind School at Mysore.

Rs. 10 per mile for the repairs of Amruthur-Huliyurdurga cart-track.

Rs. 500 for opening out roads to villages lying on the road-side and for maintaining the existing village roads.

V. *Resolved* that Teriyur in the Maddagiri Taluk is a better place for a musafirkhana, than Kodigenahalli and that the small chattram built there during the Amildari of Mr. Chowdaiya be improved at a cost of Rs. 300 and used as a musafirkhana for travellers.

VI. Proposed by the Executive Engineer that the inspection lodge at Borankanave be taken over to the District Funds.

*Resolved* that a musafirkhana is needed in those parts and that it would be profitable to the Board to take it up and repair it and use it as a musafirkhana for travellers, instead of building a new one, and that a sum of Rs. 500 be provided in the budget for its repairs as estimated by the Executive Engineer.

VII. Read Secretary's docket No. 1151—L. B. 44 of 1904-1, dated 29th July 1905, regarding the construction of a musafirkhana at Kadaba.

*Resolution.*—The Board considered a musafirkhana in Kadaba very necessary and resolved that a sum of Rs. 4,000 be provided for it and that the estimate and plan therefor be called from the Executive Engineer, Tumkur Division.

VIII. Read Government Order No. 6206—L. B. 134-05-8, dated 11th December 1605 stating that the Board may revise their proposal regarding the levy of tolls on carts entering the towns of Tiptur, Gubbi and Bellavi.

*Resolved* that the matter be referred to the Executive Engineer for a modification of his original proposal.

IX. Read 2nd General Assistant Commissioner's yadi No. 321, dated 9th December 1905, forwarding Tiptur Taluk Amildar's report stating that the restoration of cattle-pound at Kannughatta, which is in a dilapidated condition, is not necessary as there are cattle-pounds in the villages of Erchanur, Tiptur, Nonavinkere and Arlakuppa, situated within a radius of four or five miles from Kannughatta and that it may be abolished.

*Resolution.*—Approved.

X. Read 1st General Assistant Commissioner's yadi, dated 8th February 1906, *in re* the formation of a road from Maddagiri to Hindupur, forwarding Maddagiri Taluk Amildar's report No. 456, dated 5th February 1906, stating that the Maddagiri townspeople as well as the raiyats of Teriyur and Kodigenhalli may in all probability contribute a sum of Rs. 400 towards the proposed road, and that as the road when formed will be made use of by some of the villages in the Sira Taluk, they may be also asked to contribute towards the same.

*Resolved* that the existing cart-track be improved. Funds do not permit of a new road.

XI. Read and approved the list of works appended below.

3. Government Order No. 5881-92—L. B. 27-05-6, dated 4th December 1905, directing that the estimates for the special repairs of Local Fund roads and other works should be placed before Boards for sanction previous to countersignature by the Presidents.

4. Government Order No. 6433-41—L. B. 91-05-2, dated 19th December 1905, directing that Amildars need not be appointed *ex-officio* members of District Boards as Assistant Commissioners should fully represent the interests of the taluks in their charge.

No money orders will be received by the undersigned except from outside the Province.

Charges of private advertisements must be forwarded to this office.

It is therefore requested that when spare copies are wanted, a note to that effect, stating the number of copies, be made at foot of such notification, etc.

No. 10.—If no instructions, either at foot of notifications, or separately by docket, accompany any matter, it will be printed in the language in which it is written, and published only once.

RESOLUTION.

Read—

Home Department letter No. 1121—1135, dated the 6th July 1905, and the replies of local Governments thereto.

Review of present situation.

More than five years have now passed since the Governor-General in Council, when reviewing the report of the Indian Plague Commission, examined in the light of the knowledge then available the various measures which had been proposed or adopted with the object of checking the diffusion of the disease and indicated the considerations of policy which must govern their introduction in India. During this period, while the efforts of Government officers have in no way relaxed, and the people themselves have in many places shown a disposition to acquiesce and even to co-operate

in preventive measures which do not conflict with their social and religious usages, plague has gradually spread to almost every part of India and, subject to certain seasonal fluctuations, tends to recur year after year with undiminished virulence. About a year ago the Government of India, acting in concert with the Royal Society and the Lister Institute, made arrangements for the appointment of a scientific commission which is now investigating the causation of plague in Bombay and the Punjab. Pending the completion of these researches which may extend over a long time and will in any case be directed mainly to the scientific aspects of the problem, the Governor-General in Council considered it desirable to place on record in a concise form the results of the practical experience which has been acquired in the last five years of actual plague administration. Local Governments were accordingly asked for reports, based as far as possible on the personal experience of their officers, on the conditions affecting the origin and spread of plague, the character of the measures to be adopted against it, the degree of success attained and the causes upon which success or failure depend. The ample materials thus collected place the Governor-General in Council in a position to indicate those preventive measures which appear under present conditions most likely to be successful in the future.

Destruction of rats.

2. The most conspicuous change in the opinion of experts in India regarding plague since the issue of the Resolution of 16th July 1900 is the greatly increased importance now ascribed to the part played by rats in spreading and keeping alive the disease. Rats are exceedingly susceptible to plague, and when once they are infected they usually communicate the infection not only to man, but also to houses which have undergone thorough disinfection. It is therefore as essential to the safety of the community to destroy infected rats as to segregate plague-stricken people. In fact almost all the evidence regarding the causation of plague may be regarded as pointing to the rat as the chief agent in its diffusion. For this reason the importance of destroying rats has been insisted on by the framers of the Paris Convention of 1903, and although European opinion is not unanimous on the point, the Governor-General in Council considers that the experience recently acquired in India warrants the belief that the systematic destruction of these animals promises to be one of the most effective measures that can be adopted for preventing the spread of plague.

Street improvements; especially paving and draining.

3. Observation has also shown that plague is most severe where the houses of the people are crowded together, ill built and imperfectly ventilated, while it usually spares those areas in towns where the streets are wide, the houses well built, the alleys and side-walks paved, and the drains properly constructed. It follows that municipalities and local bodies should be encouraged and assisted to demolish insanitary quarters, to improve the paving of alleys and side-walks, to neglect no opportunities of widening narrow streets, to enforce simple building rules and to perfect their systems of drainage and conservancy. All godowns where grain is stored should be rendered rat-proof and should be liable to periodical inspection.

Disinfection.

4. In theory the disinfection of both houses and clothing takes a high place among preventive measures and in cases of pneumonic plague it must be regarded as imperative. But the great difficulty of carrying out the process thoroughly in a house casts some doubt upon its practical utility, and the Government of India leave it to the local authorities to determine the extent to which it should be enforced with reference to the prevalent structural conditions. In any case the efficacy of house disinfection depends entirely upon the methods employed. The fluids used must be really germicidal, such as solutions of corrosive sublimate, cyllin, or izal; they must be intelligently applied under proper supervision, and care must be taken to prevent the re-infection of the building by rats. These observations apply in their full force only to towns where the disease has not fully established itself. In villages the disinfection of houses is seldom of much use, while in towns where plague has become indigenous the difficulty of completely excluding the rats leads to constant re-infection.

Evacuation of locality.

5. Of the various measures hitherto adopted with the object of arresting an outbreak of plague none has proved so efficacious as the prompt abandonment of the infected locality for a period that varies with local conditions. In the case of villages, indeed, the evacuation of all the houses, accompanied by systematic destruction of rats, is probably the only means of effectually combating the disease. It is, however, essential that evacuation should be carried out thoroughly: if a portion of the inhabitants remain behind, the disease will continue to spread. In all cases where evacuation is feasible, the people should be encouraged to resort to it and assisted by the grant of blankets and warm clothing, where necessary, and by the provision of huts or the materials for building them.

Inspection of travellers.

6. The evidence which has been collected shows that the inspection of travellers by railway, road, and steamship is often successful in averting or delaying the spread of plague, but that the efficacy of this measure depends on the circumstances in which it is applied. It is of most value in protecting

limited areas, such as hill stations, and places so situated that the inspection posts command all routes of access. The mere inspection of persons arriving by steamer is, however, of little use, unless the rats on board the vessel are destroyed or are prevented from reaching the shore. A segregation camp for the detention of the sick is a necessary adjunct to every inspection station, but no one need be detained who is not actually suffering from plague. In all other cases it is sufficient to record the travellers' names and addresses and to arrange for their being under surveillance for five days. Experience has shown that mere contact with a case of bubonic plague in a railway carriage involves little danger of infection.

Quarantine.

7. The example of prisons proves that quarantine may be relied upon to prevent the spread of plague by human beings, but it can seldom be applied effectually except by the people themselves, who have sometimes combined to prevent persons from infected places from entering their villages and have provided accommodation for them outside the inhabited site. In rural areas the adoption of these measures may properly be encouraged: but they do not admit of application to towns.

Segregation of the sick.

8. The removal of the sick to hospital, while it is eminently desirable in their own interests, has always been unpopular, and in cases of bubonic plague the necessity for it may be avoided, provided that the surroundings of the patient can be kept clean and free from rats. That the measure is instrumental, however, in delaying the spread of the disease is undeniable and even though segregation may be relaxed when indigenous cases become widespread, the first few cases imported into a plague-free town should, whenever possible, be segregated without delay. Cases of pneumonic plague, which is directly infectious from man to man, ought always to be segregated.

Segregation of contacts.

9. The segregation of persons who have been in contact with a patient suffering from bubonic plague is often impossible in practice. When it can be carried out with the good-will of the people, the measure is no doubt useful, but where coercion has to be employed more harm than good is likely to result. In cases of pneumonic plague, however, the segregation of contacts is necessary as the risk of infection is extreme.

Inoculation.

10. Inoculation with the prophylactic fluid now manufactured at the Parel Laboratory is of value not merely for the protection which it affords against plague but also by reason of its effect in mitigating the violence of an attack. The extent to which it may be adopted depends upon the strength of the popular sentiment in its favour or against it and the Government of India hope that the people may be encouraged to have recourse to it.

General considerations.

11. While the experience of the last five years establishes the utility of the measures enumerated above, it equally teaches that their application must depend upon the circumstances of the locality, the character of the people, the stage which the disease has reached, and the agency available for dealing with it. What is necessary in a district free from plague may be useless or vexatious where plague has become indigenous; what is effectual in one part of the country may be inoperative in another; a degree of control which is acceptable to a particular community may be strongly resented by people who observe a different code of social usage; and in a province with a well developed system of village officials more can be attempted than in a province where no such organization exists. Where the conditions vary so widely from province to province, as is the case in India, it is manifestly impossible for the Governor-General in Council to lay down a uniform scheme of plague administration. The local Governments alone are competent to determine what measures are practicable or expedient at particular times and places and it is upon them that the Government of India rely to make the best use of the opportunities which present themselves for checking the spread of the disease. Finally the Governor-General in Council would observe that in the last resort all preventive measures depend for their success upon the hearty co-operation of the people themselves and that every effort should be made to enlist their sympathies and to bring home to them through their natural leaders and in any other way that may be practicable that it rests mainly with them to bring about by their own action the cessation of plague in India, as it has long ago disappeared from Europe. When this conviction has been firmly established in the minds of the people, the task of the district officers throughout India will be materially lightened. But that end can only be attained by carrying out thoroughly whatever measures it may be decided to introduce and by impressing upon all officers concerned in plague administration that when a decision has been arrived at there must be no hesitation in giving effect to the policy approved by the local Government.

### RECEIPTS.

| | 1906-07. | 1905-06. |
|---|---|---|
| Octroi... | 56,480 | 57,370 |

*I—Octroi.*

| | 1906-07 | 1905-06 |
|---|---|---|
| I—(a) Fresh cocoanuts ... | 6,000 | 6,220 |
| (b) Dry do ... | 1,600 | 1,800 |
| II—Tobacco, local and foreign | 9,500 | 11,020 |
| VI—(e) Horse gram ... | 1,500 | 1,700 |
| VII—Storage fees ... | 40 | 70 |
| IX—Tobacco licenses ... | 500 | 600 |

The estimates under the six marginally noted heads are based upon the actuals of the past five years and their present demand in the market. The revenue under "Tobacco, local and foreign" has fallen off as the article is smuggled on a large scale by some of the wholesale dealers who have opened out their own depots in villages adjoining the City. The matter has separately been reported upon to Government and it is hoped that the income might improve if the means suggested for the prevention of smuggling are approved of by Government.

The estimates under the remaining seven heads are retained as in last year.

| 1906-07. | 1905-06. |
|---|---|
| 33,000 | 32,100 |

*II—Tax on Houses, Buildings and Lands.*

| | |
|---|---|
| 9,290 | 9,029 |

*Lighting Tax.*

Some new houses to be taxed are being constructed in the two extensions and a few old ones repaired in the City. Hence an increase of Rs. 900 is anticipated under this head.

The estimate under "Lighting Tax" has, for the reasons stated above, been proportionately raised.

*III—License Receipts.*

| | |
|---|---|
| 16,000 | 17,000 |
| 12,000 | 10,260 |

(*a*) Liquor shops.
(*b*) Other licenses.

The estimates under (*a*) "Liquor Shops" are based upon the actuals of the past year and the realizations during the first six months of the current year.

Government having in Proceedings No. 147—Ml. (620-04)-2, dated 4th July 1905, sanctioned the levy of three instead of two annas per head of sheep slaughtered, the right of collecting fees at the enhanced rate was sold during the current year for Rs. 592 as against Rs. 429 in the year previous. Hence the increased estimate under this head.

*VII—Rents.*

*Rents from Market Shops.*

| 1905-06. | 1906-07. |
|---|---|
| 7,600 | 8,000 |

A sum of Rs. 400 in excess of the sanctioned estimate for the current year is provided for 1906-07 upon the actuals of the past and the first six months of the current year.

| 1905-06. | 1906-07. | |
|---|---|---|
| 4,000 | 270 | *X—Miscellaneous.* |
| | | *School Fees.*—Provision is made under this head as per figures furnished by the President of the City Municipal Schools' Committee as per orders conveyed in Government Proceedings No. 4815-21—Ml. (88-04), dated 3rd February 1906. |
| 2,000 | 3,000 | *Scavenging Fees.* |
| | | The estimate is based upon the actuals of the past year and those of the first six months of the current year. |
| 1906-07. | 1905-06. | *Other Items.* |
| 1,500 | 1,944 | |
| | | This is a fluctuating item and as such no approximate amount could be fixed. The present estimate is however based upon the actuals of the year previous. |
| | | The other items call for no remarks. |
| | | EXPENDITURE. |
| 1905-06. | 1906-07. | |
| 10,200 | 10,380 | *II—Head Office.* |
| | | *Clerical Establishment.*—The increase of Rs. 180 under this head is due to the absorption of the appointment of the Statistical clerk on Rs. 15 per mensem of the late Health office which was ordered in Government Proceedings No. 5360-2—Ml. (569-04)-5, dated 23rd November 1905, to be retained. |
| 100 | 300 | (16) *Purchase and repairs of furniture.* |
| | | 2. A sum of Rs. 200 has been provided in excess of the sanctioned sum for the current year as the necessity for supply of boxes to the Octroi Ukkads and the purchase of some furniture for the Octroi and other offices is very much felt. |
| 25 | 250 | (19). *Belts and Badges.* |
| | | 3. More than half the number (25) of peons in the Octroi department and twelve in the Collection office are without belts. It is very essential that all of these should be supplied with proper belts and is likely to cost about Rs. 250. Hence the extra provision. |
| 6,096 | 6,940 | *III—Collection (b) House tax and Mohatarfa.* |
| | | 4. As it is under contemplation to revise the taxes in the City with the aid of the Municipal Commissioners, a sum of Rs. 400 has been newly provided in the budget to meet the charge of batta and allowances to Municipal Commissioners. |
| | | 5. The pay of the three clerks sanctioned in Government Proceedings No. 5360-02—Ml. (569-04)-5, dated 23rd November 1905, is also provided for. |
| 498 | 748 | *Other Taxes (c) Hackney Carriages.* |
| | | 6. A sum of Rs. 250 on account of badges for the use of the drivers is newly provided under this head, as it is a recurring charge and must find a place in the budget. Hitherto, the charge was met by reappropriation of funds. |

*IV—Conservancy (a) Establishment.*

*Assistant Sanitary Inspectors.*

7. One of the two newly appointed Assistant Inspectors was started on probation on a monthly salary of Rs. 25 plus 10 instead of Rs. 30 plus 15 as sanctioned in Government Proceedings No. 10802-3—Ml. (430-04)-12, dated the 25th May 1905.

He has worked well during the period of probation and has also passed the examination in Elementary Sanitary Engineering School at Madras where he was sent for training. Under these circumstances, provision has been made in the budget of the ensuing year at Rs. 30 plus 15.

8. There are at present four Mestris on Rs. 8, eight on Rs. 7½ and twelve peons on Rs. 7 each. The annual cost of this establishment amounts to Rs. 2,232.

9. To meet the present actual requirements, it is proposed to reduce the number from 24 to 20, nine of whom being designated as Mestris on Rs. 8 and the remaining eleven as peons on Rs. 7½.

10. The total annual cost amouuts to Rs. 1,854 or Rs. 378 less than what was sanctioned for the current year. These Mestris will be deputed for the collection of Conservancy Cess at the rate of one for each division excepting the two extensions and the peons will be detailed for supervision over the work of the sweepers and totis. The appointment of two Cess collectors on Rs. 6 each is also proposed to be abolished.

11. Necessity for an orderly to each Sanitary Inspector in charge of Circles into which the City is divided for purposes of conservancy to enable them to get the attendance of sweepers and overseers and to get through other work is being felt much at present and provision for four orderlies at Rs. 6 each is accordingly made in the budget. The cost amounting to Rs. 288 under this item can be met from the savings of Rs. 522 pointed out in para 10 *supra*.

| | 1905-06 | | | 1906-07 | | | Less | More |
|---|---|---|---|---|---|---|---|---|
| | No. | Rate | Amount | No. | Rate | Amount | | |
| | | | Rs. | | Rs. | Rs. | Rs. | Rs. |
| Totis .. | 58 | 7 | 4,872 | 75 | 7 | 6,300 | | 1,428 |
| Do ... | 40 | 6 | 2,880 | 25 | 6 | 1,800 | 1,080 | ... |
| Sweepers ... | 91 | 7 | 7,644 | 85 | 7 | 7,140 | 504 | .. |
| Do ... | 30 | 6½ | 2,340 | 30 | 6½ | 2,340 | | ... |
| Do ... | 38 | 6 | 2,746 | 70 | 6 | 5,040 | ... | 2,304 |
| Do .. | 72 | 5 | 4,320 | 85 | 5 | 5,100 | | 780 |
| Total ... | ... | ... | 29,792 | .. | ... | 27,720 | ... | 2,928 |

12. To meet the actual requirements of the City as well as the Extensions, it has been found quite necesssary to raise the number of totis from ninety-eight to hundred and that of the sweepers from 231 to 270 involving an additional cost of Rs. 348 and Rs. 2,580, respectively, as detailed in the margin.

The increase in the number and cost is mostly due to the provision made for conserving the newly constructed drains in the three Extensions. Further increase in the number of the drain-sweepers will be considered after gaining more experience.

*VII. Lighting.*

13. A lumpsum provision of Rs. 3,000 is made in the ensuing year's budget to meet the charges of oil-lamps required to light parts of the City as well as the suburban villages where electric lighting is not provided.

| 1905-06. | 1906-07. | |
|---|---|---|
| 5,964 | 6,096 | *VIII—P. W. (a) Supervision.* |

14. The increased expenditure of Rs. 132 over the sanctioned estimate of the current year is due to the increase of Rs. 5, sanctioned for the clerk of the Municipal Executive Engineer's office and to meet the pay of a peon employed to watch the Dharmambudi tank as sanctioned in Government Proceedings No. 6310—Ml. (69-05)-12, dated 16th December 1905.

| | | |
|---|---|---|
| 2,008 | 2,188 | *IX—Charitable Grants, Dispensaries.* |

15. The excess provision of Rs. 180 over the sanctioned estimates of the current year is due to extra rate of rent which will have to be paid to the Taluk Cutcherry and Chamrajendrapet Dispensaries both of which have to be removed from the present buildings.

| | | |
|---|---|---|
| 724 | 1,000 | *Home for Incurable Paupers.* |

16. A sum of Rs. 276 has been provided to meet the cost of supplying clothing to the incurables of this institution, as they are in urgent need.

| | | |
|---|---|---|
| 500 | 1,000 | *Pension Charges.* |

17. Owing to the voluntary retirement of some of the Municipal employees, the provision has been raised to Rs. 1,000.

Other items call for no remarks.

*Decision.*

Both the parties claim descent from a common ancestor named Mayimuddegowda, the plaintiffs being the great grandsons of his eldest son Timmegowda, and the defendants the great grandsons of his youngest son Chikkanna. In the face of the decision passed by Government in Appeal No. 104 of 1896-97, it is not now open to the plaintiffs to repudiate the relationship of the defendant's father Ranga to the said Mayimuddegowda. Nor has such repudiation been satisfactorily established. The relationship above referred to may therefore be accepted as an unquestionable fact.

2. The dispute relates to a hereditary pateli office. The last male holder of the office by right of succession to Mayimuddegowda was his second son Sambugowda's son Muddegowda, on whose death it devolved upon his brother Ranganna's widow Akkamma. The suit of 1895-96, which terminated in the appeal above adverted to, was between the present plaintiffs represented by their mother and guardian, and the aforesaid Akkamma and the present defendant's father Ranga. It was held that Akkamma's title was unassailable, that the registry should remain in her name during her lifetime and that the defendant's father Ranga (then 2nd defendant) should be declared heir after her death as against the plaintiffs. The reason why the then 2nd defendant was declared entitled to priority over the plaintiffs was that he was one degree more nearly related to the common ancestor than the plaintiffs. That individual subsequently predeceased Akkamma. The declaration in his favor did not consequently take effect; in other words, the contingency contemplated by the Government decision dated the 22nd October 1897, has not as a matter of fact happened. There is thus no question of resjudicata. Irrespective, then, of the previous litigation, the point now for determination, is which of the parties to the present suit is entitled to succeed Akkamma, who died in January 1903. The Assistant Commissioner decreed in favor of the plaintiffs and the Deputy Commissioner in that of the defendants.

3. Both plaintiffs and defendants are, as shown above, Mayimuddegowda's descendents in the fourth degree. As such they stand on a par with each other. The only difference is that the plaintiffs are the progeny of the elder branch, while the defendants belong to the younger branch. As a set-off against this there is the fact that the defendant's father was in office for several years as Akkamma's gumasta and that but for his premature demise before Akkamma, he would in pursuance of the order of 1897-98, have succeeded her in preference to the plaintiffs and thus acquired a right transmissible to his sons, the defendants. In view of past Proceedings, Government are of opinion that the case is an exceptional one in which the ends of

justice could only be met by recognizing the title of both the parties and giving them an opportunity of enjoying the office by rotation.

4. In modification, therefore, of the Deputy Commissioner's decision Government direct that both the 1st plaintiff and the 1st defendant be appointed and registered as patels and that the office be held by them in turns of five years each.

| Appellants. | *Versus* | Respondent |

| Basve Gowda and others of Jodi Danaikenhalli village in the Belur Taluk. | | Kondi Naranachar and other vrittidars of the said Jodi village. |

*Subject.*

Claim of the appellants to exemption from the payment of full assessment on the Gowda Umbli lands in their possession in the Jodi Danaikenhalli village in the Belur Taluk.

The facts of the case appear sufficiently from the following:—

*Decision.*

The appellants claim exemption from the payment of full assessment on the Gowda Umbli lands in their enjoyment.

2. On the 11th October 1905 Government remitted the case to the Survey and Settlement Commissioner with the following observations:—

"It is admitted that the lands in question are Gowda Umbli lands, that they are entered as such in the Inam Register, that the holders thereof were only paying a jodi both before and after the Inam Settlement that the village was surveyed and settled and taken under Government management in 1884, that full assessment was being levied during the period of such management, and that since the restoration of the village to the Inamdars there has been a dispute as to whether what they are entitled to levy is jodi or full assessment. It is also conceded that one of the appellants continues to do the duties of 'Grama Patel.' The Inamdars (respondents) offer to pay the appellants (or rather the one that does the Grama Pateli duties) a Potgi allowance in the same way as in Government villages. There seem to be more than one kind of Patel in this village as in other malnad tracts. The Gowda Umbli lands were not noticed at the time of the Inam Settlement. (*Vide* Inam Superintendent's docket No. 64, dated the 28th February 1903.) The mere fact that for some time Government had the management of the village and enforced from the Gowdas payment of full assessment, does not seem to prejudicially affect the rights (if any) of the Gowdas as against the Inamdars." "The Survey and Settlement Commissioner and the Inam Superintendent will be requested to favor Government with his opinion as to whether having regard to all the circumstances of the case the appellants (Gowdas) can be compelled to forego their Umbli Hak and to pay full Survey assessment, the Grama Patel alone in return receiving a Potgi allowance from the Inamdars as in Sirkar maidan villages."

3. That officer has now given his opinion in favor of the appellants, as will be seen from the following extract from his report:—

"The village of Danaikenhalli had the Survey Settlement introduced long ago, at the instance of the Inam Superintendent, Colonel Cole. Docket No. 530, dated 17th March 1879."

"The Survey Settlement was introduced by an Assistant Commissioner but no settlement of the particular case under reference was made although in the Pahanisud and in the Putpahani specific mention is made of the Gowda Umbli lands concerned. The remaining settlement papers contain no mention of these lands but the settlement was carelessly carried out, even the Phaisal Patrik not having been prepared."

"So far as can be ascertained by comparing the Pahanisud with the Inam Register, which latter gives the Gowda Umbli (Jodi) as Rs. 33-5-2, the survey assessment of the land comes to very little more than the old jodi."

"The Potgi settlement has also been effected but no land emoluments appear to Patel (sic) and I am not aware whether the Potgi amount has been regularly paid to the officiator or not."

"I think that under the circumstances of this village which has been restored to the Inamdars under circumstances regarding which I have no information, the appellant Gowdas should either pay the old jodi on the lands plus half the difference between the old jodi and the full survey assessment on the principle of Inam. Rule VIII (*f*), or the Potgi should be revised. I recommend the former alternative. At any rate the appellants cannot, in my opinion, be deprived of their Umbli hak."

4. Government, in concurrence with Colonel Grant, direct that the appellants' Umbli hak be left undisturbed and that their liability be restricted to the old jodi on the lands in question plus half the difference between the old jodi and the full survey assessment on the principle of Inam Rule VIII (*f*).

*Subject.*

Claim to the Pateli office of Chowdanayakankoppa in the Shikarpur Taluk.

The facts of the case appear sufficiently from the following :—

*Decision.*

One Neeli Siddaiya was the original Patel of the village in question. On his death some fifty years before the Potgi Settlement of 1886-87 his second son Gurrappa, who was literate, was appointed his successor in preference to his first son Siddaiya, who was illiterate. Gurrappa was confirmed at the settlement above mentioned. The Deputy Commissioner then observed, "he (Gurrappa) combines in himself both the hak and his right as actual officiator. I do not see reason to disturb his possession. He will be confirmed as hakdar and Registerdar. Appellant's (first son's son's) name appears under Registerdar in the Register of 1865. He may perhaps be entitled to get the hak after Gurrappa's death or removal from the appointment." In pursuance of this order of confirmation, dated the 21st January 1887, Gurrappa continued to hold the office until his death, which occurred in 1900. His son Siddappa predeceased him leaving a son (the respondent) who has been appointed his successor. The appellants 1 and 2 who are the son and the grandson, respectively, of the original Patel's eldest son, sued to establish their preferential right and to oust the respondent. The suit failed in the Courts both of the Assistant Commissioner and of the Deputy Commissioner. Hence this appeal, in support of which reliance is placed firstly on the rules of primogeniture and secondly on the observation contained in the Deputy Commissioner's order of 1887. Government hold that the appellant's contention is not entitled to prevail. The younger son was as much a hakdar as the elder. When the office fell vacant, the better of the two had to be appointed and not necessarily the senior in birth. The rule relied on is not literally and invariably enforcible in such cases regardless of other qualifications. The choice fell upon the more competent of the sons, *viz.*, Gurrappa, the grandfather of the respondent. He held the office without interruption for such a long period as sixty to seventy years. His son's son is naturally entitled to take his place in preference to his brother's son or grandson. The Deputy Commissioner's order of 1887 did not make a final pronouncement in favor of the present appellants but only referred incidentally to what might possibly happen in a certain event. That remark was in the nature of an *obiter dictum* which did not bind either Gurrappa or his heirs to the extent of precluding them from contesting its correctness on the occurrence of the event therein contemplated. That being so, it is clear that the authorities below did not err in their estimate of the significance to be attached to the observation. For obvious reasons, the respondent has been rightly preferred to the appellants and Government see no reason to interfere.

The appeal fails and must be dismissed.

*Appeal No. 96 of* 1904-05.

| Appellant | *Versus.* | Respondent |
|---|---|---|
| Basalingavva (widow of Basalingappa junior) | | Mallappa (son of Basalingappa senior). |

*Subject.*

Appeal against the order of the Deputy Commissioner, of the Shimoga District, declining to allow the claim of the appellant urged on behalf of her minor (adopted) son Basavannaiya, to the pateli office of Tadasanahalli village in the Shikarpur Taluk, and directing that the respondent should continue to do the duties thereof until evicted by an order of a competent court.

The facts of the case appear sufficiently from the following :—

*Decision.*

The village in question had long had two patels apparently unconnected with each other. At the time of the potgi settlement, which took place in 1886, it was found that the two patels both named Basalingappa held the office by turns of two years each. Basalingappa senior, then in actual possession, was confirmed with a direction that on his death he should be succeeded by the other Basalingappa or his rightful heir. The former held the office until 1898, when at his instance it was transferred to his son, the respondent. He survived the transfer for three years and then died in 1901. Basalingappa junior, who was to succeed him under the order of 1886 had predeceased him. His widow, the appellant, claimed the office on behalf of her alleged adopted son Basavannaiya. The Deputy Commissioner, however, rejected the claimon the ground that he was unable to modify his predecessor's order of 1898, giving the pateli absolutely to the respondent. Hence this appeal.

2. Basalingappa junior, had two sons, both of whom died very young. His widow is shown to have adopted Basavannaiya under an authority given to her by him. The Deputy Commissioner finds in favor of the factum and validity of the adoption. In this finding Government fully concur.

3. But for the transfer of 1898, to which the appellant was not a party and by which therefore neither her husband nor his heir could be prejudicially affected, Basavannaiya would be entitled to step in on the death of Basalingappa senior, which, as observed above, occurred in 1901. The arrangement of 1886 contemplated alternate life-long possession first, by Basalingappa senior, then by Basalingappa junior or his heir, then again by the former's heir and so on. But the trend of recent decisions prefers a periodical rotation to life-term turns; and Government are disposed to follow it in the present case. With this slight modification, Government see no reason why the claims of both the hakdars should not be recognized and given effect to as distinctly decided at the settlement of 1886.

4. In reversal, therefore, of the Deputy Commissioner's order, Government direct that the appellant's son Basavannaiya's right to a participation in the pateli in question be admitted, and that the office be held by both parties by turns of ten years each, Basavannaiya having his first turn as soon as he attains his majority and is found duly qualified.
